

Subject Index to Volume 257

A

- A6 cells
aldosterone binding sites, species differences, R87
aldosterone receptors in, C665
Acetate, luminal acidification and, proximal tubule, F586
Acetazolamide
bicarbonate transport and, basolateral membrane of intestinal cells (salamander), C252
carbonic anhydrase inhibitors and, base exit, F947
chloride self-exchange and, cortical collecting duct, C94
Acetoacetate, 3-¹³C-labeled, ketogenesis and sepsis, E665
Acetylcholine
cholinergic innervation, renal tissue, F746
current induced by, glucocorticoid inhibition of, chromaffin cells (guinea pig), C906
differential sensitivity to endothelin and, arteries and veins, H1127
dilator response to, endothelial impairment effects, H1485
EDRF release and
arteries, H330
femoral vein, H1910
endothelial effects, coronary resistance arteries, H603
G protein regulation, potassium channels, C596
peptide-induced release, differential action of somatostatin and, G221
potassium current
atrial cells, C646
G protein effects, atrial cells, H1516
relaxation, coronary artery, H1096
release
inactivation and, vagus and AV conduction, H812
somatostatin effects, heart, H483
somatostatin effects, intestinal motility, G532
Trichinella infection, myenteric plexus, G898
suppression, calcium-dependent potassium current, colon, C481
vasoconstriction and, lung, H1977
Acetylglutamine, metabolism, parenteral nutrition, E228
ACh: see Acetylcholine
Acid-base balance
arteriovenous disparity, circulatory failure, F1087
bicarbonate reabsorption and, proximal tubule, F35
carbonic anhydrase inhibitors and, base exit, F947
cellular, parietal cells, C554
chronic metabolic alkalosis effects, H1220
disorders, adaptation of sodium-hydrogen exchange in, renal cortical, F615
exercise effects, kidney, R102
intracellular, parietal cell, G741
partial hepatectomy, ureagenesis decrease and, F696
renal, organic anions in, F170
sodium-bicarbonate cotransport, parietal cells, G350
sodium-coupled transport, proximal tubule, F790
uterine, changes during shell formation (chicken), R732
Acidemia, stimulation, ACTH, vasopressin, and heart rate responses, fetus (sheep), R344
Acidic compartments, intracellular, proximal nephron, F454
Acidification
carbonic anhydrase inhibitors and, base exit, F947
distal, denervation effects, F72
luminal, acetate effects, proximal tubules, F586
phorbol myristate acetate inhibition of, urinary bladder (turtle), F1124
urinary
hydrogen-bicarbonate transport, glucagon effects, F1003
NEM-sensitive ATPase and, collecting tubule, F177
 α -type carbonic anhydrase (turtle), F1015
Acidosis
afterdepolarization and, myocardium (guinea pig), H996
lactic, exercise-induced, kidney, R102
metabolic
bicarbonate reabsorption and, proximal tubule, F35
organic anions in, F170
Acid secretion, proximal tubules, F586
weak, transplacental distribution of DMO, R542
Acridine orange
ionic permeability and, nonpolarized cell, F985
washout, accumulation of weak base in gastric mucosa, G836
ACTH: see Adrenocorticotropin
 α -Actin, running and mRNAs, skeletal muscle, C936
Adenine nucleotides, renal failure, ischemic acute, F953
Adenocarcinoma cell line, pulmonary, glucocorticoid regulation of surfactant protein synthesis, L385
Adenosine
capillary perfusion and blood flow, cerebral, during cerebral artery occlusion, H1656
dilator response to, endothelial impairment effects, H1485
glycolytic flux and, heart, H1952
hypoxia-induced coronary vasodilation, 8-phenyltheophylline and, H1043
hypoxic alterations of anaphylaxis and, heart (guinea pig), H1378
ischemia-reperfusion-induced adherence, leukocytes, H1334
membrane and intracellular effects, pancreatic β -cells, E473
receptor: see Receptors
reflex stimuli and, adrenal blood flow, H590
 α_2 -stimulation and, coronary vasodilation, H132
transport, transcapillary, heart (guinea pig), H89
vascular response, dura mater, H157
Adenosine analogue, tubuloglomerular feedback mechanism and, F231
Adenosine diphosphate, depletion, calcium transients and, cardiomyocytes, C427
Adenosine monophosphate, cyclic accumulation, endothelium, L259
bradykinin activation of protein kinase C, cortical collecting tubular cells, F808
calcium release and, airway epithelium, L116
chloride channels and, fetal pancreatic duct cells, C240
coronary artery function, H1681
 β -endorphin and islet hormone release, E361
endothelial permeability and, pulmonary, H1613
erythropoietin secretion, hypoxia effects, hepatoblastoma cells, C743
fatty acids, steroidogenesis and, Leydig cells, E937
gap junction disappearance and, pairs of hepatocytes, C1
heterogeneity of, proton transport, endosomal, F777
increased, nicotinamide analogue effects, proximal tubules, F1021
insulin release and, pancreas (chicken), E15
ionic permeability and, nonpolarized cell, F985
lung, stretch-related changes, after partial pneumonectomy, E261
lung transport and, L86
metabolic production of, during gestation, R847
modulation of function, osteoblasts, F755
modulation of ionic permeability, renal brush-border membranes, F769
modulation of prostacyclin synthesis, heart, R771
phosphoinositide convergence pathways and, during parotid secretion, C651
production, hyperthyroid adult cardiomyocytes, C948
prolactin, lactose biosynthesis and, E318
protein kinase A, calcium and phosphate uptake and, proximal renal cells, F631
relaxation and intracellular calcium, tracheal smooth muscle, C355
sex hormones, bone conservation and, E903
somatostatin effects, acetylcholine release, G221
uptake, inflation-associated increases, lung, E729
VIP and norepinephrine effects, gallbladder (pig), C52
Adenosine monophosphate deaminase, systemic effects of AICAr, C488
Adenosine triphosphatase
NEM-sensitive, aldosterone effects, collecting tubule, F177
potassium-dependent activation, hypertension, renal tubules, F818
proton translocating
alveolar epithelial cells, L438
cAMP effects, F777

- Adenosine triphosphatase (*continued*)
sodium absorption, across labyrinthine epithelium, F182
- Adenosine triphosphate
calcium influx and, smooth muscle cells, C607
calcium ion accumulation dependent on, oxygen free radical effects, heart, H804
cerebral, postischemic recovery rate, H1860
conductance sensitive to, single myometrial cells, pregnancy and, C297
content, hepatocyte metabolism and, C182
depletion, energy-dependent cell volume maintenance, C817
hypoxic liver cell damage, oxygen pressure and glycolysis in, G58
lung surfactant, alveolar phospholipid uptake and, L248
oxidative metabolism-contraction coupling, phosphocreatine and, aorta, H597
potassium channels sensitive to activation by pinacidil, heart cells (guinea pig), H2092
oil-gate concentration jump method, H1624
ventricular myocytes, H1551
receptor-induced calcium transients, cardiac myocytes, C750
respiration in Clone 9 cells and, glucose transport response, C19
utilization, skeletal muscle during tetanic contraction, E595
- Adenylate cyclase
activation, hypoxia and, hepatoblastoma cells, C743
adenosine and, ventricular myocyte membrane, H1088
 β -adrenergic receptor, during sodium restriction, E499
catalytic, new form of pseudohypoparathyroidism, E277
ischemic fall in β -receptor density, myocardial, H1032
lipolysis and, α_1 -adenosine receptor-mediated inhibition, adipocytes, E871
olfaction, C1043
signal transmission, after GLP-1(7-36)amide, G397
- Adenylosuccinate synthetase, binding, contractile proteins, muscle, C29
- ADH: *see* Antidiuretic hormone
- Adipocytes
adenylate cyclase and lipolysis, α_1 -adenosine receptor-mediated inhibition, E871
glucose transport, stimulation by insulin and norepinephrine, C714
glucose transporters, exercise training effects, E520
hexose accumulation, C214
lipogenesis, inhibitor in serum, R326
regression, diabetes and, E547
- Adipose tissue
blood flow: *see* Blood flow
brown: *see* Brown fat
metabolism, meal-related changes, R711
preweaning food intake effects, body composition (baboon), R1128
responses to short days, regional differences (hamster), R1533
white
regression, diabetes, E547
ventrolateral hypothalamic obesity, E255
- Adrenal cortex
blood flow: *see* Blood flow
enhanced response to corticosterone, genetic obesity, E133
- Adrenalectomy
enhanced response to corticosterone, genetic obesity, E133
glutamate treatment and, prevention of obesity, E139
- Adrenal gland
ANF binding sites, congestive heart failure, F515
angiotensin II effects, pregnancy (sheep), H17
hemorrhagic hypotension, catecholamines and glucose in, H1945
Adrenal hormone, response to hemorrhage, prior stress immobilization effects, R661
- Adrenal medulla
blood flow: *see* Blood flow
chromaffin cells, glucocorticoid inhibition of ACh current (guinea pig), C906
secretory proteins, calcium interaction with, E247
- β -Adrenergic agonist
pH and, proximal nephrons, F623
secretion, intracellular pH regulation of, lung, L354
- Adrenergic nerve ending, uptake, DOPEG and, saphenous vein, H1945
- Adrenergic regulation, calcium-deficient hypertension, embryo (chick), H1900
- Adrenergic stimulation
isoproterenol, glomerular hemodynamics and, F866
stretch and, cavernous carotid artery, R1335
- Adrenocorticotropin
catecholamine activity after hemorrhage, paraventricular hypothalamus, R370
central autonomic nervous system-regulating peptides, R681
central interleukin 1-elicited hyperinsulinemia, prostaglandin mediation of, R839
control by corticosteroids, R427
hypoxia effects, anesthesia and, H1458
inhibition, renin response to hypotension, R194
responses
acidemia stimulation of, fetus (sheep), R344
corticotropin-releasing factor, cold adaptation and, E336
repeated small hemorrhage, R118
to hemorrhage, prior stress immobilization effects, R661
- Aequorin
luminescence, tracheal smooth muscle, C1062
measurement of cytoplasmic calcium, arterial smooth muscle (swine), C122
relaxation and intracellular calcium, tracheal smooth muscle, C355
sodium ion electrochemical gradient, proximal tubule, F531
- Aerobic capacity, maximum, norepinephrine spillover during, muscle, H1812
- Afferent nerve
mechanism, somatosensory inhibition of baroreflex bradycardia, R829
- renal, activation effects, R29
sympathetic, cardiac, bradykinin and capsaicin effects, H1543
visceral, inhibition of spinothalamic cells (monkey), R889
- Afterdepolarization
delayed, diastolic potentials and, ischemic Purkinje fibers, H770
myocardial, low intracellular pH effects (guinea pig), H996
- Aging
cardiac adaptations and, aortic constriction, H643
cardiac myocyte characteristics, H259
cardiopulmonary reflex decrease, H961
diminished response to epinephrine, ANF and, E866
dynamic exercise, senescence and, H1428
endogenous pyrogen, acute-phase response to, R189
gastric mucosal response, epidermal growth factor, G554
gender effects and, thermoregulation, R700
heat exposure, dehydration and rehydration during, R1050
metabolic rate and, food restriction effects, E175
muscle fiber-type composition, E823
rubidium reflux and, H494
vasoactive substances and, coronary response, H988
- AICAr: *see* 5-Amino-4-imidazolecarboxamide riboside
- Air, expired, thermoregulatory control of, diving (seal), R306
- Airway
antigen challenge of, local mediator release, L366
dilation, benzodiazepines acting on ventral medulla, R810
diseases, peptide role in, L144
epithelium
release of intracellular calcium, L116
sodium-chloride cotransport, β -adrenergic regulation of, L125
function, trypsin and chymase roles in, L39
IP₃ formation, phorbol ester inhibition of, L209
PAH transport, sodium and bicarbonate effects, C1108
tone, lowering of oxygen pressure and, C1034
upper, carbon dioxide pattern effects on ventilatory urgency (lizard), R156
- Alanine, metabolism, parenteral nutrition, E228
- Albumin
binding, stagnant layer phenomena, hepatocytes, G584
estimation of capillary reflection coefficients, H1036
fatty acid fluxes and, lipid-water interface, G904
interstitial exclusion, dermis and subcutis, over- and dehydration, H1819
thrombin-induced permeability increase to, phalloidin effects, C562
transport, blood-tissue, saline infusion and, H525
- Albumin-palmitate complexes, hepatocytes, G584
- Alcohol, absorption, gastric emptying and, G291
- Alcoholism, hemorrhagic shock and, H198

- Aldosterone**
 ANF and
 experimental low-output heart failure, R917
 potassium loading and, R1423
 renin release and, R194
 salt-depleted state, E583
 binding sites, nephron, species differences, R87
 NEM-sensitive ATPase and, collecting tubule, F177
 receptor: see Receptors
 secretion, dopamine antagonism effects, E588
 sodium absorption, electroneutral, low dose glucocorticoid effects, colon, F1027
 specificity, steroid metabolism and, bladder, F690
 stimulation of sodium-potassium pump, cortical collecting tubules, F595
- Alkaline phosphatase**
 capillary density and, sternomastoid muscle, H344
 intestinal, secretion from villous enterocytes, G14
- Alkalinization, mucosal, hydrochloric acid effects, G653**
- Alkalosis**
 metabolic
 cerebral blood flow and metabolism in, H1220
 correction, nephrons and, F107
 effects on calcium, PTH, and vitamin D₃, E578
 organic anions in, F170
 respiratory
 adaptation of sodium-hydrogen exchange in, renal cortical, F615
 intracellular pH regulation of, lung, L354
- Allergy**
 antigen challenge, bronchial segment, L366
 food, mucosal IgE reactions, stomach, G704
- Allopurinol, leukocyte adherence, reperfusion-induced, G683**
- Alprazolam, cardiac function and blood flow with, awake state, H25**
- Altitude, high, cardiac function and, fetus (sheep), H581**
- Aluminum, bidirectional calcium flux and, everted intestinal sacs, G433**
- Alveolar cells**
 type II
 bioelectric properties, modulation by substratum, C678
 fibroblast-pneumocyte factor, L174
- Alveolitis, experimental, pulmonary edema and, hyaluronan accumulation in lung, L379**
- Amiloride**
 calcium transport and, inner medullary collecting duct, F738
 cell volume regulation, sodium-hydrogen exchange and, C1158
 chloride conductance and, sweat duct epithelium, cystic fibrosis, C727
 distinct epitopes on, C1135
 early distal convoluted tubules, F288
 electrogenic sodium-hydrogen exchange, membrane vesicles, gill (crab), R924
 leukotriene D₄, glomerular epithelial cells, C232
- pH regulation and
 hepatoma cells, G317
 myocytes from adult heart, C207
 parietal cells, C554
 propionate effects and, rectal gland (shark), C377
 sodium and chloride transport, gallbladder (pig), C45
 sodium-bicarbonate cotransport, parietal cells, G350
 sodium ion conductance inhibitable by, respiratory epithelium in oocytes, L284
 transport, sweat duct cells, cystic fibrosis, C722
 volume-regulatory potassium ion fluxes and, liver, G357
- Amiloride analogues, electrogenic, acid-base transport mechanisms, proximal tubule, F790**
- Amines, biogenic, anoxia and, brain and kidney (carp), R10**
- Amino acids**
 arteriovenous differences, liver and placenta, fetus (lamb), E909
 brain, salt-loading and, F1108
 excitatory, muscular contraction and, R1154
 insulin suppression and, whole body proteolysis, E839
 metabolism, reciprocal pool model, E385
 pial arterioles and (piglet), H1200
 precursor, regulation, L163
 studies, whole body protein synthesis and, E639
 translocation, γ -glutamyl cycle in regulation of, E916
 transport
 brush-border membrane vesicles, intestine (eel), R506
 erythrocytes and, L272
 insulin resistance of, skeletal muscle, E418
 integumental, marine bivalves, R473
 intestinal brush-border membrane, lepidopteran larvae, R494
 jejunal brush-border membrane vesicles, G80
 muscle fibers (barnacle), C442
 pigment epithelium, metabolic stress effects, eye (bovine), C940
 uptake
 endothelial cell, diethyl maleate and hyperoxia effects, L265
 microvillous membrane vesicles, placenta, C1005
 β -Amino acids, transport, jejunal brush-border membrane vesicles, G65
- Aminoaciduria, experimental Fanconi's syndrome and, F959**
- γ -Aminobutyric acid**
 hypothalamic receptors, stress-induced tachycardia and, R246
 release, somatostatin effects, intestinal motility, G532
- p-Aminohippurate**
 experimental renal cortical necrosis, F925
 transport
 airway, C1108
 urinary bladder (crab), R501
- 5-Amino-4-imidazolecarboxamide riboside, systemic effects, C488**
- Aminopeptidase, perinatal expression, colon, G496**
- Aminopeptidase P, pulmonary vascular surface, L53**
- 2-Aminophenol-*N,N,O*-triacetate, cytosolic free magnesium, heart cells (chick), C141**
- Aminotriazole, hydrogen peroxide generation and, renal failure, F440**
- Ammonia**
 distal tubule, glucagon effects, F1003
 metabolism
 liver and placenta, fetus (lamb), E909
 renal, submitochondrial particles, F1050
- Ammoniogenesis**
 glutamine synthesis and, liver, during fasting, E514
 renal cortical epithelial cells, F705
- Ammonium chloride, calcium transport and, intestinal epithelium, G818**
- Ammonium ions**
 ATP utilization, skeletal muscle during tetanic contraction, E595
 glutamine synthesis and, liver, during fasting, E514
- Amniotic fluid**
 decreasing pH in, estimation by DMO, R542
 vasopressin metabolism in, trypsinlike enzyme and (guinea pig), E354
- Amylase**
 release
 gastric smooth muscle cells, G73
 pancreatic acini, G202
 secretion
 high-affinity receptors, carbachol-induced downregulation for, G402
 staurosporine effects, pancreatic acini, G548
- Amylo-1,6-glucosidase, metabolism, vascular smooth muscle, C736**
- Analbuminemia, colloid osmotic pressure in, F23**
- Analgesia, vagal afferent inhibition, spinothalamic cells (monkey), R889**
- Anaphylaxis, hypoxic alterations of, adenosine role in, heart (guinea pig), H1378**
- Anemia, pial arteriole constriction and, H912**
- Anesthesia**
 epidural, exercise effects, E95
 local, external binding site for, cardiac cells, H79
 response to hypercapnia and, cerebral arterioles, H85
- Anesthetics**
 inhalation, halogenated, delivery, R668
 local, blockade of calcium channel, model, H1693
 rapid cooling contractures and, myocardial tissue, H1804
 slow sodium current, muscle cells, malignant hyperthermia, C759
- ANF: see Atrial natriuretic factor**
- Angiotensin**
 control of pressor action, brain, structure-function analysis, R1551
 hormonal response and, repeated small hemorrhages, R118
 inhibition, ANF, proximal straight tubules, F907
 injection into dorsal medulla, cardiovascular effects of, H324
 sodium appetite and, dehydration (cow), R1212

- Angiotensin (*continued*)
 vasoconstriction induced by, ANP effects, H1062
 vasopressin effects and, oxygen uptake, sinoaortic denervation, R1
- Angiotensin-converting enzyme
 ketamine and fentanyl effects, lung metabolism, E379
 metabolism, pulmonary, transit time and, H853
 protein kinase C, 5-HT uptake and, endothelial cells, L253
 pulmonary vascular surface, L53
 synthetic substrate, hydrolysis of, lung, H2006
- Angiotensin I, pulmonary vascular surface, L63
- Angiotensin I-converting enzyme, angiotensin receptors and, intestine, G504
- Angiotensin II
 acute aortic coarctation hypertension and, H1480
- ANP effects
 mesangial cell relaxation and, C86
 pressure natriuresis and, R1169
 attenuated pressor response, third cerebral ventricle lesions, R431
 binding sites, regulation by catecholamines, neuronal cultures, C706
 central
 blood pressure control during pregnancy and, R1457
 cardiovascular response to, baroreceptor denervation effects, H314
 effects on blood flow, cerebral, H834
 eicosanoid release and, diabetes, F762
 immunoreactive release, neuronal, C588
 infusion
 ANF release during, R896
 glomerular filtration barrier and, F608
 vasopressin and cortisol responses to, baroreceptor denervation effects, R1175
 insulin effects and, kidney, F580
 microvascular reactivity, streptozotocin-induced diabetes, H1438
 modulation, thromboxane, F554
 placental response to, fetus (sheep), E102
 pressor responsiveness, pseudopregnancy and pregnancy, R866
 regulation, salt-depleted state, E583
 response, β_1 -adrenergic blockade effects, F225
 response to ANF, experimental low-output heart failure, R917
 salt hypertension, blood volume in, H1402
 stimulation, sodium-potassium-chloride cotransport, vascular smooth muscle cells, C629
 vascular responses to, uterine and nonuterine, pregnancy (sheep), H17
 vasoconstriction mediated by, lipoxigenase blockade, H434
 vasopressin interaction and, prostacyclin synthesis, vascular smooth muscle cells, E617
- Angiotensin II analogues, inhibition of angiotensinogen production, hepatoma cell line, C888
- Angiotensinogen
 plasma, stimulation by dexamethasone, E879
- production, inhibition by angiotensin II analogues, hematoma cell line, C888
 renin hypersecretion, vasopressin replacement effects, R1117
 synthesis, renin-containing neuroblastomas, C185
- ANH: *see* Atrial natriuretic hormone
- Anions
 conductance, duodenal apical membrane vesicles, G661
 nonerythroid exchange, promyelocytic HL-60 cells, C520
- organic
 fluxes, albumin effects, lipid-water interface, G904
 renal acid-base balance and, F170
 transport, urinary bladder (crab), R501
- Anorexia, interleukin 1 and, R1315
 corticotropin-releasing factor in, R613
- Anoxia
 ANF-induced, heart, H147
 catecholamine levels and, brain and kidney (carp), R10
- cerebral
 energy expenditure and ion channels (turtle, rat), R1354
 energy metabolism, ion homeostasis, and evoked potentials (turtle), R854
 ion leakage during (turtle), R1562
 cyanide toxicity in, hepatocytes, C435
 leucine transport and, pigment epithelium, eye (bovine), C940
 tolerance, glycolytic enzymes during (turtle), R278
- ANP: *see* Atrial natriuretic peptide
- Anthracycline-9-carboxylic acid, chloride channels and, glomus cells, carotid body, C174
- Antiarrhythmic drugs
 blockade, calcium channel, model, H1693
 external lidocaine binding site, cardiac cells, H79
- Antiarrhythmic properties, transient outward potassium current, ventricular myocytes, H1746
- Antidiuresis, head-up tilt and, awake state, R337
- Antidiuretic hormone: *see also* Vasopressin
 apical membrane responses to, bladder (toad), R998
 fluorescent vasotocin analogues (toad), E804
 lithium and, proximal tubule delivery, F899
 organic osmolytes and, renal, F732
 osmoregulatory alterations of pregnancy, hemodynamic factors in, R909
 relevance, inner ear volume receptors (guinea pig), F341
 vascular mechanics and, H1228
 vasopressin effects and, oxygen uptake, sinoaortic denervation, R1
- Antigen
 challenge, allergy and, bronchial segment, L366
 very late activation, extracellular matrix components, L331
- Antihypertensives, ATP-sensitive potassium channels, heart cells (guinea pig), H2092
- Antinatriuresis
 head-up tilt and, awake state, R337
 intrarenal dopamine and, F469
- Antioxidant enzymes
 activation of phospholipase A₂, pulmonary endothelium, L430
 development, lung, thyroid inhibition of, fetus, L94
 hyperoxide tolerance, rest period induction of, L226
- Antiserum, against ANP, spontaneous hypertension, H1104
- α_1 -Antitrypsin gene, emphysema and, L147
- Aorta
 baroreflex, input signal size, H465
 calcium release, forskolin- and caffeine-induced, C413
 constriction, cardiac adaptations to, aging and, H643
 diabetic, contraction, endothelial cell TxA₂, H1327
 impedance, compliance and, hypertension, H553
 phosphocreatine, oxidative metabolism-contraction coupling and, H597
 smooth muscle, stimulus-specific changes, H1573
 subdiaphragmatic constriction, hypertension, H711
- Aortic nerve
 depressor, glutamate coinjection, response to ANF, R405
 stimulation, posterior hypothalamus and, H1994
- Aortocaval fistula, ANP release, hypophysectomy and, R522
- Apnea, timing control, periodic breathing, R653
- Apoprotein, pulmonary surfactant, L13
- Appetite: *see* Feeding
- Arachidonate
 hyperemia and oxygen uptake, postprandial jejunal, G798
 metabolism, mucosal, ischemia-reperfusion injury and, G299
- Arachidonic acid
 absorption losses (baboon), C1166
 arteriolar dilation, endothelial impairment of, H1966
 dexamethasone effects, microvascular endothelial cells, C512
 eicosanoid release and, diabetes, F762
 interstitial infusion, effects on proximal sodium reabsorption, F237
 membrane ionic conductance and, pituitary cells, E203
 metabolism, oxygen deprivation effects, heart cells, H444
 oxidant-mediated activation, pulmonary endothelium, L430
 phospholipase activation, C5b-9 and, F826
 prostaglandin production and, renal medulla, F336
- Area postrema
 lesion, response to palatability after, R1075
 pressure regulation, circulating vasopressin effects, H209
- Arrhythmias
 cardiac
 autonomic response to coronary occlusion, H1886
 parasystole and, model, H693
 voltage and charge effects, H1534
 extracellular electrode array, high-density, H681

- left ventricular free wall traction, electrophysiology of, H1211
 triggered activity, diastolic potentials and, H770
 Wenckebach, brief vagal bursts and, H935
Arterialization, partial liver transplant, H1971
Arterial occlusive disease, peripheral, sweat lactate in (calf), H395
Arteries
 see also specific artery
 contraction, serotonin-induced, phorbol amplification of, H1174
 hemodynamics, atherosclerosis, model, H891
 rubidium efflux, aging effects, H494
Arterioles
 afferent and efferent, potassium-chloride-induced depolarization and, F561
 cerebral, response to hypercapnia, anesthesia effects, H85
 dilation, prostaglandin and EDRF-mediated, endothelial impairment and, H1966
 dilator responses, endothelial impairment effects, H1485
 mesenteric arcading, dilator response to blood flow velocity, H1958
 smooth muscle responses, intramural diffusion barrier effects (hamster), H10
 wall mechanics, myogenic response and, H1147
Arteriovenous fistula, size effects, arterialized and host livers, H1971
Ascorbate, delivery, placenta, C110
Ascorbic acid, handling, placenta, C110
Asialofetuin, internalization, phenylarsine oxide inhibition of endocytosis, C182
Aspartate, pial arterioles and (piglet), H1200
Asphyxia, fetal, β -adrenergic block effects on lung liquid secretion (sheep), R705
Astrocytomas, cell volume maintenance, energy-dependent, C817
Asynergy, ventricular, H1025
Atherosclerosis
 arterial hemodynamics, model, H891
 low-density lipoprotein transport, blood vessel walls (monkey), H452
 vascular smooth muscle cell growth and, H1755
ATP: *see* Adenosine triphosphate
ATPase: *see* Adenosine triphosphatase;
 Calcium-magnesium-ATPase; Hydrogen-potassium-ATPase; Sodium-potassium-ATPase
Atrial cells: *see also* Cardiac cells; Cardiomyocytes; Heart cells; Myocytes; Ventricular cells
 acetylcholine-induced potassium current in, G protein effects, H1516
 potassium current, acetylcholine-gated, C646
Atrial natriuretic factor
 aldosterone and renin inhibition by, potassium loading and, R1423
 angiotensin effects, proximal straight tubules, F907
 binding sites, congestive heart failure, F515
 depressor response to, glutamate coinjection effects, R405
 diminished response to epinephrine, elderly, E866
 DOCA administration and, chronic heart failure, H739
 E. coli enterotoxin effects, kidney, intestine, and testis, F874
 gene expression, heart ventricle, during hypertension, H979
 hemodynamic effects, congestive heart failure, R1481
 hypotensive effect of, sodium depletion and, H502
 hypoxia-induced release, heart, H147
 infusion, fetal responses to (lamb), R580
 inhibition, renin response to hypotension, R194
 natriuretic and diuretic effects of, awake state, F565
 neural stimulation of renin release and, E332
 plasma, hyperosmolality effects, fetus (sheep), E466
 regulation of sodium-potassium-chloride cotransport, endothelial cells, C36
 release
 atrial granularity and, diabetes, R932
 during isoproterenol and angiotensin II infusion, R896
 renal actions of, model, F1146
 renal responses
 chronic caval constriction and, R1057
 cirrhosis and, R1068
 experimental low-output heart failure, R917
Atrial natriuretic hormone, aldosterone and, salt-depleted state, E583
Atrial natriuretic peptide
 angiotensin-induced vasoconstriction and, H1062
 binding sites, lack of vasopressin effects, brain, R168
 blood flow and, cerebrum and choroid plexus, R1365
 circulating blood volume and, R127
 dependent effect of drinking volume on, R762
 endogenous, congestive heart failure and, R641
 fluid and protein shift and, transcapillary, R174
 hemodynamic actions of, renal hypertension, R365
 neural stimulation and, renin release, E332
 nitroprusside and, mesangial cell relaxation, C86
 plasma levels
 propranolol and pindolol effects, rest and exercise, R259
 vagotomy effects, during hemorrhage, R1393
 pressure natriuresis and, renin-angiotensin system interaction, R1169
 prostaglandin production and, renal medulla, F336
 rapid atrial pacing and, cardiac-denervated dog, R162
 receptors: *see* Receptors
 release, hypophysectomy and, R522
 renal action of, dopamine permissive role in, F300
 response
 central osmotic stimulation, E611
 hypervolemia, papillary necrosis, R422
 role in natriuresis, head-out immersion, F375
 secretory pathway, membrane cytochemistry of, H1587
 submandibular gland synthesis, cGMP secretion and, E675
 venous pressure and microvascular protein permeability, forelimb, H272
Atrial natriuretic polypeptide, antiserum against, spontaneous hypertension and, H1104
Atrial specific granule, membrane cytochemistry of, H1587
Atriopeptin
 blood flow and, cerebrum and choroid plexus, R1365
 fluid and protein shift and, transcapillary, R174
 hypoxia-induced release, heart, H147
 immunoreactive release, plasma (fish), R939
Atriopeptin II, natriuretic effects of, papillary necrosis and, F859
Atrioventricular conduction, vagal stimulation, Wenckebach arrhythmia and, H935
Atrioventricular node, conduction, vagal stimuli and, H812
Atropine
 cholinergic innervation, renal tissue, F746
 cutaneous vasodilation induced by, esophageal temperature during exercise and, R1089
 pancreatic secretion, vagally stimulated, CCK and, G944
Auerbach's plexus, somatostatin effects, intestinal motility, G532
Autonomic nervous system
 function, *m*-chlorophenylpiperazine effects, R1441
 modulation of response to norepinephrine, fetus (lamb), R574
 sympathetic stimulation, gastric oxygen uptake during, G633
 vagal stimuli, AV conduction and, H812
 vagal stimulation of bicarbonate, duodenum, G677
Autoradiography
 action of substance P, ileocecal sphincter region, G447
 β -adrenergic receptors, coronary collateral vessels, H1634
 aldosterone receptors, A6 cells, C665
 ANF binding sites, congestive heart failure, F515
 ANP binding sites, lack of vasopressin effects, brain, R168
 dopamine DA₁ receptors, kidney, F414
 quantitative, low-density lipoprotein distribution blood vessel walls (monkey), H452
Autoregulation
 cerebral blood flow, during hemorrhage, vasopressin effects, H1360
 pulmonary hypertension and, fetus (sheep), H626
 wall mechanics, arterioles, H1147
Autotransplantation, gastric, neural isolation effects on motility, G30
AV3V lesions: *see* Cerebral ventricles, anteroventral third

Awake state

- ANF infusion, natriuretic and diuretic effects, F565
- baroreceptor denervation effects, vasopressin and cortisol responses to angiotensin II infusion, R1175
- baroreflex sensitivity, volume expansion effects (monkey), R595
- calcitonin gene-related peptide, cardiovascular effects, R726
- carotid baroreflex responses, central venous pressure effects, H1389
- chronic portal venous hypertension, pressor responses in, G773
- coronary flow variations, cyclic, H873
- gastric blood flow, postprandial, G111
- head-up tilt, sympathetic renal nerve activity during, R337
- left atrial hypertension, pleural effusion formation and (sheep), H690
- PAF and BN 52021 effects, cardiac function and blood flow, H25
- plasma catecholamines and renal sympathetic nerve activity, during eating, R1034
- pulmonary vasodilation, vasopressin-induced, H415
- pulmonary vasoregulation, pentobarbital alteration of, H1140
- renal vasoconstriction, sensitive α_2 -adrenoceptor-mediated, F1132
- renin release, plasma epinephrine concentration effects, E57
- stabilized EDRF effects, coronary vasculature, H1895
- tissue pressure, head-out water immersion, R358
- volume expansion, renal nerve role in, awake state (lamb), R1519

B

Barium

- conductance, pH effects, hepatocytes, G961
- volume-regulatory potassium ion fluxes and, liver, G357

Basilar artery, smooth muscle, EDRF and nitric oxide effects, H1235

Basolateral membrane

- ileal epithelial cells, calcium channels in, G86
- intestinal cells, bicarbonate transport (salamander), C252
- long-chain fatty acids, mediated transport of, F539
- quinacrine effects on calcium active transport, G818
- renal, tetraethylammonium transport across, F243
- small intestine, lipid composition, G138

Basolateral membrane vesicles

- colonic, sodium-hydrogen antiporter in, G624
- proximal tubules, peptide YY receptors for, F978

BAY K 8644

- calcium increase and, mesangial cells, F1094
- endothelium and calcium, neurotransmission, H1871
- inhibition, ventricular sarcoplasmic reticulum, H407
- inhibition of rest potentiation, ventricular muscle, H399

Behavior

- ambient temperature effects, food costs and, R1328
- appetite, corticotropin-releasing factor in, R613
- cerebral oxidative metabolism, during perinatal period, R1251
- sexual, *m*-chlorophenylpiperazine effects, R1441
- sleep and fever induced by interleukin 1, corticotropin-releasing factor effects, R528

Benzodiazepines, airway dilation and, ventral surface of medulla, R810

Benzodiazepine analogues, gastrin and pancreatic CCK-receptor antagonists, G169

Betaine

- acute regulation of organic solutes, renal, F676
- distribution, diuresis and natriuresis, kidney, F602
- osmoregulatory fluxes, renal cells, C964
- response, salt loading, renal inner medulla, F1117

Bicarbonate

- p*-aminohippurate transport and, airway, C1108
- carbon dioxide recovery in breath, feeding effects, E426
- chloride channel blockers and, cortical collecting duct, C102
- chloride self-exchange and, cortical collecting duct, C94
- depletion, correction of metabolic alkalosis, F107
- distal tubular, neural control, F72
- duodenal, TRH-induced vagal stimulation, G677
- excretion, biliary, ursodeoxycholate-induced changes, G371
- glycogen pathways and, hepatic, E145, E158
- hypercapnia and, cerebral arterial response, H141
- partial hepatectomy, ureagenesis decrease and, F696
- permeability: see Permeability
- reabsorption
 - acetate effects, proximal tubules, F586
 - chronic hypocapnia and, renal cortical, F615
 - experimental Fanconi's syndrome and, F959
 - metabolic acidosis effects, proximal tubule, F35
- regulation, cytoplasmic pH, ciliary epithelial cells, C696
- secretion, duodenal apical membrane vesicles, G661
- transport
 - basolateral membrane of intestinal cells (salamander), C252
 - fetal pancreatic duct cells, C240
 - regulation, ileum, G607
 - α -type carbonic anhydrase, bladder (turtle), F1015

Bicarbonate ions

- postischemic recovery rates, brain, H1860
- transport, dynamic changes in plasma membrane area and (turtle), R973

Bifurcating network, regional myocardial flow heterogeneity, H1670

Bile

- cholesterol delivery to, liver (monkey), G644
- physicochemistry of, G1

Bile acids

- secretion, peptide YY release and, left colon, G715
- transport, liver, compartmental model, G210
- uptake, ursodeoxycholate-induced changes, G371

Bile ducts, secretory function, intrahepatic biliary epithelium, G124

Bile salts, vesicular secretion, G1

Biliary epithelium, intrahepatic, bile secretory function of, G124

Biliary tract, bicarbonate excretion, ursodeoxycholate-induced changes, G371

Bioelectric properties, modulation by substratum, alveolar type II cells, C678

Biopsy, muscle, after exercise, R451

Biosynthesis, β -subunit role, sodium-potassium-ATPase expression, oocytes (frog), C851

2',7'-Bis(carboxyethyl)-5,6-carboxyfluorescein

- active hydrogen secretion, alveolar epithelial cells, L438

pH dependence, parietal cell, G741

pH regulation

- cryptlike intestinal cell line, G732
- growth, renal cortical tubule cells, C419
- hepatoma cells, G317
- parietal cells, C554

- sodium-hydrogen exchange, myocytes from adult heart, C207

Bisoxazol, membrane potential changes, calcium ions and, lymphocytes, C197

Bivalve integument, marine, amino acid transport, R473

Bladder: see Gallbladder; Urinary bladder

Bleomycin

- damage induced by, DNA, intact cells, C882
- lung injury, experimental alveolitis, L379

Blockade

- α -adrenergic, species differences, R1110

β -adrenergic

- lipolysis during fasting, E65
- lung liquid secretion and, during fetal asphyxia (sheep), R705

- β_1 -adrenergic, glomerular dynamics and angiotensin II response from, F225

- atrioventricular, cardiovascular control in, awake state, H2048

calcium channel

- atriopeptin and plasma volume, R174
- hemorrhagic shock, R1012

- calcium ion influx, smooth muscle cells, C607

- endotoxin, calcium channels, smooth muscle cells, C875

- ethacizin, calcium channel, model, H1693

- lipoxigenase, angiotensin II-mediated vasoconstriction, H434

- neuromuscular, fetal (sheep), H734

- sensory nervous, responses to exercise and, E95

- synaptic, thermosensitive neurons in diencephalon, R65

- V₁-vasopressinergic, pulmonary vasodilation and, H415

Blood

- central mobilization, vasoconstriction and, H348
- chemistry
 - optical hemoglobinometer, H1306
 - oximeter measurement, H1705
 - constituents: see specific constituent
 - embryonic, decreasing pH, estimation by DMO, R542
 - transport of macromolecules, during peritoneal dialysis, H1851
 - volume: see Volume
- Blood-brain barrier
 - endothelin and vasopressin effects, H799
 - sodium appetite and thirst, dehydration (cow), R1212
 - stimulation of fastigial nucleus, cerebral blood flow and, H297
- Blood flow: see also Circulation; Microcirculation
 - adipose tissue, meal-related changes, R711
 - adrenal, during hypoxia, anesthesia and, H1458
 - adrenal medulla, reflex stimuli effects, H590
 - arteriolar oxygen reactivity, leukotriene antagonist effects (hamster), H1565
 - cerebral
 - adenosine and, H1656
 - atrioepit effects, R1365
 - chronic metabolic alkalosis effects, H1220
 - control during normoxia and hypoxia, fetus (sheep), H1132
 - during hemorrhage, plasma vasopressin effects, H1360
 - during perinatal period (lamb), R1251
 - facial nerve stimulation effects, R517
 - hemodilution effects, H912
 - hypoxia, chemodeneration effects (sheep), H1413
 - hypoxia and hypocapnia effects (duck), R127
 - ischemia effects, newborn (pig), H1917
 - postischemic recovery rates, H1860
 - stimulation of fastigial nucleus effects, H297
 - vascular response of dura mater, H157
 - choroid plexus, atrioepit effects, R1365
 - coronary
 - adenosine transport and (guinea pig), H89
 - L-glutamate stimulation of lateral hypothalamic area and, H540
 - hypoxia and 8-phenyltheophylline, H1043
 - NPY-induced constriction, cyclooxygenase blockers and, H927
 - reductions, thromboxane A₂ and serotonin mediation of, H873
 - regression of cardiac hypertrophy and, H1110
 - systolic impediment, contractility and, H1936
 - ventricular remodeling and, H1983
 - coronary collateral, reduced, increased myocardial infarct size and, H1798
 - determination, computerized curve fitting, G668
 - gastric, postprandial, awake state, G111
 - glucose transport, forearm, compartmental model, E943
 - intestinal, prostanoid regulation, G798

- measurements, radiolabeled microspheres, H280
- mesenteric
 - intravenous arginine vasopressin and, H658
 - PAF in, R872
- microvascular, experimental diabetes, H571
- muscle
 - during exercise, dipyridamole effects (swine), H1498
 - neural regulation during hypoxic hypoxia, H1581
 - norepinephrine spillover during exercise and, H1812
- myocardial
 - during infarct healing, H365
 - sequential topographical portrayal, H635
 - neurohypophyseal, during hemorrhage, baroreceptor control of, H1507
 - organ, control during normoxia and hypoxia, fetus (sheep), H1132
 - postischemic
 - fatty acid increases and, H1204
 - myocardial, fish oil effects, H1204
 - regional
 - calcium-channel blockade in hemorrhagic shock, R1012
 - chronic ethanol effects on hemorrhagic shock, H198
 - exercise, dobutamine effects, H954
 - hypothermia and, brain and spinal cord, H785
 - lower body negative pressure and, H219
 - PAF and BN 52021 effects, awake state, H25
 - postexercise dysfunction and, H113
 - skin, local iontophoresis of bretylium effects, H1599
- renal
 - activity, mental stress and epinephrine effects, F682
 - cyclosporine effects, F837
 - sympathetic nerve stimulation effects (monkey), F204
 - vasoconstriction, sensitive α_2 -adrenoceptor-mediated, F1132
- spinal cord, laser-Doppler flowmetry in measurement, H674
- tissue, transthoracic impedance after direct current shock, H1180
- umbilical, paralysis and, fetus (sheep), H734
- umbilical-placental, prostacyclin and angiotensin effects (sheep), E102
- uterine
 - angiotensin II effects, pregnancy (sheep), H17
 - fetal asphyxia and (sheep), R705
 - velocity, dilator response to, mesenteric arcading arterioles, H1958
- Blood pressure: see also Pressure
 - acidic renin and, stroke-prone hypertension, F275
 - adrenergic regulation, embryo (chick), H1900
 - after hemorrhage, newborn (lamb), R647
 - angiotensin II-mediated, inhibition by lipoxigenase blockade, H434
 - angiotensin II salt-dependent hypertension, H1402
 - angiotensin injection effects, brain stem, H324

arterial

- epinephrine and renin secretion, awake state, E57
- neural oscillations of, R804
- response to stress, μ -opioid peptide modulation of, R901
- stress immobilization effects, R661
- baroreceptor control, atrioventricular block and, awake state, H2048
- baroreceptor denervation effects, vasopressin and cortisol responses to angiotensin II infusion, R1175
- central effects of somatostatin, R588
- central nervous system lesions and, R80
- circulating vasopressin and, H209
- control
 - during pregnancy, central angiotensin II in, R1457
 - rostral ventromedial medulla, R635
- dynamic analysis, sinusoidal acceleration and, H511
- fastigial nucleus, axons of passage and, R1436
- high, maternal environment and, H1396
- 24-h recordings, high- and low-salt diets, R1225
- hypertension, linoleic acid infusion effects, H611
- mean arterial, volume expansion effects, awake state (monkey), R595
- measurement, high-fidelity manometers, H1312
- PAF and BN 52021 effects, awake state, H25
- response, central osmotic stimulation, E611
- spontaneous hypertension, antiserum against ANP, H1104
- stress-induced tachycardia, hypothalamic GABA receptors and, R246
- TRH specific effects, gastric motility, G454
- vasopressin-mediated recovery, synthetic capsaicin effects, R1429
- Blood vessels, walls, low-density lipoprotein transport in (monkey), H452
- BN 52021
 - cardiac function and blood flow with, awake state, H25
 - ischemia-reperfusion, mesenteric, R872
- Body
 - composition
 - CRF effects, sex dependency, R1417
 - orchidectomy and, training effects, R550
 - overfeeding in offspring of obese patients, E647
 - preweaning food intake effects (baboon), R1128
 - fluid: see Fluid
 - magnesium and manganese measurement, R1136
 - weight: see Weight
- Bombesin, inhibition of feeding, R1219
- Bone
 - normal weight bearing, after skeletal unloading, E606
 - sex hormones and, calcitonin and parathyroid hormone deficiency, E903
 - surface elements, ion microprobe analysis, 815
- Bradycardia
 - fasting-induced, heart rate spectral analysis of (cow), R1303
 - vagal baroreflex, somatosensory inhibition of, R829

- Bradykinin**
 afferent nerve activation, renal and mesenteric, R29
 aging and, coronary response, H988
 binding sites, changes and sodium and water intake effects, F353
 calcium release and, airway epithelium, L116
 intracardiac, spinal and spinoreticular neurons, H1543
 prostaglandin production and, renal medulla, F336
 protein kinase A, calcium and phosphate uptake and, proximal renal cells, F631
 protein kinase C activation of, cortical collecting tubular cells, F808
 pulmonary vascular surface, L53
 relaxation, coronary artery, H1096
 release, tracheal epithelia, L361
- Brain**
 angiotensin control, pressor action, structure-function analysis, R1551
 anoxic
 biochemical comparison (rat, turtle), R1083
 ion leakage (turtle), R1562
 ANP binding sites, lack of vasopressin effects, R168
 blood flow: see Blood flow
 blood vessels, endothelin and vasopressin effects, H799
 catecholamine levels, anoxia effects (carp), R10
 energy metabolism
 level of satiety, R1322
 parabiosis and, R224
 injury, energy metabolism, ion homeostasis, and evoked potentials (turtle), R854
 ion channel density, energy expenditure and (turtle, rat), R1354
 lesions, mortality and, F18
 microvascular reactivity, ischemia alteration of, newborn (pig), H266
 osmolytes, salt-loading and, F1108
 oxidative metabolism, during perinatal period (lamb), R1251
 pH recovery rates, postischemic, H1860
 plasma ANP and, vagotomy effects, during hemorrhage, R1393
 postocclusive hyperemia, chronic trigeminal ganglionectomy, H1736
 redox balance, hypoxia and hypocapnia effects (duck), R132
 sepsis, ³¹P-NMR spectroscopy, C1055
 synaptosomes, sodium-potassium-ATPase differences, E284
 thermosensitive neurons in diencephalon, R57
 diencephalon, synaptic blockade effects, R65
 veratridine-releasable pool in, high-affinity uptake of copper into, C315
- Brain stem**
 angiotensin injection into, cardiovascular effects of, H324
 neurons, regulation of ileal water absorption, G266
 responses to electrical stimulation, ventral vagal gastric fibers, G24
- Bretylium**, local iontophoresis of, abolition of cutaneous vasoconstrictor responses, H1599
- Brevetoxin**, energy expenditure and ion channels, brain (turtle, rat), R1354
- Bronchi**
 antigen challenge of, local mediator release, L366
 epithelium-dependent relaxation, oxygen pressure effects, C1034
 histamine release, cellular influx and, L277
 Bronchiolar epithelium, development of, brief perinatal hypoxia effects, L80
 Bronchoalveolar lavage, hyaluronan accumulation, pulmonary edema, alveolitis, L379
 Bronchoconstriction, cellular influx, histamine release and, L277
- Brown fat**
 DBP binding, during hibernation and arousal (squirrel), R536
 enhanced response to corticosterone, genetic obesity, E133
 gene expression in, cholera toxin effects, C920
 glucose transport, stimulation by insulin and norepinephrine, adipocytes, C714
 glucose uptake, fasting and cold effects, R96
 interscapular, sympathetic nerve activity, 2-deoxy-D-glucose effects, R1377, R1386
 lipoprotein lipase, short photoperiod and cold activation of (hamster), R1123
 mitochondria, chloride uniport pathways, C1142
 norepinephrine and denervation effects (hamster), R396
 obesity, adrenalectomy prevention of, E139
 responses to short days, regional differences (hamster), R1533
 surgical removal of, compensation by other depots, R253
 sympathetic nerve activities, tube feeding effects, E374
 thermogenesis, CRF effects, sex dependency, R1417
 thermogenic and trophic responses to cold, thyroxine role in, E81
 uncoupling protein and GDP binding, cold-induced changes, R292
- Brush-border membrane**
 duodenal, chloride-bicarbonate exchange and anion conductance in, G661
 electrogenic sodium-hydrogen transport, hepatopancreas, kinetic analysis (prawn), R484
 intestinal, amino acid transport, lepidopteran larvae, R494
 medullary, phosphate transport, pH gradient-stimulated (pig), F638
 nicotinamide analogue effects, cAMP, kidney tubules, F1021
 proximal tubule, PTH-induced translocation of sodium-hydrogen antiporter, C637
- renal**
 cAMP modulation of ionic permeability, F769
 cation channels, proximal tubule, F328
 inorganic sulfate excretion (teleost), R511
 D-mannose transport system, F1100
 sodium-glucose cotransport, F126
- sodium-glucose cotransporter, diabetes effects, C385
 small intestine, protein-lipid interactions, G809
- Brush-border membrane vesicles**
 intestinal
 amino acid transport (eel), R506
 calcium transport, theophylline inhibition of, G935
 calcium uptake, F446
 sodium-dependent L-glutamate transport (eel), R180
- jejunal**
 glutamine transport in, G80
 taurine transport in, G65
- renal**
 low-affinity transport of pyroglutamyl-histidine, C971
 phosphate reabsorption during development (guinea pig), F268
- Bumetanide**
 sodium absorption, across labyrinthine epithelium, F182
 sodium and chloride transport, gallbladder (pig), C45
 volume-regulatory potassium ion fluxes and, liver, G357
 water and chloride permeability, papillary surface epithelium, F218
- Burns**, mediating protein catabolism in, insulin and glucose role in, E323
- Butanol**, ¹⁴C-labeled, distribution, brain and spinal cord, H785
- t-Butylhydroperoxide**, sublethal injury, inhibition of signal transduction and, type II pneumocytes, L217
- Bypass: see also Shunt**
 reduced thrombogenicity, ePTFE vascular grafts, H1076
- C**
- Cachectin**, lung injury induced by, platelet-activating factor and, L232
- Cachexia**, interleukin 1 and, R1315
- Caffeine**
 calcium release induced by
 aorta, C413
 cardiac myocytes, C147
 inhibition of rest potentiation, ventricular muscle, H399
 norepinephrine interactions, calcium role in, cardiac Purkinje fibers, H226
 sarcoplasmic reticulum, ventricular myocytes, H1369
- Calbindin D28k**, renal calcium-binding protein, overview, F707
- Calcification**, shell formation, uterine fluid composition during (chicken), R732
- Calcitonin**
 calcitonin gene-related peptide and, renal effects, E848
 calcium ion response to, tubule cells, F724
 early distal convoluted tubules, F288
 sex hormones, bone conservation and, E903
- Calcitonin gene-related peptide**
 calcitonin and, renal effects, E848
 cardiovascular effects, awake state, R726
- Calcitriol**, epithelial cells, duodenal, G760
- Calcium**
 active transport, quinacrine and, intestinal epithelium, G818

- β -adrenergic regulation, airway epithelium, L125
 bidirectional flux, aluminum effects, intestine, G433
 blood ionized, chronic metabolic alkalosis, E578
 bone, simulated weightlessness effects, R1103
 cellular, adenine nucleotide inhibition of, E505
 cobalt action and, neutrophils, C859
 concentration
 cytosolic, carbachol effects, fundic D-cells, G308
 intracellular, vasopressin-induced water transport and, F524
 content, sarcoplasmic reticulum, ventricular myocytes, H1369
 cytoplasmic free, response in tubule cells, F724
 cytosolic

 potential-dependent, afferent and efferent arterioles, F561
 renal transport, overview, F707
 slow, uterine muscle cells, pregnancy and, C408
 voltage-dependent, brain biochemistry, species differences (rat, turtle), R1083
 voltage-sensitive
 calcium modulation and, mesangial cells, F1094
 endotoxin blockade of, smooth muscle cells, C875
 Calcium channel blockers
 intravascular volume and, limb, H1049
 vitamin D metabolism and, E632
 Calcium currents
 catecholamine modulation of, clonal pancreatic β -cells, C1171
 characteristics of, pituitary gonadotrophs, C865
 delayed rectifier, autonomic regulation of, heart, H818
 electrical activity and, colon, C451
 whole cell, D 600 block, vascular smooth muscle cells, C689
 Calcium ionophore
 ear artery contraction and, H649
 EDRF and, femoral vein, H1910
 Calcium ions
 absorption, cortical proximal tubules, F262
 influx
 agonist- and depolarization-induced, blockade of, smooth muscle cells, C607
 renal mesangial cells, F431
 intracellular
 arachidonic acid effects, pituitary cells, E203
 ear artery contraction, H649
 laser backscatter studies, heart, H665
 relaxation and, tracheal smooth muscle, C355
 mobilization, arterial smooth muscle (swine), C122
 potassium channels activated by, thick ascending limb, F347
 regulation of protein phosphorylation, parietal cells, G99
 requirement, secretagogue effects, gastric mucosa (toad), G969
 transient, voltage and beat dependence, ventricular myocytes, H746
 transport, sarcolemmal, cardiac hypertrophy, H349
 Calcium-magnesium-ATPase, placental membrane, C341
 Calcium oxalate
 monohydrate crystal aggregation, inhibition by urine proteins, F99
 production, renal proximal tubule cells, F390
 Calcium transients
 ATP receptor-induced, cardiac myocytes, C750
 energy depletion-repletion and, cardiomyocytes, C427
 free, hyperthyroid cardiomyocytes, C948
 Calmodulin
 transcellular calcium transport, intestine, G935
 U 46619 and prostaglandin vasoconstriction, lung, H2001
 Calorimetry
 indirect
 dopamine effects, healthy men, E541
 glucocorticosteroid effects, E712
 glucose-stimulated insulin secretion, bed rest effects, E43
 overfeeding in offspring of obese patients, E647
 time-dependent FFA-glucose interaction, E49
 cAMP: see Adenosine monophosphate, cyclic
 Capacitance
 pressure-volume responses, estrogen (guinea pig), R1205
 vascular, in systemic circulation, lung inflation effects, R1004
 vasculature, verapamil effects, H1049

- Capillaries
density, postnatal changes in, sterno-
mastoid muscle, H344
morphometry, fetal, neonatal, and adult
(sheep), H1
recruitment, carbon dioxide reactivity,
ischemic, border zone, and normal
cortex, H473
Capillary reflection coefficients, estima-
tion, H1036
Capsaicin
intracardiac, spinal and spinoreticular
neurons, H1543
neuron response to circulating CCK and,
hindbrain, R1162
synthetic, vasopressin-mediated blood
pressure recovery and, R1429
Captopril
hemodynamics of ANP and, renal hyper-
tension, R365
maximal coronary flow, regression of
cardiac hypertrophy and, H1110
sodium appetite and, dehydration (cow),
R1212
Carbachol
cytosolic calcium concentration and,
fundic D-cells, G308
cytosol induced by, free calcium in-
creases in T84 colonic cells, G950
downregulation induced by, high-affinity
receptors for VIP, G402
intracellular calcium and myosin phos-
phorylation, tracheal smooth mus-
cle, C1062
intracerebroventricular, rapid activation
of gluconeogenesis after, E486
posterior hypothalamic injection, mecha-
nism of pressor response to, H791
protein phosphorylation induced by, pa-
rietal cells, G99
Carbenoxolone, glucocorticoid metabolism
and, bladder (toad), F700
Carbidopa, renal action of ANP and, dur-
ing volume expansion, F300
Carbohydrates
metabolism
calcium requirement, gastric mucosa
(toad), G969
vascular smooth muscle, C736
overfeeding, protein turnover and, E413
thermogenesis induced by, epinephrine
effects, muscle, E340
Carbon dioxide
chloride channel blockers and, cortical
collecting duct, C102
chloride self-exchange and, cortical col-
lecting duct, C94
isotopic dilution, during substrate oxida-
tion studies, E296
mitochondrial, renal glucose synthesis,
E791
pattern, upper airway, effects on ventila-
tory urgency (lizard), R156
production, doubly labeled water method
(sheep), R1488
reactivity, cerebral blood flow, in ische-
mia, H473
recovery in breath, feeding effects, E426
Carbonic acid, chloride self-exchange and,
cortical collecting duct, C94
Carbonic anhydrase
mitochondrial, renal glucose synthesis,
E791
 α -type, NBD-taurine uptake and, blad-
der (turtle), F1015
Carbonic anhydrase inhibitors, basolateral
base transport and, proximal
straight tubule, F947
Cardiac arrest, arteriovenous disparity, cir-
culatory failure, F1087
Cardiac cells: *see also* Atrial cells;
Cardiomyocytes; Heart cells;
Myocytes; Ventricular cells
lidocaine binding site for, second, H79
Cardiac enzymes, function, long-term hy-
poxemia, fetus (sheep), H581
Cardiac output
angiotensin II salt-dependent hyperten-
sion, H1402
ANP and angiotensin effects, H1062
calcitonin gene-related peptide effects,
awake state, R726
control of organ perfusion, during hy-
poxia, fetus (sheep), H1132
distribution, alterations in, experimental
diabetes, H571
dopamine effects, oxygen consumption,
healthy men, E541
during exercise, dipyrindamole effects
(swine), H1498
dynamic exercise, senescence and, H1428
L-glutamate stimulation and, lateral hy-
pothalamic area, H540
intravenous arginine vasopressin and,
H658
long-term hypoxemia and, fetus (sheep),
H581
measurement, R439
response to angiotensin II, pregnancy
(sheep), H17
sinoaortic denervation and, vasopressin
effects, R1
spontaneous hypertension, antiserum
against ANP, H1104
vascular contributions, hypotension,
spinal injury, H1347
Cardiac tamponade, hypoxemia and, cir-
culatory responses during, H726
Cardiomyocytes: *see also* Atrial cells;
Cardiac cells; Heart cells; Myocytes;
Ventricular cells
calcium transients, energy depletion-re-
pletion and, C427
contractile function, response to viscous
loading, H1717
diabetic, phosphorylase synthesis in, E74
hyperthyroid adult
action potentials and calcium tran-
sients in, C957
adrenergic response in, C948
plasma membrane-specific deficiency, di-
abetes, E127
Cardiomyopathy
ANF binding sites, congestive heart fail-
ure, F515
diabetic
cardiac β -adrenergic receptors in,
E127
creatine kinase enzyme activity and
mRNA level, E573
mechanical and electrical properties
(hamster), H1836
Cardiopulmonary interactions, intratho-
racic pressure effects, H120
Cardiorespiratory interaction, chemorecep-
tor effects, sympathetic activity,
R1027
Cardiovascular regulation
dynamic analysis, sinusoidal acceleration
and, H511
RVLM neurons, CVLM inhibition of,
R265
Cardiovascular response
ANF infusion, fetus (lamb), R580
exercise, hypothalamic influences on,
H1247
feeding, newborn (lamb), R568
norepinephrine, modulation by auto-
nomic nervous system, fetus (lamb),
R574
Carotid artery
cavernous, reactivity to stretch and adre-
nergic stimulation, R1335
endothelium and calcium, neurotrans-
mission, H1871
nonmuscle myosin light chain expres-
sion, smooth muscle (swine), C997
Carotid body
blood flow, control, fetus (sheep), H1132
glomus cells, chloride channels in, C174
Carotid sinus
baroreflex, input signal size, H465
prostaglandins in, baroreflex enhance-
ment, R445
Castration: *see* Orchidectomy
Catalase
lethal cell injury and, hepatocytes, C347
reperfusion injury, leukocyte role in,
skeletal muscle, H1068
thyroid hormone inhibition, lung, fetus,
L94
Catecholamines
activity, after hemorrhage, paraventricu-
lar hypothalamus, R370
anoxia effects, brain and kidney (carp),
R10
blood glucose turnover and, during exer-
cise, E405
calcium current modulation, clonal pan-
creatic β -cells, C1171
carbohydrate-induced thermogenesis
and, skeletal muscle, E340
conjugated, response to hypoxia, fetus
(sheep), E198
hormonal responses, exercise, E95
hypoxia, adrenal blood flow and se-
cretory relations, anesthesia and,
H1458
hypoxia-induced ANF release and, heart,
H147
kinetics, plasma clearance and, E743
maternofetal potential difference (pig),
R37
plasma
eating and, renal sympathetic nerve
activity and, R1034
hemorrhagic hypotension and, liver,
R317
increase in concentration, renin re-
lease and, awake state, E57
oxygen consumption and, healthy
men, E541
portal and mesenteric veins and, portal
hypertension, G977
regulation of angiotensin II, neuronal
cultures, C706
Cathepsin D, maturation, cysteine protease
inhibitor effects, C1069
Catheter
ablation, voltage and charge effects,
myocardium, H1534
micromanometer-tipped, introducer
sheath for, H1312
Catheterization, cardiac, pacing stress ef-
fects, E309

- Cations
 organic, secretion, renal basolateral membrane, F243
 transport, urinary bladder (crab), R501
 voltage-activated transport, erythrocytes, C986
- Cation channels, sweat gland cells, C129
- Caudal ventrolateral medulla, chemical stimulation of, neurons in rostral VLM and, R265
- Caudate nucleus, copper release from, C315

- Collateral flow, increased velocity, dilator response of mesenteric arcading arterioles, H1358
- Colon
basolateral membrane vesicles, sodium-hydrogen antiporter in, G624
brush-border hydrolases, perinatal expression, G496
distal, leukotriene effects on motility, G860
electrical activity, participation of calcium currents, C451
electroneutral sodium chloride absorption, low dose glucocorticoid effects, F1027
interstitial cells of Cajal, pacemaker activity recorded, C830
left, deoxycholate-stimulated release of peptide YY, G715
motor activity, prolonged ambulant monitoring of, G601
motor response, feeding, G830
proximal, epithelial cell apical membranes, IGF-I receptors on, E27
Colonic cells, T84, free calcium increases in, carbachol-induced cytosol, G950
- Colorimetry, continuous flow quantitation, sodium and potassium ions, F893
- Comparative physiology
renal, membrane dynamics in proximal tubules (snake), R982
sodium chloride and water transport, Henle's loop (quail), F994
- Compartmentalization
body fluid, osmoregulation and, dehydrated heat exposure (pigeon), R377
gastric hydrogen-potassium-ATPase, G539
- Compliance
aortic, hypertension and, H553
arterial resistance and, during transient conditions, H190
pressure-volume responses, estrogen (guinea pig), R1205
pulmonary vascular, histamine effects, H618
vascular, vasopressin effects, H1228
- Computer analysis, sodium-glucose transporter, renal, diabetes effects, C385
- Converting-enzyme inhibitor, hemodynamic actions of ANP and, renal hypertension, R365
- Copper
deficiency, microvascular responses, H1607
high-affinity uptake, veratridine-releasable pool, brain tissue, C315
- Copulatory stimuli, ovarian development and (snake), R1548
- Cornea, epithelium, chloride uptake in, C290
- Coronary artery
ACh relaxation, H1096
constriction
neuropeptide Y, cyclooxygenase blockers and, H927
ventricular remodeling and, H1983
contraction, endothelin-induced (pig), H1828
differential sensitivity to endothelin, H1127
function, endothelium regeneration effects, H1681
hyperpolarization, adenosine receptor-mediated, H1750
left circumflex, EDRF release effects, H330
reperfusion, nonuniform transmural recovery of stunned myocardium, H375

- resistance: *see* Resistance
response to vasoactive substances, aging and, H988
stenosis, thromboxane A₂ and serotonin mediation of, H873
Coronary collateral vessels, β -adrenergic receptors on, H1634
Coronary dilation, epicardial, stabilized EDRF effects, H1895
Coronary endothelium, anoxia-reoxygenation, resistance to (guinea pig), H488
Coronary flow
maximal, regression of cardiac hypertrophy and, H1110
stabilized EDRF effects, awake state, H1895
systolic, impediment, variable elastance concept, H1471
Coronary hemodynamics, myocardial metabolism and, pacing stress, E309
Coronary occlusion
autonomic response to, animals susceptible to ventricular fibrillation, H1886
baroreflex inhibition during, prostaglandins and, R216
increased myocardial infarct size and, H1798
oxygen requirements, dyskinetic myocardium, H1184
reperfusion and, myocardial blood flow during infarct healing, H365
Coronary ring, relaxation and reperfusion, superoxide dismutase and U 63557A effects, H1240
Coronary vasculature, stabilized EDRF effects, awake state, H1895
Corticoids, perinatal expression, colon, G496
Corticosteroids
alveolar dimension and number, L240
integral feeding effects, control of ACTH, R427
receptors: *see* Receptors
response, repeated small hemorrhage, R118
Corticosterone
enhanced acute response, genetic obesity, E133
genetic hypertension and, H506
metabolism, bladder (toad), F700
obesity, adrenalectomy prevention of, E139
specificity, steroid metabolism and, bladder, F690
Corticotropin, control by steroids, R427
Corticotropin-releasing factor
ACTH response to, cold acclimation and, E336
anorexia, induced by interleukin 1, R613
attenuation, interleukin 1-induced sleep and fever, R528
energy balance and, sex dependency, R1417
response to hypoglycemia, brain-pituitary-adrenal, E757
Cortisol
calcitropic actions of prolactin and (eel), R74
glucose counterregulation and, during hypoglycemia, E35
metabolism, bladder (toad), F700
response, repeated small hemorrhage, R118
response to baroreceptor denervation, angiotensin II infusion effects, R1175
secretory burst, circadian glucocorticoid rhythm, E6
vasopressin response and, hypertonic saline, fetus (sheep), R861
Coupling
cell, postprandial changes in intestinal slow-wave propagation, G463
electrical
gap junctions between pairs of hepatocytes, C1
impulse propagation and, Purkinje fibers (sheep), H179
excitation-contraction
agonist-activated rubidium, aging effects, H494
calcium ion transients, ventricular myocytes, H746
calcium release from SR, skeletal muscle, C504
extracellular calcium buffering, heart, H1843
sarcoplasmic reticulum function, C781
ventricular myocardium, H2036
oxidative metabolism-contraction, phosphocreatine and, aorta, H597
stimulus-secretion
cholinergic receptors in chief cells, G226
pancreatic response to CCK, hydrocortisone effects, G364
Creatine, total content, muscle phosphocreatine kinetics and, C1149
Creatine analogue, isomyosin transition and, muscle, C810
Creatine kinase, enzyme activity, diabetes effects, heart, E573
Cremaster muscle, microvascular responses, copper deficiency, H1607
CRF: *see* Corticotropin-releasing factor
Cryobiology, freezing-induced changes, heart rate (frog), R1046
Crypt-villus axis, intestine, secretagogue effects, G334
Currents
membrane, smooth muscle cells, pregnancy myometrium, C297
outward, colonic myocytes, C461
short-circuit, bicarbonate transport regulation, ileum, G607
transient outward, repolarization in atrium and, H1773
CVLM: *see* Caudal ventrolateral medulla
Cyanidanol, lethal cell injury and, hepatocytes, C347
Cyanide
chloride self-exchange and, cortical collecting duct, C94
respiration in Clone 9 cells and, glucose transport response, C19
toxicity, hepatocytes, C435
Cyclamate, membrane effects, gallbladder epithelium (guinea pig), C766
Cycloheximide, synthesis, insulin resistance of, skeletal muscle, E418
Cyclooxygenase
carotid sinus, baroreflex and, R445
inhibition, pulmonary vasoconstrictor response, pentobarbital effects, H1140
release, tracheal epithelia, L361
Cyclooxygenase blockers, alleviation, coronary constriction due to neuropeptide Y, H927
Cyclosporine, mitochondrial function, blood flow and, renal, F837
Cysteine, oxidation, oxidant-injured cardiac muscle, H1321
Cysteine protease inhibitors, cathepsin D maturation and, C1069
Cystic fibrosis
gene, search for, L47
sweat duct cells
altered electrical potential profile in, C722
ion channels in, C129
sweat duct epithelium, chloride conductance in, C727
VIP and receptors with, fetus, G561
Cytochalasin, metabolism, training effects, adipose cells, E520
Cytochalasin B
binding, insulin-resistant uremia, E193
transport, skeletal muscle membrane vesicles, exercise, C1128
Cytochemistry, membrane, atrial peptide secretory pathway, H1587
Cytochrome c, running and mRNAs, skeletal muscle, C936
Cytochrome-c-oxidase
brown fat, norepinephrine and denervation effects (hamster), R396
cholera toxin effects, gene expression in brown fat, C920
Cytochrome oxidase
activity, hibernation and arousal (squirrel), R536
surgical removal of brown fat, compensation by other depots, R253
Cytodifferentiation, lung development, L311
Cytometry, flow, after pneumonectomy, C528
Cytoskeletal, renal tubular epithelium, F913
Cytosol, carbachol-induced, free calcium increases in T84 colonic cells, G950

D

- D 600, block of L-type calcium channel, vascular smooth muscle cells, C689
Dantrolene, tension potentiation, skeletal muscle, C1012
Deconvolution, cortisol secretion, circadian glucocorticoid rhythm, E6
Deferoxamine, endothelial injury, intracellular iron and hydroxyl radical role in, H1640
Dehydration
interstitial exclusion of albumin during, dermis and subcutis, H1819
platelet vasopressin receptors, homologous regulation of, R1400
responses, heat exposure, aging and, R1050
sodium appetite and thirst (cow), R1212
thermoregulatory sweating, exercise in the heat, R311
Denervation, norepinephrine and, brown fat (hamster), R396
Deoxycholate, peptide YY release stimulated by, left colon, G715
Deoxycorticosterone, genetic hypertension and, H506
Deoxycorticosterone acetate
ANF and, chronic heart failure, H739
hypertension, urinary clearance of lysine vasopressin and (pig), R1467

- Deoxyglucose
sodium-independent transport, LLC-PK₁ cells, F11
transport, LLC-PK₁, renal mutant cells, F1039
uptake, heart, exercise training effects, H839
- 2-Deoxyglucose
brain biochemistry, species differences (rat, turtle), R1083
uptake
fasting and cold effects, R96
tube feeding, brown fat, E374
- 2-Deoxy-D-glucose
hexose accumulation, adipocytes, C214
injection to lateral hypothalamus, suppression of sympathetic activity, R1386
suprachiasmatic nucleus activation, during hibernation cycle (squirrel), R605
sympathetic nerve activity and, intercapillary brown fat, R1377
- Deoxyribonucleic acid
bleomycin-induced damage, augmentation of, intact cells, C882
diabetes, white adipose tissue regression, E547
diagnosis, search for cystic fibrosis gene, L47
endoreduplication, vascular smooth muscle cells, H1755
gastric and duodenal mucosal, induction during stress, G259
pH effects on growth, renal cortical tubule cells, C419
synthesis, putrescine stimulation of, intestinal epithelial cells, G145
- Depolarization
anoxic, energy metabolism, ion homeostasis, and evoked potentials (turtle), R854
endotoxin blockade, voltage-sensitive calcium channels, smooth muscle cells, C875
potassium-chloride-induced, afferent and efferent arterioles, F561
- Dermis, interstitial exclusion of albumin, over- and dehydration, H1819
- Desferrioxamine, lethal cell injury and, hepatocytes, C347
- Detrusor muscle, spontaneous contractions, bladder, R781
- Development: *see also* Growth; Maturation
adrenergic regulation, embryo (chick), H1900
brush-border hydrolases, colon, G496
fetal, vasopressin response to saline, cortisol effects (sheep), R861
fluid secretion and microvillar structure, Malpighian tubules (mosquito), R1096
gastric mucosa, response to hydrogen, epidermal growth factor effects, G851
GH-releasing factor inhibition of, renal, F29
high blood pressure, maternal environment effects, H1396
hypoglycemia, brain-pituitary-adrenal response to, E757
lipid composition and fluidity, intestinal basolateral membrane, G138
lung
fatty acid biosynthesis, fetus, L195
immunotargeting, L311
muscle fiber-type composition, E823
regulation of dimension and number, alveoli, L240
renal
phosphate reabsorption during (guinea pig), F268
renin mRNA distribution, fetus and newborn, F850
structure and propagation, cardiac muscle, H1446
- Dexamethasone
acetylcholine-induced current and, chromaffin cells (guinea pig), C906
alveolar dimension and number, L240
hypoxia, adrenal blood flow and secretory relations, anesthesia and, H1458
inorganic sulfate excretion relations, renal (teleost), R511
lipid composition and, microvascular endothelial cell, C512
stimulation of surfactant protein A synthesis, postnatal, L137
stimulation, plasma inactive renin, E879
- Dextran 40, interstitial fluid pressure measurement, ileum, H62
- Dextran, sieving, angiotensin II effects, F608
- Diabetes
 α -adrenoceptors and insulin release, pancreatic islets, E439
creatine kinase enzyme activity and mRNA level, heart, E573
eicosanoid release, renal vascular responses to, F762
experimental
distribution of cardiac output in, H571
microvascular reactivity in, H1438
impaired production of nerve growth factor, submandibular gland, E400
insulin action in, sepsis-induced changes, E301
ion transport and cell growth, sodium effects, kidney, F1
phosphorylase synthesis in, hepatocytes and cardiomyocytes, E74
streptozotocin
plasma membrane-specific deficiency in β -adrenergic receptors, E127
renal response to volume expansion and, R672
type II, glucose output, liver, E531
white adipose tissue regression in, E547
- Diabetes mellitus
aortic contraction, endothelium-derived PGH₂-TxA₂, H1327
atrial granularity, ANF release and, R932
oral vanadyl sulfate treatment of, H904
- Diacylglycerol
bradykinin activation of protein kinase C, cortical collecting tubular cells, F808
retrograde myoelectric activity and, ileum, G578
- Dialysis
intracellular, cardiac Purkinje cells, C1086
peritoneal, macromolecular transport during, H1851
- Diarrhea
intestinal motility preceding, *Escherichia coli* enteric infection, G725
jejunum and ileum, *E. coli* enterotoxin, G118
- Diastole
changes, transient, ventricular filling, effects on performance, H305
dynamic twist-shortening relations, left ventricular, H1119
function, asynchronous wall motion, left ventricular relaxation and, H883
- Diazoxide, ATP_i-sensitive potassium channels, pancreatic B-cells, C1119
- 5-Dichlorodiphenylamine-2-carboxylic acid, chloride channel blockers and, cortical collecting duct, C102
- 2',7'-Dichlorofluorescein, lethal cell injury and, hepatocytes, C347
- Dicyclohexylcarbodiimide, hydrogen secretion and, collecting duct cells, F487
- Diencephalon
thermosensitive neurons in localization, R57
synaptic blockade effects, R65
- Diethyl maleate
glutathione response to, erythrocytes and, L272
oxygen and glutathione, endothelial cells, L265
- Diffusion barrier, intramural, arteriolar smooth muscle response (hamster), H10
- Digestive enzymes, colon, G496
- Dihydro-4,4'-diisothiocyanostilbene-2,2'-disulfonic acid, pH regulation and, hepatoma cells, G317
- Dihydroxyphenylglycol, neuronal uptake and, saphenous vein, H1945
- 1,25-Dihydroxyvitamin D₃: *see* Vitamin D₃
- 4,4'-Diisothiocyanodihydrostilbene-2,2'-disulfonic acid
pH regulation, parietal cells, C554
reversible inhibition, chloride self-exchange, erythrocytes, C601
- DIDS: *see* 4,4'-Diisothiocyanostilbene-2,2'-disulfonic acid
- 4,4'-Diisothiocyanostilbene-2,2'-disulfonic acid
CCK processing and, hepatocytes, G242
hydrogen secretion and, collecting duct cells, F487
ionic permeability and, nonpolarized cell, F985
sodium-bicarbonate cotransport, parietal cells, G350
volume-regulatory potassium ion fluxes and, liver, G357
- Dilation, flow-dependent, mesenteric arching arterioles, H1958
- Diltiazem
calcium transients and, vascular smooth muscles, H563
cholesterol effects and, calcium channels, arterial smooth muscle, C306
- Dimethyl amiloride, sodium absorption, across labyrinthine epithelium, F182
- 5,5-Dimethylloxazolidine-2,4-dione, transplacental distribution of, estimation of decreasing pH, embryos and fluids, R542
- Dipalmitoyl phosphatidylcholine, lung surfactant, historical perspectives, L1
- Dipeptides
metabolism, parenteral nutrition, E228
transport, renal brush-border membrane vesicles, C971

- Diphenhydramine, vascular resistance and compliance and, pulmonary, H618
- Diphenylamine-2-carboxylic acid, chloride channel blockers and, cortical collecting duct, C102
- 1,3-Dipropyl-8-cyclopentylxanthine, adenylate cyclase activity and, ventricular myocyte membrane, H1088
- 3,3'-Dipropylthiadicarboxycyanine iodide, electrogenic sodium-hydrogen exchange, membrane vesicles, gill (crab), R924
- Dipyridamole
adenosine concentration and, heart (guinea pig), H89
blood flow during exercise and, muscle (swine), H1498
- Direct current shock, transthoracic impedance after, H1180
- Disulfonic stilbenes
acid-base transport mechanisms, proximal tubule, F790
bicarbonate transport and, basolateral membrane of intestinal cells (salamander), C252
- Dithiothreitol, contractile function and, oxidant-injured cardiac muscle, H1321
- Diuresis
diabetes, renal response to volume expansion and, R672
fluid secretion and microvillar structure, Malpighian tubules (mosquito), R1096
organic osmolyte distribution in, kidney, F602
- Diuretics, loop, corneal epithelium, C290
- Diving, expired air temperature, thermoregulatory control of (seal), R306
- DMO: see 5,5-Dimethylloxazolidine-2,4-dione
- DNA: see Deoxyribonucleic acid
- Dobutamine
cardiovascular effects, exercise, H954
myocardial isometric dynamics, global model, H1275
- DOCA: see Deoxycorticosterone acetate
- Docosahexaenoic acid, postischemic blood flow, myocardial necrosis and, H1204
- Domperidone, aldosterone secretion and, E588
- Dopamine
anoxia effects, brain and kidney (carp), R10
antagonism, central and peripheral, aldosterone secretion and, E588
intrarenal, renal function and, F469
oxygen consumption and delivery, healthy men, E541
permissive role, renal action of ANP in volume expansion, F300
receptor: see Receptors
renal, activity, mental stress and epinephrine effects, F682
- DOPEG: see Dihydroxyphenylglycol
- Dorsal medulla, angiotensin injection into, cardiovascular effects of, H324
- Dorsal motor nucleus, angiotensin injection into, cardiovascular effects of, H324
- Dorsal raphe nucleus, single-unit response, serotonergic neurons, R1345
- Dose-response relations
calcium and histamine, arterial smooth muscle (swine), C122
plasma glucose and insulin secretion, bed rest effects, E43
sigmoidal curves and, G982
- Drinking
osmoregulation, vasopressin release and, pregnancy, F159
rehydration, during heat exposure, aging effects, R1050
sodium appetite and, dehydration (cow), R1212
volume, vasopressin and ANP, R762
- Ductus arteriosus, partial compression effects, pulmonary circulation, fetus (sheep), H626
- Duodenal mucosa
induction of ornithine decarboxylase, stress, G259
permeability, hydrochloric acid effects, G653
- Duodenectomy, interdigestive pancreatic secretion, gastrointestinal motility, and hormones, G415
- Duodenogastric reflux, transpyloric motility, fluid movements and, G198
- Duodenum
apical membrane vesicles, chloride-bicarbonate exchange and anion conductance in, G661
bicarbonate, TRH-induced vagal stimulation, G677
enterocytes, calcium uptake by, F574
epithelial cells, vitamin D₃ and glucose-6-phosphate dehydrogenase in, G760
epithelium, quinacrine effects on calcium active transport, G818
everted sacs, bidirectional calcium flux, aluminum effects, G433
transcellular calcium transport, theophylline inhibition of, G935
- Dura mater, vascular response of, H157
- E**
- Ear, central artery, calcium ionophore and contraction, H649
- Echocardiography, nonlinear mechanics, swinging heart, H1292
- Edema
ANF effects
chronic caval constriction and, R1057
cirrhosis and, R1068
pulmonary
cAMP and sodium transport, L86
left atrial hypertension and, awake state (sheep), H690
lung accumulation of hyaluronan and, L379
lysophosphatidylcholine effects, H1466
oleic acid, mathematical model, H1287
tissue, transthoracic impedance after direct current shock, H1180
vascular endothelial, TNF and interleukin 1 α , L399
- EDRF: see Endothelium-derived relaxing factor
- EDTA, ⁵¹Cr-labeled, clearance, duodenal and jejunal mucosa, G653
- Eicosanoids
glomerular, aminonucleoside nephrosis and, F798
metabolism, mucosal, ischemia-reperfusion injury and, G299
production, peptide-responsive, intestine, G879
release, renal vascular response and, diabetes, F762
- tumor necrosis factor-induced lung injury and, L232
- Eicosapentaenoic acid
fish oil effects, gastric mucosal prostaglandins, G9
postischemic blood flow, myocardial necrosis and, H1204
- Elastance
cardiac, long-term evaluation of ventricular performance, H70
coronary systolic flow impediment, H1936
variable concept, coronary systolic flow impediment, H1471
- Electrical activity, ACh effects, coronary artery, H1096
- Electrical properties, early distal convoluted tubules, F288
- Electrocardiography
contractility, cardiomyopathic heart (hamster), H1836
nonlinear mechanics, swinging heart, H1292
- Electrodes, extracellular array, arrhythmias, H681
- Electroencephalography, sleep and fever induced by interleukin 1, corticotropin-releasing factor effects, R528
- Electrolytes
bile, secretory function, G124
changes, sodium-potassium pump, papillary muscle, H942
distribution, calcium-channel blockade in hemorrhagic shock, R1012
excretion, ANP effects, forelimb, H272
transport
neurally mediated, ileum, G191
preceding diarrhea, enteric infection, G725
two-nephron central core model, renal medulla, F399
- Electrophoresis, myosin, creatine-depleted muscle, C810
- Electrophysiology
cardiac, isoproterenol activation of chloride current, C1177
cardiomyopathic heart, mechanical and electrical properties (hamster), H1836
cold temperature effects, esophageal circular muscle, G637
heart, autonomic regulation, H818
interstitial cells of Cajal, gastrointestinal tract, C830
left ventricular free wall traction effects, intact heart, H1211
micturition reflexes, R410
potassium current, PC-12 pheochromocytoma cells, C1030
structure and propagation, cardiac muscle, H1446
- Embryo
calcium, phosphorus, and magnesium mobilization (alligator), R1541
cardiac development, increased pressure effects (chick), H55
fluids and, decreasing pH of, R542
uterine fluid composition, during shell formation (chicken), R732
- Emphysema, α_1 -antitrypsin gene and, L147
- Enalapril, ANP and natriuresis, head-out immersion, F375
- Encephalopathy, examination, ³¹P-NMR spectroscopy, C1055

- Endocardium, modulation of inotropic response to 5-HT, myocardium, H1790
- Endocrine response, ANF infusion, fetus (lamb), R580
- Endocrine signals, episodic, false-positive and false-negative errors, E88
- Endocytosis
- insulin, degradation, kidney epithelial cells (opossum), E895
 - intrinsic factor, cobalamin absorption mediated by, G344
 - kidney cells (opossum), C190
 - phenylarsine oxide inhibition of, hepatocytes, C182
 - regulation of water permeability, renal epithelia, C837
 - sodium-hydrogen antiporter translocation, proximal tubule, C637
- Endolymph, sodium transfer, luminal amiloride-sensitive channel, F182
- Endoperoxide, pulmonary vasoconstriction, calcium role in, H2001
- Endoplasmic reticulum, rough, perinatal hypoxia effects on development, L80
- Endorphin, insulin-induced hypoglycemia and, naloxone effects, E367
- β -Endorphin, islet hormone release and, E361
- Endosomes, intrinsic factor, cobalamin absorption mediated by, G344
- Endothelial cells
- aortic, membrane potentials and calcium of, H778
 - glutathione and precursor amino acid uptake, diethyl maleate and hyperoxia effects, L265
 - histamine and inositol phosphate accumulation, L259
 - 5-HT uptake by, translocation of protein kinase C and, L253
 - leukocyte interactions, reperfusion-induced, superoxide mediation of, H1740
 - microvascular, dexamethasone effects, C512
 - plasma membranes, hypoxic injury to, pulmonary artery (pig), C223
 - pulmonary, platelet-derived growth factor production, endotoxin effects, L65
 - regression, diabetes and, E547
 - resistance, anoxia-reoxygenation, heart (guinea pig), H488
 - sodium-potassium-chloride cotransport, regulation by ANF, C36
 - superoxide-dependent relaxing factor release from, H1340
 - thrombin-treated, platelets adhere to, H423
- Endothelial injury, thromboxane A₂ and serotonin, awake state, H873
- Endothelin
- cerebral microcirculation and (piglet), H707
 - differential sensitivity to, arteries and veins, H1127
 - epithelial cells, renal tubular, C1101
 - inhibitory effect, renin release, E833
 - intracoronary, lethal ischemia due to, H339
 - vasoconstriction and, H2033
 - vasoconstriction induced by, coronary artery (pig), H1828
 - vasopressin and, cerebral blood vessels, H799
- Endothelin-1, activation, phospholipase C and calcium, osteoblastic cells, E797
- Endothelium
- calcium and, neurotransmission, H1871
 - modulation, coronary microvessels, H603
 - myocardial, lethal ischemia, H339
 - regeneration, coronary artery function, H1681
 - xanthine oxidase injury, intracellular iron and hydroxyl radical role in, H1640
- Endothelium-derived contracting factor, superoxide anion, H33
- Endothelium-derived relaxing factor
- aortic contraction, diabetes and, H1327
 - arteriolar dilation mediated by, endothelial impairment effects, H1966
 - coronary artery function, H1681
 - coronary resistance arteries and, H603
 - dilator response to, arteriolar, H1485
 - femoral vein, H1910
 - inhibition, mesangial cell mitogenesis, F60
 - relaxation and reperfusion, coronary ring, H1240
 - release, arteries, H330
 - responses to vasoactive substances, coronary arteries, H988
 - sensitivity to endothelin and, arteries and veins, H1127
 - smooth muscle response to, basilar artery, H1235
 - stabilized, coronary vasculature and, awake state, H1895
 - vascular tone, modulation by neurophils, H1315
- Endotoxemia, hepatocytes of, protein phosphorylation in, R1232
- Endotoxin
- blockade: see Blockade
 - iron uptake and, hepatocytes, G524
 - platelet-derived growth factor production and, pulmonary endothelial cells, L65
 - superoxide dismutase mRNA and, lung, L61
 - vascular endothelial permeability, L399
- Energy
- balance
 - ambient temperature effects, R1328
 - CRF effects, sex dependency, R1417
 - exercise training effects, orchidectomy, R550
 - depletion-repletion, calcium transients and, cardiomyocytes, C427
 - expenditure
 - catecholamine effects, skeletal muscle, E340
 - insulin-induced hyperphagia and, R717
 - ion channel density relations, brain (turtle, rat), R1354
 - overfeeding in offspring of obese patients, E647
 - metabolism
 - anoxic brain (turtle), R854
 - brain, level of satiety, R1322
 - hypothalamic, parabiosis and, R224
 - skeletal muscle fiber-type, E567
 - sparing, adaptation to cold and fasting, chick (penguin), R744
 - stores, myocardial, sepsis and endotoxin shock effects, R1265
- Enteric nerves
- electrolyte transport, luminal distension in ileum, G191
 - ileal, VIP and substance P release from, G182
- Enteric nervous system
- 5-hydroxytryptamine mediation, gastrointestinal function, G386
 - myenteric plexus ganglia, somatostatin release from (guinea pig), G313
- Enterocytes
- brush-border membrane vesicles, calcium uptake, intestine, F446
 - cobalamin release, G791
 - duodenal, calcium uptake by, F574
 - villous, alkaline phosphatase secretion, G14
- Enterotoxin, *E. coli*, jejunal and ileal responses to, G118
- Environment, cold, body weight and cost of foraging, R952
- Enzymes: see also specific enzymes
- activities, skeletal muscle fiber-type, E567
 - plasma, response to hemorrhage, stress immobilization effects, R661
- Eosinophil, influx, histamine release and, bronchi, L277
- Epidermal growth factor
- gastric mucosal response, aging and, G554
 - ontogenic response to hydrogen and, gastric mucosa, G851
 - receptor: see Receptors
- Epinephrine
- anoxia effects, brain and kidney (carp), R10
 - carbohydrate-induced thermogenesis and, skeletal muscle, E340
 - conjugated, response to hypoxia, fetus (sheep), E198
 - hormonal responses, exercise, E95
 - insulin-induced hypoglycemia and, naloxone effects, E367
 - lung liquid secretion during, β -adrenergic block effects, fetal asphyxia (sheep), R705
 - mental stress and, kidney, F682
 - metabolism, motor center activity and, E722
 - plasma
 - eating and, renal sympathetic nerve activity and, R1034
 - increase in concentration, renin release and, awake state, E57
 - response to hemorrhage, stress immobilization effects, R661
 - portal and mesenteric veins and, portal hypertension, G977
 - response to, ANF effects, elderly, E866
 - spillover, muscle, during exercise, H1812
 - thermogenesis, plasma insulin or glucagon changes and, E185
- Epithelial cells
- alveolar
 - hydrogen secretion by, L438
 - type II, polypeptide growth factors and, L23
 - type II, processing of pulmonary surfactant protein B in, L100
 - bronchi
 - chemoattractant activity for monocytes, L130
 - chemotactic activity release for lymphocytes, L109

- chemotaxis, lung fibroblasts and, L71
 ciliary, cytoplasmic pH, bicarbonate regulation of, C696
 glomerular, leukotriene D₄ signaling pathways in, C232
 ileal, basolateral membrane, calcium channels in, G86
 intestinal, DNA synthesis, putrescine stimulation, G145
 Epithelial monolayers, establishment of, repolarization of sodium-potassium pumps during, C896
 Epithelium
 sodium-coupled active transport mechanisms, energetics of, invertebrate, R461
 transport, amino acids, marine bivalves, R473
 EPSP: see Potentials, excitatory polysynaptic
 ePTFE: see Polytetrafluoroethylene
 Erythrocytes
 band 3 anion transport protein, flufenamic acid and, C277
 cation transport, voltage-activated, C986
 chloride self-exchange, DIDS inhibition of, C601
 glutathione response and, diethyl maleate or hyperoxia, L272
 infusion, exercise in the heat, R311
 membrane fluidity, magnesium deficiency and, weanlings, C270
 nonpolarized, ionic permeability and, F985
 potassium transport in, volume-dependent, C114
 sodium-hydrogen exchange in, magnesium and, C1038
 sodium-lithium exchange in (sheep), C58
 velocity, hemorrhagic hypotension, sartorius muscle, H1647
 volume, prolonged hyperinsulinemia effects (sheep), R1199
 Erythroleukemic cells, inner medullary collecting duct, hydrogen secretion, F487
 Erythromycin, gastrointestinal motor activity and, G470
 Erythropoiesis, prolonged hyperinsulinemia effects, fetus (sheep), R1199
 Erythropoietin, secretion, hypoxia effects, hepatoblastoma cells, C743
Escherichia coli
 enteric infection, intestinal motility preceding diarrhea, G725
 enterotoxin, receptors: see Receptors
 Esophagus
 circular smooth muscle
 cold effects on membrane potential (opossum), G637
 VIP and acetylcholine in, G380
 smooth muscle peristalsis, cholinergic control of, G517
 temperature, during exercise, cutaneous vasodilation and, R1089
 upper sphincter, opening mechanism, G748
 Estradiol, ovariectomy and, unity of female circadian rhythms, R1241
 Estrogen
 bone and, calcitonin and parathyroid hormone deficiency, E903
 brain sodium-potassium-ATPase differences, male-female, E284
 desensitization of, myometrium, E20
 treatment, vascular pressure-volume relations (guinea pig), R1205
 Ethacizin, blockade, calcium channel, model, H1693
 Ethanol
 chronic ingestion, hemorrhagic shock and, H198
 consumption, during pregnancy, E561
 injury induced by, gastric mucosal, fish oil effects, G9
 Ethoxazolamide, carbonic anhydrase inhibitors and, base exit, F947
 N-Ethylmaleimide
 acid load sensitivity to, cytoplasmic pH in pulmonary macrophages, C65
 aldosterone and, collecting tubule, F177
 hydrogen secretion and, collecting duct cells, F487
 potassium transport stimulated by, erythrocytes and sickle cells, C114
 Euglycemic-hyperinsulinemic clamp
 development of obesity, ventrolateral hypothalamic, E255
 insulin secretion and action, hyperglycemia, E180
 Exercise
 ANP plasma levels, propranolol and pin-dolol effects, R259
 aortic constriction, cardiac adaptations to, aging and, H643
 cardiac glucose uptake during, training effects, H839
 cardiovascular effects of dobutamine, H954
 cardiovascular response to, hypothalamic influences on, H1247
 dipyridamole effects, blood flow, muscle (swine), H1498
 dysfunction after, regional blood flow, H113
 endurance training, lactate clearance and, hyperlactatemia, E782
 glucagon rise induced by, hepatic glycogenolysis and gluconeogenesis, E108
 glucose transport and, skeletal muscle membrane vesicles, C1128
 high- and low-intensity, blood glucose turnover during, E405
 hormonal and metabolic responses to, sensory nervous blockade and, E95
 increased interleukin 1 β after, skeletal muscle, R451
 lactic acidosis induced by, kidney, R102
 mobilization of glucoregulatory hormones and glucose, hypothalamic locomotor centers and, E722
 muscular contraction, ventrolateral medullary neurons and, R1154
 norepinephrine spillover during, skeletal muscle, H1812
 pancreatic hormone secretion, hepatic vagus nerve effects, E855
 prolonged, puberty and luteinizing hormone secretion, female, R1359
 protein degradation after, soleus muscle, E1
 reflex stimuli and, adrenal blood flow, H590
 responses to, senescence, H1428
 rhythmic, sympathetic outflow during, reflex stimulation, H2017
 running, mRNAs and, skeletal muscle, C936
 training
 β -adrenoceptor density and, skeletal muscle, E736
 energy balance and, orchidectomy, R550
 glucose transporters and, adipose cells, E520
 glucose uptake during exercise and, heart, H839
 work: see Work
 Exocrine cells, secretion, cAMP and phosphoinositide convergence pathways, C651
 Exocytosis
 insulin, kidney cells (opossum), C190
 suppressive action of cobalt on, neutrophils, C859
 Exponential-polynomial relations, isometric dynamics, global model, H1275
 Extensor digitorum longus muscle, tension potentiation, myosin light chain phosphorylation and, C1012
 Extracellular matrix, components, receptors for, L331
 Eye, pigment epithelium, leucine transport, metabolic stress effects (bovine), C940
 F
 Facial nerve, stimulation, regional blood flow and glucose use with, cerebral, R517
 Fähræus effect, cardiovascular physiology, H1005
 Fanconi's syndrome, experimental, 4-pentenolone infusion and, F959
 Fastigial nucleus
 pressor response, axons of passage and, R1436
 stimulation of, cerebral blood flow and, H297
 Fasting
 adaptation to, nonshivering thermogenesis and, chick (penguin), R744
 bradycardia induced by, heart rate spectral analysis of (cow), R1303
 cold exposure and, glucose uptake, R96
 endogenous CCK effects, feeding and gastric emptying, R1462
 glutamine synthesis during, ammonium ion effects, liver, E514
 leucine oxidation, glucocorticosteroid effects, E712
 lipolysis during, β -adrenergic blockade effects, E65
 protein metabolism during, heart cells, neonate, C913
 Fat, triolein absorption, suckling and adult, G823
 Fat cells: see Adipocytes
 Fat pad, responses to short days, regional differences (hamster), R1533
 Fatty acids
 biosynthesis, developing lung, fetal, L195
 deficiency, lung injury in, H1192
 essential, deficiency, puromycin nephrosis, renal injury and, F798
 fluxes, across lipid-water interface, albumin effects, G904
 free
 glucose interaction, time dependence of, E49
 ketogenesis and sepsis, E665
 infusion, blood pressure and, hypertension and normotension, H611

Fatty acids (continued)

- long-chain, mediated transport of, renal basolateral membranes, F539
- nonesterified, steroidogenesis in Leydig cells and, E937
- nonesterified free, insulin effects, gilts (pig), E554
- oxidation
 - calcium requirement, gastric mucosa (toad), G969
 - obesity effects, liver, R822
 - postischemic blood flow, myocardial necrosis and, H1204
- Feedback**
 - corticosteroid, control of ACTH, R427
 - positive control system, Wenckebach arrhythmia, H935
 - regulation, trypsin, G175
 - tubuloglomerular
 - activity after immune injury, F67
 - adenosine analogue effects, F231
 - chlorothiazide effects, F137

 membrane potential changes, charybdotoxin-sensitive, calcium ions and, lymphocytes, C197
 polarization, magnesium deficiency, erythrocyte membrane fluidity and, C270
Fluoride, cellular calcium and PTH, adenine nucleotides and, E505
Fluorometry, fiber-optic, cerebral oxygenation (duck), R127
FMLP: *see* Formyl-methionine-leucine-phenylalanine
Follicle-stimulating hormone, control of menstrual cycle, E930
Formyl-methionine-leucine-phenylalanine, synthetic peptide, response of pulmonary artery, H107
Forskolin
 abnormal adenylate cyclase, pseudohypoparathyroidism, E277
 acetylcholine release, somatostatin effects, G221
 action potentials, hyperthyroid myocytes, C957
 adenylate cyclase activity and, ventricular myocyte membrane, H1088
 adrenergic responses, hyperthyroid myocytes, C948
 calcium release induced by, aorta, C413
 cAMP, responses, lung stretch and, E261
 erythropoietin secretion, hypoxia effects, hepatoblastoma cells, C743
 force and calcium ions, resistance vessels, H1728
 prostacyclin synthesis induced by, modulation by cAMP, heart, R771
 relaxation and intracellular calcium, tracheal smooth muscle, C355
 Free hormone hypothesis, thyroxine transport, liver, E764

Freezing, tolerance, heart rate and (frog), R1046
 Frequency response, cardiovascular regulation, sinusoidal acceleration use in, H511
 Fructose 2,6-diphosphate, depression, anoxia survival strategy (turtle), R278
Fundic D-cells
 cytosolic calcium concentration, carbachol effects, G308
 gastric, regulation of somatostatin, G235
Fura-2
 ATP receptors, calcium mobilization and, heart cells, C750
 cellular calcium and PTH, adenine nucleotides and, E505
 force and calcium ions, resistance vessels, H1728
 sodium-calcium exchange current, cardiac myocytes, C147
Furosemide
 PAH fluxes and, airway, C1108
 sodium absorption, across labyrinthine epithelium, F182
 sodium-chloride cotransport and, airway epithelium, L125
 transcapillary fluid movement, inner medulla, F547

G

GABA: γ -Aminobutyric acid
D-Galactose, hexose accumulation, adipocytes, C214
Gallbladder
 epithelial cells, membrane effects of chloride substitutes (guinea pig), C766
 epithelium, chloride removal (mudpuppy), C568
 sodium and chloride ion transport (pig), C45
 VIP and norepinephrine effects (pig), C52
Ganglia, parasympathetic, bladder nerves, micturition reflexes, R410
Ganglionectomy, chronic trigeminal, postocclusive cerebral hyperemia, H1736
Gas
 blood
 arterial, arteriovenous acid-base disparity, F1087
 arteriovenous oximeter for, H1712
 exchange
 alveolar dimension and number, L240
 development of lung alveoli and, L221
 during exercise, E405
 hydrogen, clearance curves, computerized curve, G668
Gastric acid
 disappearance, duodenal and jejunal mucosal permeability, G653
 output, mucosal IgE reactions, stomach, G704
 secretion
 model, G157
 peptide YY release and, left colon, G715
 sodium-potassium-ATPase, compartmentalization, G539
 storage compartment, accumulation of weak base in mucosa, G836
Gastric antrum, gastrin cells, inhibition by peptide histidine isoleucine, G328

Gastric artery, blood flow, awake state, G111
Gastric emptying
 bolus, ileal reservoir function and, G284
 feeding and, endogenous CCK effects, fasting, R1462
 solid and liquid caloric meals, alcohol absorption and, G291
 transyloric motility, fluid movements and, G198
Gastric glands, sodium-potassium-ATPase, compartmentalization, G539
Gastric intrinsic factor, cobalamin absorption mediated by, G344
Gastric mucosa
 arachidonate metabolism, ischemia-reperfusion injury and, G299
 defense mechanisms, sodium-bicarbonate cotransport, parietal cells, G350
 epithelial preparation from, G46
 IgE-mediated reactions, G704
 induction of ornithine decarboxylase, stress, G259
 metabolic effects of secretagogues, calcium requirement for (toad), G969
 ontogenic response to hydrogen, epidermal growth factor effects, G851
 response to epidermal growth factor, aging and, G554
 weak base in, acidic storage compartment, G836
Gastric secretion, transyloric motility, fluid movements and, G198
Gastrin
 CCK and, gastric smooth muscle cells, G73
 neural mechanisms, awake state, G134
 release, carbachol effects, fundic D-cells, G308
 secretion, model, G157
Gastrin cells, antral, inhibition by peptide histidine isoleucine, G328
Gastrin-releasing peptide
 antagonist, E235
 inhibition of feeding, R1219
Gastrointestinal hormone
 neurotransmitters, esophageal circular smooth muscle, G380
 opioid regulation of, G41
 secretion, duodenectomy effects, G415
Gastrointestinal physiology, amino acid transport, intestinal brush-border membrane vesicles (eel), R506
Gastrointestinal tract
 acetylcholine release, *Trichinella* infection, myenteric plexus, G898
 interstitial cells of Cajal, pacemaker activity recorded, C830
Gauss-Newton nonlinear regression, hydrogen gas clearance curves, computerized curve fitting, G668
GDP: *see* Guanosine diphosphate
Gender, aging and, thermoregulation, R700
Gene expression
 activity-dependent, L289
 ANF, hypertension, heart ventricle, H979
 brown fat, cholera toxin effects, C920
 insulin growth factor I expression, renal hypertrophy, F252
Genes, cystic fibrosis, L47
Genetic diseases, pseudohypoparathyroidism, abnormal adenylate cyclase, E277

- Genital tract, female, neuropeptide Y actions in, E220
- Gentamicin, thyroid hormone effects on, proximal tubule lysosomes, F86

blood, turnover, exercise, E405
concentration
hemorrhagic hypotension and, liver, R317
hepatic portal, feeding and metabolism effects, R1474
counterregulation, cortisol and, during hypoglycemia, E35
enhanced response to corticosterone, genetic obesity, E133
handling, renal, experimental necrosis and, F925
homeostasis, naloxone effects, insulin-induced hypoglycemia, E367
inositol phosphate effects, pancreatic islets, G865
kinetics
optimal sampling schedule, models, E445
pulsatile delivery effects, E686
lipid interaction, time dependence of, E49
membrane-bound, diabetes and, kidney, C385
metabolism
catecholamine effects, skeletal muscle, E340
fuel-mediated teratogenesis, E269
restricted growth and, pregnancy (sheep), R350
sepsis effects, diabetes, E301
training effects, adipose cells, E520
oral and intravenous
gluconeogenic formation after, E158
hepatic glycogen formation after, E145
output, liver, measured with labeled glucose, E531
oxidation, mediating protein catabolism and, burns and sepsis, E323
paraventricular nucleus modulation, freely moving lean rats, R1370
plasma, dose-response relations to insulin, bed rest effects, E43
production, intestine and intestine-liver preparation, G249
production and disposal, loss of first-phase insulin secretion and, liver, E241
rapid vs. slow growth, gilts (pig), E554
recycling, glycogenesis type I and II children, E346
route of administration, glycogen repletion and, liver, E681
serotonergic neuron response to, R1345
suppressive effects, phosphoenolpyruvate carboxykinase mRNA, renal, F145
synthesis, renal, mitochondrial carbonic anhydrase and, E791
tolerance, diurnal fluctuation, E459
transport
forearm, compartmental model, E943
inhibition of respiration and, Clone 9 cells, C19
- insulin resistance of, skeletal muscle, E418
mutant renal LLC-PK₁ cells in, F1039
skeletal muscle membrane vesicles, exercise, C1128
sodium-dependent, renal cortical brush-border membranes, F769
stimulation by insulin and norepinephrine, adipocytes, C714
transporter systems, alterations, insulin-resistant uremia, E193
- uptake
exercise, E405
fasting and cold effects, R96
heart, exercise training effects, H839
intestinal, regional and species differences, G689
peripheral tissue, TNF effects, R1182
utilization
chronic metabolic alkalosis effects, H1220
facial nerve stimulation effects, R517
intercapsular brown fat, R1377
obesity effects (sheep), E772
Glucose-galactose paradox, hepatic glycogen synthesis, neonatal, E697
Glucose 6-phosphate, metabolism, vascular smooth muscle, C736
Glucose-6-phosphate dehydrogenase, epithelial cells, duodenal, G760
- Glutamate
coinjection, depressor response to ANF and, R405
handling, liver, growth hormone effects, E959
pial arterioles and (piglet), H1200
RVLN neurons, CVLM inhibition of, R265
- L-Glutamate
sodium-dependent transport, intestinal brush-border membrane vesicles (eel), R180
stimulation, lateral hypothalamic area, cardiovascular effects of, H540
transport, muscle fibers (barnacle), C442
- Glutamine
metabolism, skeletal muscle hypertrophy, E885
sources, parenteral nutrition, E228
synthesis, during fasting, ammonium ions and, liver, E514
transport
jejunal brush-border membrane vesicles, G80
submitochondrial particles, F1050
 γ -Glutamyl, cycle, regulation of amino acid translocation, E916
- Glutathione
cellular, regulation, L163
 γ -glutamyl cycle, amino acid metabolism and, E916
protection from hyperbaric oxygen, selenium effects, L393
response to diethyl maleate or hyperoxia, erythrocytes and, L272
thyroid hormone inhibition, lung, fetus, L94
TNF-induced lung injury and, L232
uptake, endothelial cell, diethyl maleate and hyperoxia effects, L265
Glutathione peroxidase, hyperoxide tolerance, rest period induction of, L226
Glyburide, ATP-sensitive potassium channels, pancreatic B-cells, C1119

SUBJECT INDEX TO VOLUME 257

Glycerol, renal failure induced by, hydrogen peroxide generation, F440

Glycerophosphorylcholine
acute regulation of organic solutes, renal, F676

ADH effects, kidney, F732
content, osmoregulation of, renal cells, C795
distribution, diuresis and natriuresis, kidney, F602
response, salt loading, renal inner medulla, F1117

Glycoconjugate, secretion, platelet-activating factor effects, tracheal submucosal gland, L373

Glycogen
hepatic, formation, direct pathway, E145, E158
liver
repletion, protein intake effects, E212
vagotomy effects, E855
metabolism, vascular smooth muscle, C736
repletion, hepatic, route of glucose administration effects, E681
synthesis
hepatic, glucose-galactose paradox in, neonate, E697
insulin resistance of, skeletal muscle, E418

Glycogenolysis
ATP utilization, skeletal muscle during tetanic contraction, E595
hepatic, exercise-induced glucagon rise effects, E108

Glycogen phosphorylase
genes, expression, regenerated muscle, C495
metabolism, vascular smooth muscle, C736

Glycogen storage disease, glucose recycling, glycogenesis type I and II children, E346

Glycolipids, new insights into activities, lactase-phlorizin hydrolase, G616

Glycolysis
cardiac, adenosine effects, H1952
control
anoxia and (turtle), R278
phosphofructokinase, model, R878
oxygen pressure and, hypoxic liver cell damage, G58
respiration in Clone 9 cells and, glucose transport response, C19

Glycolytic enzymes, regulation, during anoxia (turtle), R278

Glycolytic metabolism, regenerated muscle, C495

Glycoprotein
apical membrane, colchicine-induced redistribution of, proximal tubules, C397
inhibitors, urine proteins and, F99
plasma, modulation of microvessel wall charge (frog), H1354
pulmonary surfactant, L13

Glycosides
cardiac
cardiomyopathy and (hamster), H1836
extracellular calcium buffering, H1843

Glycosylceramidase, new insights into activities, lactase-phlorizin hydrolase, G616

Glycylglutamine, metabolism, parenteral nutrition, E228

GnRH: see Gonadotropin-releasing hormone

Golgi apparatus, membrane cytochemistry, atrial peptide secretory pathway, H1587

Gonadotrophs, pituitary, calcium channels in, C865

Gonadotropin-releasing hormone, pulse frequency, control of menstrual cycle, E930

G protein
acetylcholine-induced potassium current and, atrial cells, H1516
accumulation, endothelium, L259
autocrine regulation, gastric somatostatin, G235
chemical synaptic transmission, L289
regulation, potassium channels, smooth muscle cells, C596

Granulocyte-macrophage colony-stimulating factor, production, mesangial cells, F1065

Growth: see also Development; Maturation
compensatory, lung, physical forces and, L179
hypertrophic versus hyperplastic, vascular smooth muscle cells, H1755
lung, cAMP changes after partial pneumonectomy, E261
normal weight bearing after weightlessness, bone response, E606
pancreatic, CCK-receptor antagonist effects (rat, guinea pig, hamster), G511
pH effects, renal cortical tubule cells, C419
placental, restricted, glucose metabolism and, pregnancy (sheep), R350
prolonged exercise effects, luteinizing hormone secretion, female, R1359
protein turnover, skeletal muscle, suckling, R1141
rapid vs. slow, insulin effects, gilts (pig), E554
renal, model, F1059

Growth factor
magnesium requirement, nucleotide synthesis, Swiss 3T3 cells, C113
renal tubular epithelium, F913
sodium transport mediated by, urinary bladder (toad), C612

Growth hormone
ethanol effects, during pregnancy, E561
expression, renal hypertrophy, F252
gluconeogenesis and, renal proximal tubule, E751
glutamate handling and, hepatic, E959
insulin-like growth factor, axis, kidney, F503
secretory rates, 24-h plasma concentration profiles, E809

Growth hormone-releasing factor
antagonist to, growth and inorganic phosphate reabsorption, F29
rapid vs. slow growth, gilts (pig), E554

Guanosine diphosphate
binding
adrenalectomy prevention of obesity, E139
aging and gender effects, R700
brown fat, during hibernation and arousal (squirrel), R536
cold-induced changes, brown fat, R292
surgical removal of brown fat, compensation by other depots, R253

Guanosine monophosphate, cyclic
ANF, fluid absorption and, proximal tubules, F907
E. coli enterotoxin effects, kidney, intestine, and testis, F874
EDRF and, femoral vein, H1910
inhibition, mesangial cell mitogenesis, F60
metabolic production of, during gestation, R847
prolactin, lactose biosynthesis and, E318
renal action of ANP and, during volume expansion, F300
secretion, ANP stimulation of, E675

Guanosine triphosphate-binding protein, trypsin activation, muscarinic potassium channels, H334

Guanylate cyclase, ANF receptor subtype expression, glomeruli and papillae, F649

Gustatory response
consistent aversion, area postrema lesion and, R1075
hyperosmotic sodium chloride, model, G475

H

Haloperidol, renal action of ANP and, during volume expansion, F300

Halothane
delivery, R668
isoflurane and, rapid cooling contractions in myocardial tissue, H1804

Halothane-sensitivity gene
muscle contractile properties and, malignant hyperthermia, C781
sarcolemmal reticulum function and, C787

Heart
acetylcholine release, somatostatin effects, H483
adaptations, aortic constriction, aging and, H643
adenosine transport, transcapillary (guinea pig), H89
ANF release, hypoxia-induced, H147
antisecretory peptide, chloride secretion and, intestine, C775
cardiomyopathic, mechanical and electrical properties (hamster), H1836
catheterization, intravenous VIP effects, H1254
cold exposure and fasting effects, glucose uptake, R96
congestive failure, pleural effusion formation and, awake state (sheep), H690
creatine kinase enzyme activity and mRNA level, diabetes, E573
cycle phase, left ventricular twist-radial shortening relations, H1119
decompensation, healed severe myocardial infarction, H289
delayed rectifier potassium current, autonomic regulation, H818
denervation
ANP response to rapid atrial pacing, R162
calcitonin gene-related peptide and, awake state, R726
cardiovascular regulation in, H511
depression, sepsis and endotoxin shock effects, R1265
development
fetal, neonatal, and adult (sheep), H1

Heart (continued)

- increased pressure effects, embryo (chick), H55
- endothelial cells, resistance to anoxia-reoxygenation (guinea pig), H488
- extracellular matrix, intramyocardial pressure and, H357
- failure
 - ANP release in hypophysectomy, R522
 - congestive, ANF and nitroglycerin effects, R1481
 - congestive, ANF binding sites in, F515
 - DOCA administration and ANF with, H739
 - endogenous ANP effects, R641
 - hypertrophy and, gradual overload and (guinea pig), H1016
 - low-output, renal response to ANF in, R917
- function
 - diabetes, oral vanadyl sulfate effects, H904
 - long-term hypoxemia, fetus (sheep), H581
 - PAF and BN 52021 effects, awake state, H25
 - glucose uptake, during rest and exercise, training effects, H839
 - glycolytic flux, adenosine effects, H1952
 - hypertrophy: *see also* Hypertrophy
 - healed severe myocardial infarction, H289
 - sarcolemmal calcium ion transport activities in, H349
 - hypoxic alterations of anaphylaxis, adenosine role in (guinea pig), H1378
 - intracellular calcium ion oscillations, laser backscatter studies, H665
 - ischemic and reperfused, degradation of adenine nucleotides, H47
 - ischemic disease, sequential topographical portrayal of blood flow, H635
 - isometric relaxation, determinants of force decline during, H1490
 - left ventricular free wall traction effects, H1211
 - mechanics, long-term evaluation of ventricular performance, H70
 - noncholinergic control, neuropeptide inhibitory effects, H1082
 - pacing, ANP release in hypophysectomy, R522
 - plasma membrane-specific deficiency, streptozotocin diabetes, E127
 - prostacyclin synthesis, isoproterenol-induced, cAMP modulation of, R771
 - Purkinje fibers, calcium effects, H226
 - regional flow heterogeneity, fractal network explanation, H1670
 - reperfused, membrane phospholipid degradation in, H252
 - sarcolemmal calcium pump, depression by oxygen free radicals, H804
 - swinging, during pericardial effusion, H1292
 - tetanized, volume changes, pressure responses to (ferret), H38
 - unrestrained beating, microcirculation in, H1056
 - vascular contributions, hypotension, spinal injury, H1347
 - work, pacing stress effects, E309
- Heart atria
 - ANP, during hemorrhage and vagotomy, R1393

- contraction, transient diastolic changes in ventricular filling, H305
- granularity, ANF release and, diabetes mellitus, R932
- immunoreactive atriopeptin, plasma (fish), R939
- muscarinic potassium channels, trypsin activation of, H334
- pacing, ANP response to, cardiac denervation and, R162
- repolarization, transient outward current effects, H1773
- structure and propagation, H1446
- Heart cells: *see also* Cardiac cells; Cardiomyocytes, Myocytes; Ventricular cells
 - APT-sensitive potassium channels, activation by pinacidil (guinea pig), H2092
 - arachidonic acid metabolism, oxygen deprivation effects, H444
 - calcium mobilization, ATP receptors and, C750
 - cytosolic free magnesium concentration in (chick), C141
 - nutrient deprivation and refeeding, protein metabolism during, neonate, C913
 - potassium current, intracellular magnesium effects (frog), H1663
 - ventricular, ATP-sensitive potassium channel kinetics, H1624
- Heart rate
 - acute aortic coarctation hypertension and, H1480
 - ANF infusion effects, fetus (lamb), R580
 - angiotensin injection effects, brain stem, H324
 - baroreceptor control, atrioventricular block and, awake state, H2048
 - baroreceptor denervation effects, vasopressin and cortisol responses to angiotensin II infusion, R1175
 - calcitonin gene-related peptide effects, awake state, R726
 - central autonomic nervous system-regulating peptides, R681
 - central effects of somatostatin, R588
 - exercise, dobutamine effects, H954
 - freezing-induced changes (frog), R1046
 - PAF and BN 52021 effects, awake state, H25
 - propranolol and pindolol effects, rest and exercise, R259
- responses
 - acidemia stimulation of, fetus (sheep), R344
 - norepinephrine, autonomic nervous system and, fetus (lamb), R574
 - stress, μ -opioid peptide modulation of, R901
 - spectral analysis, fasting-induced bradycardia (cow), R1303
 - stress-induced tachycardia, hypothalamic GABA receptors and, R246
 - TRH specific effects, gastric motility, G454
 - vagal stimulation, Wenckebach arrhythmia and, H935
- Heart ventricles
 - assist devices, reduced left ventricular pressure (pig), H1878
 - fibrillation, coronary occlusion, autonomic response to, H1886
 - filling, transient diastolic changes and, H305

- function
 - long-term hypoxemia, fetus (sheep), H581
 - sepsis and endotoxin shock effects, R1265
 - growth, increased pressure effects, embryo (chick), H55
- hypertension, ANF gene expression during, H979
- premature contraction, model, H693
- remodeling, coronary artery constriction and, H1983
- sarcoplasmic reticulum, BAY K 8644 inhibition of, H407
- Heart ventricles, left
 - afterload, intrathoracic pressure effects, H120
 - anterior wall, nonuniform shortening, H1165
 - contractility, chronic ethanol effects on hemorrhagic shock, H198
 - coordinate systems, H1025
 - end-diastolic diameter, aging effects, H961
 - free wall traction, electrophysiological effects, intact heart, H1211
 - hypertrophy, gradual overload and (guinea pig), H1016
 - long-term variance of performance index, closed chest, H70
 - pressure reduction effects, right ventricular systolic performance (pig), H1878
 - Purkinje system, α -adrenergic effects on, H1156
- relaxation
 - nonuniformity and volume loading influences, H1927
 - wall motion asynchrony and, H883
- systolic resistance, with hypertension and hypertrophy, H386
- twist-radial shortening relations, cardiac cycle phase, H1119
- volume changes, pressure response to (ferret), H38
- Heart ventricles, right
 - afterload, microcirculation in unrestrained beating heart, H1056
 - long-term pressure-induced hypertrophy, H1766
 - systolic performance, left ventricular pressure reduction effects (pig), H1878
- Heat
 - exchange, nasal, diving (seal), R306
 - exercise and, thermoregulatory sweating, R311
 - exposure
 - dehydrated, osmoregulation and (pigeon), R377
 - dehydration and rehydration during, aging and, R1050
- Heat shock proteins, refeeding and nutrient deprivation effects, heart cells, neonate, C913
- Hematocrit
 - microvessel, Fåhræus effect, H1005
 - neutrophil transformation, hemorrhagic shock, H846
- Hemicholinium-3, cholinergic innervation, renal tissue, F746
- Hemodilution, size-dependent constriction, hemodilution effects, H912
- Hemoglobin
 - concentration, oximeter measurement, H1705

- content, arteriovenous oximeter for, H1712
 optical hemoglobinometer, H1306
 Hemoglobinometer, whole blood, H1306
 Hemorheology, Fåhræus effect, H1005
 Hemorrhage
 adrenal hormone response to, prior stress immobilization effects, R661
 blood volume redistribution after, newborn (lamb), R647
 brain and plasma ANP during, vagotomy effects, R1393
 catecholamine activity after, paraventricular nucleus, R370
 cerebral blood flow during, plasma vasopressin effects, H1360
 constant-pressure and constant volume (trout), R1307
 intracranial, superoxide anion generation, newborn (pig), H1560
 neurohypophyseal blood flow during, baroreceptor control of, H1507
 norepinephrine and glucose during, liver, R317
 repeated small, hormonal response to, R118
 Henle's loop
 ascending thin limb, chloride ion transport (hamster), F92
 hydrogen-bicarbonate transport, glucagon effects, F1003
 magnesium restriction, adaptation of magnesium reabsorption and, F974
 sodium chloride, water transport and (quail), F994
 Hepatectomy, partial, ureagenesis decrease, acid-base balance and, F696
 Hepatobiliary function, sulfobromophthalen infusion, R456
 Hepatoblastoma cells, erythropoietin secretion, hypoxia effects, C743
 Hepatocellular function, measurement, R439
 Hepatocytes
 aerobic and anaerobic conditions, cyanide toxicity in, C435
 CCK processing by, G242
 cell death, hypoxia and, C347
 diabetic, phosphorylase synthesis in, E74
 hypoxic, oxygen pressure and glycolysis in, G58
 iron uptake in, endotoxin effects, G524
 membrane potential and potassium conductance, pH effects, G961
 metabolism, phenylarsine oxide effects, C182
 pairs, cAMP effects, C1
 palmitate uptake, G584
 septic and endotoxemic, protein phosphorylation in, R1232
 Hepatoma cells
 angiotensinogen production, inhibition by angiotensin II analogues, C888
 pH regulation, G317
 Hepatopancreas, electrogenic sodium-hydrogen transport, kinetic analysis (prawn), R484
 Hexokinase, brain biochemistry, species differences (rat, turtle), R1083
 Hexoses, accumulation, adipocytes, C214
 Hibernation
 arousal and, brown fat GDP binding during (squirrel), R536
 suprachiasmatic nucleus, phase-dependent activation of (squirrel), R605
 Hindbrain, neuron response to circulating CCK, capsaicin attenuation of, R1162
 Histamine
 accumulation
 endothelium, L259
 weak base, gastric mucosa, G836
 aging and, coronary response, H988
 antigen challenge of, local mediator release, L366
 calcium transients induced by, vascular smooth muscle cells, H563
 concentration, arterial smooth muscle (swine), C122
 gastric mucosal response to, G46
 H₂-receptors, ischemic fall in density, myocardium, H1032
 hypoxic alterations of anaphylaxis and, heart (guinea pig), H1378
 IP₃ formation induced by, phorbol ester inhibition of, airway smooth muscle, L209
 metabolic effects of, calcium requirement for, gastric mucosa (toad), G969
 microvascular responses, copper deficiency, H1607
 mucosal IgE-mediated reactions, gastric response to, G704
 release, cellular influx and, bronchi, L277
 vascular resistance and compliance and, pulmonary, H618
 HL-60 cells, promyelocytic, chloride-chloride exchange, C520
 HMG-CoA reductase: see Hydroxymethylglutaryl-CoA reductase
 Hoarding, food, body weight and cost of foraging, R952
 Hormonal regulation, dimension and number, alveoli, L240
 Hormonal responses
 acidemia, fetus (sheep), R344
 exercise, sensory nervous blockade and, E95
 repeated small hemorrhages, angiotensin and vasopressin role in, R118
 Hormones: see also specific hormone concentration, ethanol effects, pregnancy, E561
 episodic signals, false-positive and false-negative errors, E88
 plasma concentration, controlled by secretory impulse frequency, E299
 5-HT: see 5-Hydroxytryptamine; Serotonin
 Hyaluronan
 content, overhydration effects, subcutis, H1819
 lung accumulation of, pulmonary edema and, L379
 Hydralazine, maximal coronary flow, regression of cardiac hypertrophy and, H1110
 Hydrochloric acid
 hormonal and heart rate responses, fetus (sheep), R344
 mucosal permeability and, duodenal and jejunal, G653
 Hydrocortisone, treatment, response to CCK and, pancreas, G364
 Hydrogen
 ontogenic response to, epidermal growth factor effects, gastric mucosa, G851
 secretion
 alveolar epithelial cells, L438
 phorbol myristate acetate inhibition (turtle), F1124
 renal inner medullary collecting duct cells, F487
 Hydrogen-ATPase, cytoplasmic pH and, pulmonary macrophages, C65
 Hydrogen-bicarbonate transport, glucagon effects, kidney, F1003
 Hydrogen ions
 efflux, urso-deoxycholate-induced changes, G371
 secretion
 chronic hypocapnia and, renal cortical, F615
 metabolic acidosis effects, proximal tubule, F35
 transport, dynamic changes in plasma membrane area and (turtle), R973
 Hydrogen peroxide
 depression of sarcolemmal calcium pump, heart, H804
 endothelial injury, xanthine oxidase-induced, H1640
 generation, glycerol-induced renal failure, F440
 lipid, pulmonary endothelium, L430
 Hydrogen-potassium-ATPase, gastric, compartmentalization, G539
 Hydrolase, brush-border, perinatal expression, colon, G496
 Hydrolysis
 synthetic angiotensin-converting enzyme substrate, lung, H2006
 triacylglycerol pool, intestinal mucosa, G871
 6-Hydroxydopamine
 hypoxia-induced ANF release and, heart, H147
 pressor response to feeding and, newborn (lamb), R568
 Hydroxyethylstarch, oxygen uptake with, hemorrhagic shock, H238
 Hydroxyl radical
 depression of sarcolemmal calcium pump, heart, H804
 endothelial injury, xanthine oxidase-induced, H1640
 scavengers, endothelial injury, xanthine oxidase-induced, H1640
 Hydroxymethylglutaryl-CoA reductase, physiological role, egg production, R618
 Hydroxyproline, sex hormones, bone conservation and, E903
 5-Hydroxytryptamine: see also Serotonin afferent nerve activation, renal and mesenteric, R29
 enteric slow EPSP's mediated by, gastrointestinal function, G386
 ketamine and fentanyl effects, lung metabolism, C379
 myocardial inotropic response to, endocardium modulation of, H1790
 receptors: see Receptors
 superoxide-dependent relaxing factor and, endothelial cells, H1340
 transport, hypoxia and, pulmonary artery (pig), C223
 uptake, translocation of protein kinase C and, endothelial cells, L253
 5-Hydroxytryptophan, ileal postprandial motor patterns, transit of chyme and, G698
 Hyoid, motion, opening mechanism, G748

- Hypercalciuria, calcium transport, renal, overview, F707
- Hypercapnia**
arteriovenous disparity, circulatory failure, F1087
bicarbonate and, cerebral arterial response, H141
cerebral arteriole response to, anesthesia effects, H85
- Hyperemia**
adenosine-induced, myocardial ischemia, H244
cerebral, postocclusive, chronic trigeminal ganglionectomy, H1736
postprandial jejunal, prostanoids in, G798
reactive, adenosine and α_2 -stimulation, H132
- Hyperglycemia**
diabetes, oral vanadyl sulfate treatment of, H904
hemorrhagic hypotension and, liver, R317
insulin secretion and action in, E180
single-unit response, serotonergic neurons, R1345
- Hyperglycemic clamp**
glucose production and disposal, loss of first-phase insulin secretion and, E241
hepatic glucose production during, E704
- Hyperinsulinemia**
central interleukin 1-elicited, prostaglandin mediation of, R839
energy expenditure, diet-induced thermogenesis and, R717
glucose production during, hepatic, E704
prolonged, erythropoiesis and, fetus (sheep), R1199
- Hyperkalemia**, aldosterone and renin inhibition, ANF, R1423
- Hyperlactatemia**, lactate clearance during, endurance training enhancement of, E782
- Hypernatremia**, major osmolyte accumulation, brain, F1108
- Hyperosmolality**, plasma ANF and, fetus (sheep), E466
- Hyperoxia**
diethyl maleate and glutathione, endothelial cells, L265
glutathione response to, erythrocytes and, L272
hyperbaric, glutathione protection from, selenium effects, L393
oxygen tolerance, neonate, L411
tolerance, rest period induction of, L226
- Hyperplasia**, myocardial, increased pressure effects, embryo (chick), H55
- Hyperpolarization**
adenosine receptor-mediated, coronary smooth muscle, H1750
membrane, chloride removal, gallbladder (mudpuppy), C568
- Hypertension**
acute aortic coarctation, vasopressin and angiotensin II in, H1480
afferent nerve activation, renal and mesenteric, R29
ANF gene expression during, heart ventricles, H979
angiotensin II salt-dependent, blood volume in, H1402
attenuated pressor response, third cerebral ventricle lesions, R431
calcium-deficient, adrenergic regulation of, embryo (chick), H1900
chronic portal venous, pressor responses, awake state, G773
compliance, aortic impedance and, H553
Dahl, maternal environment and development, H1396
DOCA, urinary clearance of lysine vasopressin and (pig), R1467
first hours of, rapid baroreceptor resetting effects, H711
genetic, development of, steroids and, H506
Goldblatt, thromboxane role in, F190
high- and low-salt diets, 24-h blood pressure recordings in, R1225
hypertrophy, left ventricular systolic resistance with, H386
left atrial, pleural effusion formation and, awake state (sheep), H690
linoleic acid infusion effects, H611
portal
catecholamine effects on portal and mesenteric veins, G977
portal venous pressure and portosystemic shunting in, G52
portal venous, intestinal lymphatic flow during, G94
primary systemic, arterial chemoreceptor and reflex control of, R1282
prostaglandins in, reduced uteroplacental perfusion pressure, R1558
pulmonary, fetus (sheep), H626
renal
atrioventricular II effects with papillary necrosis, F859
decapsulation effects, during pressure natriuresis, F785
hemodynamic actions of ANP, converting-enzyme inhibitor effects, R365
transplantation and, F197
renin-angiotensin system role in, during uteroplacental perfusion pressure, R204
spontaneous
abnormal insulin metabolism after, E491
ANF receptor subtype expression, glomeruli and papillae, F649
antiserum against ANP, H1104
calcium uptake by enterocytes, F574
increased oxidative metabolism and, renal tubules, F818
pregnancy effects on glomerular function, F1140
regression of cardiac hypertrophy and, H1110
stroke-prone, blood pressure and acidic renin formation, F275
vascular smooth muscle cell growth and, H1755
- Hyperthermia**
malignant
muscle contractile properties in, C781
slow sodium current, muscle cells, C759
- Hypertonicity**, water permeability, reflection coefficients and, proximal tubule, F658
- Hypertonic solution**, plasma ANF and, fetus (sheep), E466
- Hypertrophy**
cardiac
action potentials and calcium transients in, C948
adrenergic responses in hyperthyroid myocytes, C948
failure and, gradual overload (guinea pig), H1016
healed severe myocardial infarction, H289
left ventricular systolic resistance with, H386
long-term pressure-induced, H1766
regression of, maximal coronary flow and, H1110
sarcolemmal calcium ion transport activities in, H349
ventricular, ANF gene expression, H979
- Hypervolemia**
natriuretic response, papillary necrosis and, R422
thermoregulatory sweating, exercise in the heat, R311
- Hypocapnia**
arteriovenous disparity, circulatory failure, F1087
redox balance and, brain (duck), R132
sodium-hydrogen exchange in, renal cortical tubules, F615
- Hypochlorous acid**
injury to cardiac muscle, dithiothreitol and contractile function, H1321
production, neutrophils, TNF priming for, L338
- Hypoferremia**, lipopolysaccharide administration and, hepatocytes, G524
- Hypoglycemia**
brain-pituitary-adrenal response to, development, E757
glucose counterregulation, cortisol and, E35
insulin-induced, naloxone effects on glucose, E367
malformations induced by, fuel-mediated teratogenesis, embryo, E269
single-unit response, serotonergic neurons, R1345
- Hypogonadism**, hypogonadotropic, GnRH pulse frequency and, E930
- Hyponatremia**, asymptomatic, mortality and brain lesions, F18
- Hypophysectomy**, ANP release in, R522
- Hypotension**
hemorrhagic
baroreceptor control, H1507
catecholamines and glucose in, liver, R317
microcirculatory responses in sartorius muscle, H1647
mesenteric ischemia-reperfusion, PAF in, R872
renin response to, inhibition by ANF, R194
spinal injury with, cardiac and peripheral vascular contributions, H1347
- Hypothalamic nucleus**, posterior, neuropeptide Y injection, H791
- Hypothalamus**
attenuated pressor response, third cerebral ventricle lesions, R431
central interleukin 1-elicited hyperinsulinemia, prostaglandin mediation of, R839
copper uptake, high-affinity, C315
development, response to hypoglycemia, E757
energy metabolism, parabiosis and, R224
lateral area, L-glutamate stimulation, cardiovascular effects, H540

lesions, pressor response after, R80
 locomotor centers, glucoregulatory hormones and, E722
 neural thermosensitivity in, ouabain effects, R21
 plasma ANP and, vagotomy effects, during hemorrhage, R1393
 posterior
 aortic nerve stimulation and, H1994
 muscimol injection into, stress-induced tachycardia and, R246
 preoptic anterior, thermal response to norepinephrine, R816
 response to exercise and, cardiovascular, H1247
 thermosensitive neurons in
 localization, R57
 synaptic blockade effects, R65
 ventrolateral, obesity, development of, E255
 ventrolateral medulla, neurons, muscular contraction and, R1154
 ventromedial nucleus, injection of 2-deoxy-D-glucose, sympathetic activity and, R1386
 Hypothermia, regional blood flow, brain and spinal cord, H785
 Hypothyroidism
 fetal, brown fat, fetal life and, E625
 maternal, brown fat, fetal life and, E625
 Hypotonicity, luminal, osmotic forces driving water reabsorption, kidney, F669
 Hypovolemia, constant-pressure and constant volume, response to (trout), R1307
 Hypoxanthine, inhibition, ischemic acute renal failure and, F953
 Hypoxemia
 cardiac tamponade and, circulatory responses during, H726
 long-term, cardiac function during, fetus (sheep), H581
 organ blood flow during, control, fetus (sheep), H1132
 Hypoxia
 adrenal blood flow during, anesthesia and, H1458
 ANF release induced by, heart, H147
 cerebral, energy-dependent cell volume maintenance, C817
 chemical, cell death during, hepatocytes, C347
 chemical control of ventilation, temperature effects (iguana), R1258
 conjugated catecholamine response to, fetus (sheep), E198
 cyanide toxicity in, hepatocytes, C435
 endothelial cell plasma membranes and, pulmonary artery (pig), C223
 erythropoietin secretion and, hepatoblastoma cells, C743
 fetal, β -adrenergic block effects on lung liquid secretion (sheep), R705
 graded, vasodilation of cerebral arteries, H824
 high-altitude, arterial chemoreceptor and reflex control of, R1282
 hypoxic
 cerebrovascular response to, chemodenervation effects (sheep), H1413
 neural regulation of muscle blood flow during, H1581
 leucine transport and, pigment epithelium, eye (bovine), C940

liver cell death, oxygen pressure and glycolysis in, G58
 metabolism and, renal proximal tubule cultures, C333
 organ blood flow during, control, fetus (sheep), H1132
 oxidative metabolism-contraction coupling, phosphocreatine and, aorta, H597
 oxygen free radical production, intestinal ischemia, G409
 perinatal, development of bronchiolar epithelium and, L80
 postnatal development and, lung alveoli, L221
 pulmonary vasoconstriction, pentobarbital inhibition of (sheep), H898
 redox balance and, brain (duck), R132
 vasodepressor responses to, 8-phenyltheophylline effects, coronary, H1043

I

Ibuprofen, alleviation, coronary constriction due to neuropeptide Y, H927
 Idazoxan, insulin release and, pancreatic islets, E439
 IGF-1: see Insulin-like growth factor I
 Ileocecal sphincter, substance P action in, G447
 Ileum
 basolateral membrane, lipid composition, G138
 bicarbonate transport regulation, pH stat studies, G607
 crypt-villus axis, secretagogue effects, G334
 damage, mucosal arachidonate metabolism and, G299
 everted sacs, bidirectional calcium flux, aluminum effects, G433
 interstitial fluid pressure, polyethylene capsule measurement, H62
 isolated perfused, VIP and substance P release from, G182
 luminal distension in, neurally mediated sodium bicarbonate secretion, G191
 postprandial motor patterns, transit of chyme and, G698
 reservoir function, bolus emptying and, model, G284
 responses, *E. coli* enterotoxin, G118
 retrograde myoelectric activity, phorbol esters and, G578
 rhythmic postprandial motility, G766
 water absorption, brain stem neuron regulation of, G266
 Immersion
 head-out
 ANP role in natriuresis, F375
 tissue pressure in, awake state, R358
 Immune complex, mesangial cell activation and, kidney glomerulus, F478
 Immunocytochemistry, ANF, experimental hypertension, H979
 Immunofluorescence, colchicine-induced redistribution of glycoprotein, proximal tubules, C397
 Immunoglobulins, estimation of capillary reflection coefficients, H1036
 Immunoglobulin E, mucosal reactions, gastric response to, G704
 Immunoglobulin G
 anti-atrial natriuretic peptide, congestive heart failure and, R641

Fc receptors for, mesangial cell activation, F478
 Immunoneuroendocrinology, interleukin 1-induced anorexia, corticotropin-releasing factor in, R613
 Immunoprecipitation, synthesis of angiotensinogen, renin-containing neuroblastomas, C185
 Immunotargeting, lung development, L311
 Impedance
 aortic
 hypertension and, H553
 systemic arterial system, mean pressure effects, H969
 arterial, atherosclerosis, model, H891
 transthoracic, after direct current shock, H1180
 Impulse, secretory, control of plasma hormone concentration, E299
 Indicator-dilution technique, synthetic angiotensin-converting enzyme substrate, hydrolysis of, lung, H2006
 Indolamines, catecholamine activity after hemorrhage, paraventricular hypothalamus, R370
 Indomethacin
 alleviation, coronary constriction due to neuropeptide Y, H927
 blood pressure, hypertension and normotension, H611
 cyclooxygenase inhibition, pulmonary vasoconstrictor response to, pentobarbital effects, H1140
 EDRF and nitric oxide, brain arteries, H1235
 hypoxic vasodilation, cerebral arteries, H824
 insulin effects and, kidney, F580
 lowering oxygen pressure, bronchial relaxation and, C1034
 production, ANP effects, renal medulla, F336
 sodium reabsorption and, kidney tubules, F237
 synthesis, vasopressin and angiotensin II interaction in, E617
 thermal response to, preoptic anterior hypothalamus, R816
 vasoconstriction, angiotensin II-mediated, H434
 Infant: see also Neonate; Newborn
 diabetic mother, prolonged hyperinsulinemia effects (sheep), R1199
 diet, body composition and (baboon), R1128
 saturation and proteolysis of lactoferrin, brush-border receptor-mediated uptake, G930
 Infarction
 myocardial
 ANF and nitroglycerin effects, R1481
 animals susceptible to ventricular fibrillation, H1886
 endogenous ANP role in, R641
 healed severe, hemodynamic changes, H289
 healing, coronary occlusion and reperfusion during, H365
 increased size, reduced coronary collateral blood flow and, H1798
 Infection, brain, ^{31}P -NMR spectroscopy, C1055
 Inhalation, halogenated anesthetics, simple delivery of, R668

SUBJECT INDEX TO VOLUME 257

- Inner ear, labyrinth, volume receptors (guinea pig), F341
- Inositol
 - acute regulation of organic solutes, renal, F676
 - ADH effects, kidney, F732
 - response, salt loading, renal inner medulla, F1117
- Inositol 1,4,5-trisphosphate, histamine-induced formation, phorbol ester inhibition of, airway smooth muscle, L209
- Inositol, *myo*-, osmoregulatory fluxes, renal cells, C964
- Inositol phosphate
 - accumulation
 - CCK effects, pancreatic islets, G865
 - endothelium, L259
 - calcium release and, airway epithelium, L116
 - cardiolipin-sensitive, subcellular fractions of myocardium, C926
 - intracellular calcium and, nasal gland cells (duckling), C1020
- Inositol trisphosphate, calcium and histamine dose, arterial smooth muscle (swine), C122
- Input signals, size of, sinoaortic baroreflexes and, H465
- Insulin
 - action
 - diabetes, sepsis-induced changes, E301
 - dietary protein intake effects, E212
 - blood glucose turnover and, during exercise, E405
 - central interleukin 1-elicited hyperinsulinemia, prostaglandin mediation of, R839
 - degradation, kidney epithelial cells (opossum), E895
 - 5'-deiodinase and thyroid hormones, fetal brown fat, E625
 - diabetes, impaired production of nerve growth factor, E400
 - direct effects, perfused kidney, F580
 - effects, glucose transport, forearm, compartmental model, E943
 - enhanced response to corticosterone, genetic obesity, E133
 - first-phase, loss effects on glucose production and disposal, hepatic, E241
 - food intake, hepatic glucose and, R1474
 - gastrin-releasing peptides and, E235
 - glucose uptake and, fasting and cold effects, R96
 - hyperphagia induced by, energy expenditure and diet-induced thermogenesis with, R717
 - hypoglycemia
 - brain-pituitary-adrenal response to, E757
 - naloxone effects on glucose, E367
 - inositol phosphate effects, pancreatic islets, G865
 - metabolism
 - abnormal, spontaneous hypertension and, E491
 - motor center activity and, E722
 - training effects, adipose cells, E520
 - obesity, adrenalectomy prevention of, E139
 - oxidation, mediating protein catabolism and, burns and sepsis, E323
 - paraventricular nucleus modulation, freely moving lean rats, R1370
 - plasma, changes, epinephrine thermogenesis and, E185
 - portal, during exercise, hepatic vagus nerve effects, E855
 - pulsatile delivery effects, E686
 - rapid vs. slow growth rate, gilts (pig), E554
 - receptors: see Receptors
 - release
 - diabetes, pancreatic islets, E439
 - leucine effects, pancreas (chicken), E15
 - membrane and intracellular effects of adenosine, E473
 - pattern, during hyperglycemic clamp, E704
 - resistance
 - cold-induced changes in brown fat, R292
 - time dependence of, E49
 - response, glucose-induced, E361
 - retroendocytosis, kidney cells (opossum), C190
 - rise in glucagon, exercise-induced, E108
 - secretion
 - dose-response relations to insulin, bed rest effects, E43
 - hyperglycemia and, E180
 - norepinephrine inhibition of, islet, E923
 - oscillatory, islets, E479
 - sensitivity
 - obesity effects (sheep), E772
 - tissue, VMH obesity, E255
 - serotonergic neuron response to, R1345
 - sodium transport mediated by, urinary bladder (toad), C612
 - stimulation, glucose transport, adipocytes, C714
 - suppression of whole body proteolysis, amino acids and, E839
 - transport, skeletal muscle membrane vesicles, exercise, C1128
- Insulin growth factor I
 - expression, renal hypertrophy, F252
 - sodium transport mediated by, urinary bladder (toad), C612
- Insulin-like growth factor I
 - gluconeogenesis and, renal proximal tubule, E751
 - receptors for, proximal colon epithelial cell apical membranes, E27
 - sodium-dependent inorganic phosphate transport and, kidney cells, F712
- Interleukin
 - lung cell proliferation and, L23
 - production, mesangial cells, F1065
- Interleukin 1
 - acute-phase behavior, R49
 - anorexia induced by, corticotropin-releasing factor in, R613
 - anorexic effects, R1315
 - central, hyperinsulinemia elicited by, prostaglandin mediation of, R839
 - sleep and fever induced by, corticotropin-releasing factor effects, R528
- Interleukin 1 α , TNF and, vascular endothelial permeability, L399
- Interleukin 1 β , increased, after exercise, skeletal muscle, R451
- Interval-force relations
 - inhibition of rest potentiation, ventricular muscle, H399
 - ventricular myocardium, H2036
- Intestinal cells
 - basolateral membrane, bicarbonate transport (salamander), C252
 - cryptlike, intracellular pH regulation, G732
- Intestinal mucosa, triacylglycerol pool, undergoing hydrolysis, G871
- Intestine
 - alkaline phosphatase, secretion from villous enterocytes, G14
 - anaphylaxis, gastric mucosal reactions, G704
 - angiotensin I-converting enzyme, angiotensin receptors and, G504
 - basolateral membrane vesicles, sodium-hydrogen antiporter in, G624
 - brush-border membrane vesicles, calcium uptake, F446
 - amino acid transport (eel), R506
 - sodium-dependent L-glutamate transport (eel), R180
 - chloride secretion, cardiac antisecretory peptide inhibition of, C775
 - E. coli* enterotoxin receptor localization in (opossum), F874
 - eicosanoid production, peptide responsive, G879
 - epithelial cell apical membranes, receptors for IGF-I, E27
 - epithelium
 - quinacrine effects on calcium active transport, G818
 - repair after injury, villus contraction and, G274
 - everted sacs, bidirectional calcium flux, aluminum effects, G433
 - fetal, neuropeptides in, cystic fibrosis, G561
 - glucose uptake, regional and species differences, G689
 - inflamed, altered smooth muscle contraction, G570
 - lymphatic flow, portal venous hypertension, G94
 - lymph osmolarity, during glucose and oleic acid absorption, G439
 - muscle, peristaltic reflex, G709
 - reservoir function, bolus emptying and, model, G284
 - secretion, ileal epithelial cells, G86
 - slow-wave propagation, postprandial changes, cell coupling and, G463
 - transcellular calcium transport, theophylline inhibition of, G935
 - transit, spatial and temporal patterns of contractions, G423
 - transport, sigmoidal curves, G982
 - triolein absorption, suckling and adult, G823
 - vascularly perfused recirculating, function and stability of, G249
 - water absorption, brain stem neuron regulation of, G266
- Intestine, small
 - basolateral membrane, lipid composition, G138
 - brush-border membranes, protein-lipid interactions, G809
 - brush-border membrane vesicles
 - glutamine transport in, G80
 - taurine transport in, G65
 - crypt-villus axis, secretagogue effects, G334
 - intervillous pH profiles, demonstration and modification of, G489
 - receptors: see Receptors

Introducer sheath, high-fidelity manometers, H1312

Iododermethylipramine, myocardial flow heterogeneity, fractal networks, H1670

Iodothyronine 5'-deiodinase, activity, brown fat, during fetal life, E625

Ions
homeostasis, anoxic brain (turtle), R854
leakage, brain anoxia (turtle), R1562
transport, gallbladder (pig), C45, C52
renal, sodium effects, F1

Ion channels
density, energy expenditure relations, brain (turtle, rat), R1354
sweat gland cells, C129

Ionophore A23187
absorption losses (baboon), C1166
angiotensin II stimulation, vascular smooth muscle cells, C629
mediating action of carbachol and, T84 cells, C976
potassium channel induced by, macrophages, C77

Ionophore A23187
absorption losses (baboon), C1166
angiotensin II stimulation, vascular smooth muscle cells, C629
differential sensitivity to endothelin and, arteries and veins, H1127
relaxation, coronary artery, H1096

IP₃: see Inositol 1,4,5-trisphosphate

Iron
absorption, proteolysis of lactoferrin, G930
deficiency, respiratory control and, muscle mitochondria, C1080
intracellular, role in xanthine oxidase-induced endothelial injury, H1640
uptake, endotoxin effects, hepatocytes, G524

Ischemia
cardiac
arachidonic acid metabolism and, H444
laser backscatter studies, H665
phospholipid membrane degradation, H252
sequential topographical portrayal of blood flow, H635

cerebral
blood flow and oxygen consumption with, newborn (pig), H1917
carbon dioxide reactivity and heterogeneity, H473
energy-dependent cell volume maintenance, C817
vascular effects, newborn (pig), H266

chronic, coronary collateral vessels, H1634

coronary, post-exercise, H113

intestinal
adenosine effects on leukocyte adherence, H1334
radical production during, G409

myocardial
adenosine attenuation of, H244
animals susceptible to ventricular fibrillation, H1886
blood flow during infarct healing, H365
fish oil and, H1204
increased infarct size and, H1798
intracoronary endothelin, H339
purine metabolism, H47
 β -receptors in, H1032

renal
cyclosporine effects, F837
oxygen free radical species role in, F114
proximal tubule suspensions from, F383
simulated, pH and, ventricular muscle (guinea pig), C365

Ischemia-reperfusion
leukocyte adherence induced by, adenosine effects, H1334
leukocyte adherence to venular endothelium during, G683

Islet hormones, release, β -endorphins, E361

Isobutyric acid, chloride channel blockers and, cortical collecting duct, C102

Isoenzymes, sodium-potassium-ATPase, regulation by thyroid hormone (ferret), H534

Isoflurane, halothane and, rapid cooling contractures in myocardial tissue, H1804

Isometric relaxation, cardiac, determinants of force decline during, H1490

Isomyosin, transitions, creatine analogue-induced, muscle, C810

Isoproterenol
action potentials, hyperthyroid myocytes, C957
adrenergic responses, hyperthyroid myocytes, C948
 β -adrenergic stimulation with, glomerular hemodynamics and, F866
cerebral ischemia, newborn (pig), H266
chloride current and, ventricular myocytes, C1177
hydrogen gas clearance curves, computerized curve fitting, G668
infusion, ANF release during, R896
kinetics, plasma clearance and, E743
nonuniform shortening, anterior wall, left ventricle, H1165
prostacyclin synthesis induced by, modulation by cAMP, heart, R771
pulmonary endothelial permeability and, thrombin-induced, H1613
renin release stimulation by, endothelin effects, E833

Isotopes
radioactive, sequential topographical portrayal of blood flow, H635
stable
glucocorticosteroid effects, E712
ketogenesis and sepsis, E665

Isovolumic relaxation rates, nonuniformity, volume loading and, H1927

J

Jejunal mucosa, permeability, hydrochloric acid effects, G653

Jejunum
basolateral membrane, lipid composition, G138
brush-border membrane vesicles
glutamine transport in, G80
taurine transport in, G65
contractions, spatial and temporal patterns, G423
crypt-villus axis, secretagogue effects, G334
hyperemia and oxygen uptake, prostanooids in, G798
longitudinal muscle, altered contraction in inflammation, G570

responses, *E. coli* enterotoxin, G118

Jet lag, simulated, circadian rhythms and patterns of performance (monkey), R796

Junction
gap
demonstration of, skin epithelium (frog), C658
hepatocyte pairs, cAMP effects, C1
intercellular, protein localization, C621

Juxtaglomerular apparatus, oxytocin-binding sites in, autoradiography of, F310

Juxtaglomerular cells, renin release, endothelin effects, E833

K

Kainic acid
fastigial nucleus pressor response and, R1436
hypertensive response and, after AV3V lesions, R80

Kallikreins
renal, sodium and water intake effects, F353
responses, dietary protein, renal, F718

Ketamine, fentanyl and, lung metabolism, E379

Ketanserin, 5-HT endocardium-mediated response and, myocardium, H1790

Ketogenesis
decreased, liver, obesity and, R822
sepsis and, E665

Ketoisocaproate, metabolism, reciprocal pool model, E385

α -Ketoisocaproic acid, insulin release and, pancreas (chicken), E15

Ketone body, flux, regulation, sepsis and, E665

Kidney
abnormal insulin metabolism, after spontaneous hypertension, E491
acid-base balance, organic anions in, F170
acidic renin formation, stroke-prone hypertension, F275
aldosterone binding sites, species differences, R87
aldosterone receptors, A6 cells, C665
ANF actions, model, F1146
ascending thin limb, chloride ion transport (hamster), F92
brush-border membrane, calcium effects on sodium-glucose cotransport, F126
brush-border membrane vesicles, low-affinity transport of pyroglutaryl-histidine, C971
calcium transport, overview, F707
catecholamine levels, anoxia effects (carp), R10
clearance, rapid atrial pacing effects, cardiac-denervated dogs, R162
collecting duct
correction of metabolic alkalosis, F107
endothelin in, C1101
hydrogen-bicarbonate transport, glucagon effects, F1003
contraction rhythms, calyceal and pelvic, R788
cortex: see Kidney cortex
cortical collecting duct
bicarbonate and chloride channel blockers and, C102
bicarbonate effects on chloride self-exchange, C94

Kidney (continued)

- phosphatidates, vasopressin-induced water transport and, F524
- decapsulation
 - effects on natriuresis, R44
 - pressure natriuresis and, hypertension, F785
- denervation, distal acidification and, F72
- developing, renin mRNA distribution in, F850
- diuresis and natriuresis, organic osmolyte distribution in, F602
- dopamine DA₁ receptors, autoradiographic localization, F414
- E. coli* enterotoxin receptor localization in (opossum), F874
- epithelia
 - inorganic phosphate transport, sodium-dependent, IGF-I effects, F712
 - regulation of water permeability, C837
- epithelial cells, sodium-independent sugar transport, F11
- excretory function, arterial chemoreceptor and reflex control of, R1282
- failure
 - glycerol-induced, hydrogen peroxide generation in, F440
 - ischemic acute, xanthine oxidase inhibition effects, F953
- function
 - colloid osmotic pressure in, F23
 - intrarenal dopamine, F469
 - volume expansion, renal nerves in, newborn, awake state (lamb), R1519
- glomerulus: see Kidney glomerulus
- glucose synthesis, mitochondrial carbonic anhydrase, E791
- glucose transport, mutant renal LLC-PK₁ cells in, F1039
- growth hormone-insulin-like growth factor axis, F503
- hypertrophy, insulin growth factor I expression in, F252
- injury, puromycin nephrosis and, F798
- inner medullary collecting duct, calcium transport, F738
- inorganic phosphate reabsorption, GH-releasing factor inhibition, F29
- inorganic sulfate excretion, adaptability (teleost), R511
- insulin effects, F580
- ion transport and cell growth, sodium effects, F1
- kallikrein and kinin responses, dietary protein, F718
- lactic acidosis, exercise-induced, R102
- long-chain fatty acids, mediated transport of, basolateral membrane, F539
- magnesium restriction, adaptation of magnesium reabsorption and, F974
- D-mannose transport system, brush-border membranes, F1100
- maturing, dopamine receptors in, F315
- mental stress and epinephrine effects, F682
- mesangial cells, mitogenic effects of serotonin, F431
- metabolism
 - growth hormone stimulation, proximal tubule, E751
 - urinary excretion of thromboxane B₂ and, F77
- mitochondria: see Kidney mitochondria
- organic osmolytes, ADH effects, F732
- oxytocin-binding sites in, autoradiography of, F310

- papilla: see Kidney papilla
 - phosphate absorption, during development (guinea pig), F268
 - phosphoenolpyruvate carboxykinase mRNA induction, F145
 - plasma flow, DOCA hypertension (pig), R1467
 - potassium transport, adaptations, R989
 - regulation, epidermal growth factor receptors, F1059
 - renin secretion, neuronally released norepinephrine and (sheep), R765
 - responses to ANF
 - chronic caval constriction and, R1057
 - cirrhosis and, R1068
 - experimental low-output heart failure, R917
 - response to volume expansion, streptozotocin-induced diabetes and, R672
 - sodium-glucose cotransporter, diabetes effects, C385
 - sympathetic nerve stimulation, renal nerve function and (monkey), F204
 - thick ascending limb, calcium ion-activated potassium channels, F347
 - tissue, evidence for cholinergic innervation, F746
 - transplantation, hypertension and, F197
 - tubules: see Kidney tubules
 - tubuloglomerular feedback signal transmission, F882
 - vascular reactivity, sensitive α_2 -adrenoceptor-mediated, F1132
 - vascular responses, eicosanoid release and, diabetes, F762
- Kidney cells
- cortical collecting tubular, bradykinin activation of protein kinase C, F808
 - cortical epithelial, ammoniogenesis in, F705
- epithelial
- apical membrane glycoprotein, colchicine-induced redistribution of, C397
 - C5b-9 complex activation of phospholipases, F826
 - degradation of insulin (opossum), E895
 - epithelial monolayers, repolarization of sodium-potassium pumps, C896
 - glomerular, leukotriene D₄ signaling pathways in, C232
 - glycerophosphorylcholine content, osmoregulation effects, C795
 - inner medullary collecting duct, hydrogen secretion, F487
 - inorganic phosphate transport, sodium-dependent, IGF-I effects, F712
 - insulin retroendocytosis by (opossum), C190
 - osmoregulatory fluxes, myo-inositol and betaine, C964
 - papillary epithelial, sorbitol transport mechanisms, F937
 - proximal tubular
 - nephrocalcin production, F390
 - peptide YY receptors for, F978
 - protein kinase A, cytosolic calcium, and phosphate uptake in, F631
 - sodium-phosphate cotransport, PTH inhibition of (opossum), F967
- Kidney cortex
- long-chain fatty acids, mediated transport of, basolateral membrane, F539
 - necrosis, experimental, F925
 - thick ascending limb, basolateral membrane potentials, F463

Kidney glomerulus

- ANF receptor subtype expression, F649
 - B₂-kinin-binding sites, sodium and water intake effects, F353
 - dynamics, β_1 -adrenergic blockade effects, F225
 - dysfunction, induced by reactive oxygen species, F53
 - function, pregnancy effects, spontaneous hypertension, F1140
 - growth hormone-insulin-like growth factor axis, F503
 - hemodynamics, β -adrenergic stimulation with isoproterenol, F866
 - immune injury, tubuloglomerular feedback after, F67
 - inflammation, mesangial cells, F1065
 - mesangial cells
 - immune complexes and, F478
 - leukotriene binding and signal transduction, F280
 - mitogenic signals for thrombin, mesangial cells, F366
- Kidney medulla
- ascending thin limb, chloride ion transport (hamster), F92
 - inner collecting duct
 - cell pH, cytosolic calcium effects, F210
 - phloretin inhibition of urea transport, F358
 - prostaglandin E₂ and sodium-potassium-ATPase in, F424
 - necrosis, natriuretic effects of atriopeptin II, F859
 - organic solutes, acute regulation, F676
 - phosphate transport, pH gradient-stimulated (pig), F638
 - prostaglandin production, ANP effects, F336
 - salt loading, methylamine and polyol responses, F1117
 - transcapillary fluid movement in, small-solute gradient effects, F547
 - two-nephron central core model, electrolyte, water, and urea transport, F399
- Kidney mitochondria
- cyclosporine effects, blood flow and, F837
 - ischemia, oxygen free radical species role in, F114
- Kidney papilla
- ANF receptor subtype expression, F649
 - inner medullary collecting duct, hydrogen secretion, F487
 - necrosis, natriuretic effects of atriopeptin II, F859
 - necrosis, natriuretic response to hypervolemia, R422
 - organic osmolytes, ADH effects, F732
 - surface epithelium, chloride and water permeability of, F218
- Kidney tubules
- collecting, aldosterone effects on NEM-sensitive ATPase, F177
 - continuous flow quantitation, sodium and potassium ions, F893
 - cortical
 - cells, pH effects on growth, C419
 - chronic hypocapnia, sodium-hydrogen exchange in, F615
 - cortical collecting
 - potassium and rubidium ion transport, F43
 - sodium-potassium pump stimulation, F595

SUBJECT INDEX TO VOLUME 257

cortical proximal, calcium absorption in, F262
 dissecting, aldosterone binding sites, species differences, R87
 distal
 magnesium restriction effects, F974
 plasma membrane calcium pump and 28-kDa in, F842
 potassium transport, adaptations, R989
 distal convoluted
 bicarbonate, neural control of, F72
 correction of metabolic alkalosis, F107
 electrical properties, F288
 epithelial cells, endothelin in, C1101
 epithelium
 molecular events in organization of, F913
 regulation of water permeability, C837
 function, intrarenal dopamine, F469
 hydrogen-bicarbonate transport, glucagon effects, F1003
 necrosis, natriuretic effects of atriopeptin II, F859
 proximal
 acidosis, 4-pentenoate infusion and, F959
 ADH effects on lithium marker, F899
 apical membrane glycoprotein, colchicine-induced redistribution of, C397
 basolateral sodium-coupled acid-base transport, F790
 bicarbonate reabsorption, metabolic acidosis effects, F35
 cation channels, F328
 cytoplasmic free calcium ion response in, F724
 dopamine DA₁ receptors in, F414
 glucose synthesis, E791
 glucose transport, LLC-PK₁ cells and, F1039
 glycolytic and oxidative metabolism in, C333
 growth hormone stimulation of gluconeogenesis, E751
 intracellular acidic compartments, F454
 ischemic, metabolic alterations in suspensions from, F383
 ischemic, oxygen free radical species role in, F114
 luminal acidification, acetate effects, F586
 lysosomes, thyroid hormone effects on gentamicin, F86
 membrane dynamics (snake), R982
 nephrocalcin production in, F390
 nicotinamide analogue effects on cAMP, F1021
 reflection coefficients and water permeability, F658
 shunt pathway permselectivity, F1079
 sodium-hydrogen antiporters, PTH-induced translocation of, C637
 sodium-independent sugar transport, F11
 sodium reabsorption, arachidonic acid infusion effects, F237
 volume regulation, hyperosmotic media, C1093
 water reabsorption, F669
 proximal straight
 ANF inhibition by angiotensin, F907
 carbonic anhydrase inhibitor effects on basolateral base transport, F947

spontaneously hypertensive, increased oxidative metabolism in, F818
 Kininase II, angiotensin receptors and, intestine, G504
 Kinins, responses, dietary protein, renal, F718
 Kupffer cells, CCK processing, G242

L

L 364718, food intake stimulation, R1512
 Labyrinthine epithelium, sodium absorption, F182
 Lacrimal gland, inhibition of secretion, Met-enkephalin analogue, G151
 Lactase
 new insights into activities, lactase-phlorizin hydrolase, G616
 perinatal expression, colon, G496
 Lactase-phlorizin hydrolase, activities, G616
 Lactate
 clearance, during hyperlactatemia, endurance training effects, E782
 glycogen pathways and, hepatic, E145, E158
 metabolism
 experimental Fanconi's syndrome and, F959
 renal proximal tubule cultures, C333
 plasma, rapid activation of gluconeogenesis after, E486
 sweat, peripheral arterial occlusive disease (calf), H395
 threshold, exercise, E405
 Lactate dehydrogenase, brain biochemistry, species differences (rat, turtle), R1083
 Lactation: *see also* Fetus; Placenta; Pregnancy
 γ -glutamyl cycle, amino acid metabolism and, E916
 Lactoferrin, saturation and proteolysis, brush-border receptor-mediated uptake, G930
 Lactogen, placental, ethanol effects, E561
 Lactose, new insights into activities, lactase-phlorizin hydrolase, G616
 Laminar flow, taurocholate, liver, compartmental model, G210
 Laminin, extracellular matrix components, L331
 Lanthanum, calcium increase and, mesangial cells, F1094
 Larvae, lepidopteran, amino acid transport, R494
 Laser, backscatter studies, intracellular calcium ion oscillations, heart, H665
 Lecithin, vesicular secretion, G1
 Lectin
 binding sites, atrial peptide secretory pathway, H1587
 calcium-dependent, lung, L421
 capillary density and, sternomastoid muscle, H344
 Leprechaunism, insulin receptors, radioimmunoassay, E451
 Leucine
 flux, carbohydrate overfeeding and, E413
 glucocorticosteroid effects, E712
 insulin and glucose oxidation effects, burns and sepsis, E323
 intracellular free, reciprocal pool model, E385
 turnover, averages of ratios, E125

transport, pigment epithelium, metabolic stress effects, eye (bovine), C940
 whole body protein synthesis and, E639
 L-Leucine, insulin release and, pancreas (chicken), E15
 Leukocytes
 adherence and extravasation, ischemia-reperfusion-induced, adenosine effects, H1334
 adherence to venular endothelium, during ischemia-reperfusion, G683
 endothelial cell interactions, reperfusion-induced, superoxide mediation of, H1740
 mononuclear
 aldosterone and lymphocyte volume, E170
 during sodium restriction, E499
 polymorphonuclear
 reactive oxygen species, glomerular dysfunction induced by, F53
 vascular tone, modulation by neutrophils, H1315
 reperfusion injury and, skeletal muscle, H1068
 Leukotrienes
 circulation and, cerebral, H834
 comparison of effects, distal colonic motility, G860
 eicosanoid production and, intestine, G879
 lung injury, fatty acid deficiency and, H1192
 vasoconstriction and, lung, H1977
 Leukotriene antagonists, oxygen reactivity and, arteriolar (hamster), H1565
 Leukotriene D₄
 binding, signal transduction and, glomerular mesangial cells, F280
 signaling pathways, glomerular epithelial cells, C232
 Leydig cells, steroidogenesis in, nonsterified fatty acid modulation of, E937
 Lidocaine, binding site, cardiac cells, H79
 Light, bright, temperature rhythm and, R136
 Lingual epithelium, hyperosmotic sodium chloride effects, thermodynamic model, G475
 Linoleic acid, infusion, blood pressure and, hypertension and normotension, H611
 Lipectomy, removal of brown fat, compensation by other depots, R253
 Lipid particles, triglyceride-rich, serum triglyceride response to, E860
 Lipids
 biliary, vesicular secretion, G1
 composition
 basolateral membrane, small intestine, G138
 microvascular endothelial cells, dexamethasone effects, C512
 small intestinal brush-border membranes, G809
 glucose interaction, time dependence of, E49
 metabolism
 magnesium deficiency and erythrocyte membrane fluidity, weanlings, C270
 neutral, intestinal mucosa, G871
 norepinephrine inhibition of, islet, E923
 vitamin D₃-induced changes, monocyte-macrophages, E290

- Lipids (continued)**
 peroxidation
 hypoxia and endothelial cell plasma membranes (pig), C223
 proximal tubular ischemia, F114
 solubility, intramural diffusion barrier effects (hamster), H10
Lipid-water interface, fatty acid fluxes
 across, albumin effects, G904
Lipogenesis
 brown fat GDP binding and, hibernation and arousal (squirrel), R536
 inhibitor of, obesity and, R326
 responses to short days, regional differences (hamster), R1533
 tube feeding and, brown fat, E374
Lipolysis
 adenylate cyclase and, α_1 -adenosine receptor-mediated inhibition, adipocytes, E871
 during fasting, β -adrenergic blockade effects, E65
Lipopolysaccharides
 endotoxin effects
 lung, L61
 pulmonary endothelial cells, L65
Lipoproteins
 high-density, catabolism, liver (monkey), G644
 low-density, transport, blood vessel walls (monkey), H452
 metabolism, vitamin D₃-induced changes, monocyte-macrophages, E290
 pulmonary surfactant, L13
 very low density, after acute triglyceride administration, E860
Lipoprotein lipase
 brown fat
 norepinephrine and denervation effects (hamster), R396
 short photoperiod and cold activation of (hamster), R1123
 cholera toxin effects, gene expression in brown fat, C920
 responses to short days, regional differences (hamster), R1533
Liposomes
 arterial smooth muscle sensitivity changes, adrenergic stimulation and, H170
 cholesterol in, calcium channels and, arterial smooth muscle, C306
Lipostatic factor, putative, site of action, R224
Lipoxygenase inhibitor, vasoconstriction and, lung, H1977
Lithium
 ADH effects, proximal tubule delivery, F899
 ANP and natriuresis, head-out immersion, F375
 clearance, pregnancy, R909
Litorin, inhibition of feeding, R1219
Liver
 abnormal insulin metabolism, after spontaneous hypertension, E491
 aerobic and anaerobic conditions, cyanide toxicity in, C435
 amino acid arteriovenous differences, fetus (lamb), E909
 bicarbonate secretion, pH regulation and, G317
 bile, cholesterol delivery to (monkey), G644
 cells: see Hepatocytes
 decreased ketogenesis and, obesity effects, R822
 fibronectin synthesis, contribution of, R1406
 function
 assessment by allopurinol kinetics, models, R237
 ureagenesis, acid-base balance and, F696
 gap junctions between hepatocytes, cAMP effects, C1
 glucose output, measured with labeled glucose, E531
 glucose production
 disposal and, loss of first-phase insulin secretion and, E241
 escape, during hyperglycemic clamp, E704
 glucose uptake, diurnal fluctuations, E459
 glutamate handling, growth hormone effects, E959
 glutamine synthesis during fasting, ammonium ion effects, E514
 glycogen formation, direct pathway, E145, E158
 glycogenolysis and gluconeogenesis, exercise-induced glucagon rise effects, E108
 glycogen repletion
 dietary protein intake effects, E212
 route of glucose administration effects, E681
 glycogen synthesis, glucose-galactose paradox in, neonate, E697
 graft, arteriovenous fistula size effects, H1971
 hemorrhagic hypotension, catecholamines and glucose in, R317
 hypoxic, cell death, oxygen pressure and glycolysis in, G58
 portal glucose concentration, food intake and metabolism with, R1474
 potassium ion fluxes, volume-regulatory, G357
 sodium-hydrogen exchange, ursodeoxycholate-induced changes, G371
 taurocholate transport, compartmental model, G210
 thyroxine transport, model, E764
 vagus nerve, pancreatic hormone secretion during exercise and, E855
LLC-PK₁ cells
 mutant renal, renal glucose transport and, F1039
 sugar transport, sodium-independent, F11
Loading
 intravenous test, liver function, R237
 viscous, contractile function of cardiocytes, H1717
 volume, isovolumic relaxation rates and, H1927
Lung
 adenocarcinoma cell line, glucocorticoid regulation of surfactant protein synthesis, L385
 alveolar phospholipid uptake, secretagogues for surfactant and, L248
 alveoli
 dimension and number, L240
 postnatal development, short-term perinatal oxygen effects, L221
 cAMP changes, after partial pneumonectomy, E261
 chemotaxis, bronchial epithelial cells, L71
 compensatory growth
 after pneumonectomy, C528
 physical forces and, L179
 denervation, vascular capacitance in systemic circulation and, R1004
 development
 dexamethasone effects, postnatal, L137
 fatty acid biosynthesis, fetus, L195
 immunotargeting, L311
 endothelial enzyme substrate metabolism, transit time effects, H853
 endothelium, phospholipase A₂ activation in, L430
 epithelium, spermidine uptake, L346
 filtration coefficient, lysophosphatidylcholine effects, H1466
 hemodynamics, histamine effects, H618
 hyaluronan accumulation, pulmonary edema and, L379
 immunity, chemoattraction on monocytes, L130
 inflation reflex, vascular capacitance in systemic circulation and, R1004
 injury
 cobra venom factor, fatty acid deficiency and, H1192
 polypeptide growth factors and, L23
 tumor necrosis factor-induced, platelet-activating factor and, L232
 liquid secretion, β -adrenergic blockade effects, during fetal asphyxia (sheep), R705
 lymph: see Lymph
 metabolism, ketamine and fentanyl effects, E379
 perinatal, substrate utilization, L318
 phospholipid transfer proteins, L190
 polyamine uptake, inflation-associated increases, E729
 sodium transport, cAMP and, L86
 spermidine uptake, localization, C579
 superoxide dismutase mRNA, endotoxin effects, L61
 surfactant
 apoproteins, review, L13
 historical perspectives, L1
 hydrophobic, processing in type II cells, L100
 regulation by intracellular pH, L354
 surfactant protein SP-A, studies of structure, L421
 synthetic angiotensin-converting enzyme substrate, hydrolysis of, H2006
 vascular surface, peptidase enzymes of, L53
 vasoconstriction in

- Nephrotoxicity**, thyroid hormone effects, proximal tubule lysosomes, F86
- Nerve growth factor**, impaired production, submandibular gland, diabetes and, E400
- Nerve traffic**, analysis, microprocessor-based, R958
- Neural control**
- blood flow, during hemorrhage, H1507
- distal tubular bicarbonate, F72
- gastric, autoregulatory escape from sympathetic stimulation, G633
- intramural, sphincter of Oddi (opossum), G925
- muscle blood flow, hypoxic hypoxia, H1581
- smooth muscle peristalsis, esophagus, G517
- Neural mechanisms**, pancreatic polypeptides, awake state, G134
- Neuroblastoma**, renin-containing, synthesis of angiotensinogen in, C185
- Neurogenic control**, cerebral blood flow, H297
- Neurohypophyseal hormones**, total translation, R109
- Neurohypophysis**, vasopressin and oxytocin, total translation of, R109
- Neurokinin A**, transmitters of ascending contractile component, peristaltic reflex, G709
- Neuronal cultures**
- angiotensin II binding sites in, regulation by catecholamines, C706
- immunoreactive angiotensin II from, C588
- Neurons**
- magnocellular, total translation of vasopressin and oxytocin, R109
- nonadrenergic, nucleus tractus solitarius effects on vasopressin cells, R1020
- response to circulating CCK, capsaicin attenuation of, R1162
- rostral ventromedial medulla, EEG/EMG pattern changes, R1496
- serotonergic, response to glucose and insulin administration, R1345
- spinal and spinoreticular, intracardiac bradykinin and capsaicin effects, H1543
- spinothalamic, vagal afferent inhibition of (monkey), R889
- thermosensitive
- diencephalon, R57
- diencephalon, synaptic blockade effects, R65
- ventrolateral medullary, pressor reflex to muscular contraction and, R1154
- Neuropeptides**
- acetylcholine release and, heart, H483
- action and distribution, ileocecal sphincter region, G447
- activity, mast cells, airway function and, L39
- anorexia, interleukin 1-induced, R613
- binding sites, macula densa, F310
- cardiac, contractile effects of, atrial and ventricular muscles, H1082
- central effects of, R588
- receptors and, cystic fibrosis, fetus, G561
- release
- ganglia of myenteric plexus (guinea pig), G313
- ileum, G182
- vagal stimulation of bicarbonate, duodenum, G677
- Neuropeptide Y**
- biological action, genital tract, female, E220
- coronary constriction due to, cyclooxygenase blocker effects, H927
- lateral cerebroventricular injection, stimulation of feeding (sheep), R383
- posterior hypothalamic injection, mechanism of pressor response to, H791
- release, sympathetic discharge pattern effects, H866
- Neurotensin**, inotropic effects, atrial and ventricular muscles, H1082
- Neurotransmission**
- cholinergic, calcium-dependent potassium channels, C481
- endothelium and calcium in, H1871
- Neurotransmitters**
- acetylcholine release and, heart, H483
- amino acid, dilator effects of, pial arterioles (piglet), H1200
- chemical synaptic transmission, cellular and molecular mechanisms, L289
- esophageal circular smooth muscle, G380
- release, ganglia of myenteric plexus (guinea pig), G313
- tachykinins and, peristaltic reflex, G709
- Neutrophic regulation**, regenerated muscle, C495
- Neutrophils**
- exocytosis and respiratory burst in, suppressive action of cobalt, C859
- modulation of vascular tone, endothelial integrity and, H1315
- TNF priming of, hypochlorous acid production, L338
- transformation, hemorrhagic shock, H846
- Newborn: see also Infant; Neonate**
- blood-induced superoxide anion generation, cerebral cortex (pig), H1560
- cerebral ischemia, vascular effects (pig), H266
- cerebral microcirculation, endothelin influences (piglet), H707
- cerebrovascular response to hypoxia, chemodenervation effects (sheep), H1413
- hemorrhage, blood volume redistribution after (lamb), R647
- ischemia effects, cerebral blood flow and oxygen consumption (pig), H1917
- lactase-phlorizin hydrolase activities, G616
- phosphate reabsorption, renal, during development (guinea pig), F268
- renin mRNA distribution, developing kidney, F850
- renin secretion, neuronally released norepinephrine and (sheep), R765
- volume expansion, renal nerve role in, awake state (lamb), R1519
- Nicardipine**
- fluid and protein shift and, transcapillary, R174
- potent long-lasting vasoconstrictor, men, H2033
- Nicotinamide analogue**, cAMP increase and, proximal tubules, F1021
- Nifedipine**
- brown fat, during fetal life, E625
- calcium increase and, mesangial cells, F1094
- potassium-chloride-induced depolarization, afferent and efferent arterioles, F561
- synthesis, vasopressin and angiotensin II interaction in, E617
- Nigericin**, chloride self-exchange and, cortical collecting duct, C94
- Nitric oxide**
- differential sensitivity to, arteries and veins, H1127
- femoral vein, H1910
- smooth muscle response to, basilar artery, H1235
- Nitro blue tetrazolium test**, neutrophil transformation, hemorrhagic shock, H846
- Nitrogen**
- blood urea, insulin resistance and, E193
- metabolism, during fasting, liver, E514
- Nitroglycerin**, hemodynamic effects, congestive heart failure, R1481
- 5-Nitro-2-(3-phenylpropylamino)-benzoic acid**, chloride channel blockers and, cortical collecting duct, C102
- Nitroprusside**
- ANP and, mesangial cell relaxation, C86
- dilator response to, endothelial impairment effects, H1485
- norepinephrine release and, renal sympathetic nerve activity, R229
- Nitrovasodilators**, EDRF and, femoral vein, H1910
- Nonadrenergic inhibitory nerves**, intramural control, sphincter of Oddi (opossum), G925
- Nonrecirculating system**, halogenated inhalation anesthetics, simple delivery of, R668
- Nordihydroguaiaretic acid**, vasoconstriction and, lung, H1977
- Norepinephrine**
- α -adrenergic receptor function, species differences, R1110
- β -adrenergic receptor, during sodium restriction, E499
- ANF infusion effects, fetus (lamb), R580
- anoxia effects, brain and kidney (carp), R10
- arterial smooth muscle sensitivity

Norepinephrine (*continued*)

- changes, adrenergic stimulation and, H170
 - attenuated pressor response, third cerebral ventricle lesions, R431
 - biological action, genital tract, female, E220
 - caffeine interactions, calcium role in, cardiac Purkinje fibers, H226
 - carbohydrate-induced thermogenesis and, skeletal muscle, E340
 - cerebral ischemia, newborn (pig), H266
 - conjugated, response to hypoxia, fetus (sheep), E198
 - denervation and, brown fat (hamster), R396
 - hepatic, during hemorrhage, R317
 - hormonal responses
 - exercise, E95
 - exercise, hepatic vagotomy and, E855
 - hypertensive response and, after AV3V lesions, R80
 - injection, paraventricular nucleus, glycemia and insulinemia control, R1370
 - insulin-induced hypoglycemia and, naloxone effects, E367
 - ion transport and, gallbladder (pig), C52
 - kinetics, E743
 - left ventricular, gradual overload and (guinea pig), H1016
 - lipid metabolism, calcium uptake, and insulin secretion, islet, E923
 - metabolism, motor center activity and, E722
 - neuronally released, renin secretion and (sheep), R765
 - neural uptake and, saphenous vein, H1945
 - plasma
 - aging effects, H961
 - eating and, renal sympathetic nerve activity and, R1034
 - response to hemorrhage, stress immobilization effects, R661
 - portal and mesenteric veins and, portal hypertension, G977
 - potassium-dependent activation, hypertension, renal tubules, F818
 - rapid stimulation, contraction of ear artery and, H649
 - regulation of angiotensin II, neuronal cultures, C706
 - release
 - muscle sympathetic activity and, during mental challenge, E654
 - renal sympathetic nerve activity and, R229
 - sympathetic discharge pattern effects, H866
 - renin release, neural stimulation of, ANF effects, E332
 - spillover, muscle, during exercise, H1812
 - stimulation, glucose transport, adipocytes, C714
 - thermal response to, preoptic anterior hypothalamus, R816
 - thyroxine, brown fat and cold, E81
 - tube feeding and, brown fat, E374
 - vasoconstriction and, lung, H1977
- NPY: *see* Neuropeptide Y
- Nuclear magnetic resonance
- cytosolic free magnesium, heart cells (chick), C141
- P-31
- brain during sepsis, C1055

- Omeprazole
- pH regulation, parietal cells, C554
 - sodium-potassium-ATPase, compartmentalization, G539
- Oncogenes, renal tubular epithelium, F913
- Ontogeny, dopamine receptors, adult and maturing kidney, F315
- Oocytes
- functional sodium-potassium-ATPase expression in, β -subunit role in (frog), C851
 - respiratory epithelium, amiloride-inhibitable sodium ion conductance from mRNA, L284
 - sodium channels, amiloride blockable (*Xenopus*), C825
- μ -Opioid peptides, modulation, response to stress, R901
- Opioids
- regulation of plasma motilin by, G41
 - release, ileum, G182
- Orchidectomy, energy balance in, exercise training effects, R550
- Organic acid, cell swelling and potassium, rectal gland (shark), C377
- Ornithine decarboxylase, gastric and duodenal mucosal, induction during stress, G259
- Orosomucoid, modulation of microvessel wall charge (frog), H1354
- Osmolarity, lymph, intestinal, during glucose and oleic acid absorption, G439
- Osmolytes
- brain, salt-loading and, F1108
 - cell volume regulation, C159
- organic
- ADH effects, renal, F732
 - distribution in diuresis and antidiuresis, kidney, F602
 - myo-inositol and betaine fluxes, C964
 - sorbitol transport, renal papillary epithelial cells, F937
 - volume regulation, hyperosmotic media, proximal tubules, C1093
- Osmoregulation
- body fluid compartmentalization and, dehydrated heat exposure (pigeon), R377
 - glycerophosphorylcholine content, renal cells, C795
 - myo-inositol and betaine, renal cells, C964
 - potassium transport, erythrocytes and sickle cells, C114
 - thirst, vasopressin release and, pregnancy, F159
- Osmotic gradient, transepithelial, ADH effects, bladder (toad), R998
- Osmotic stimulation, central, vasopressin, ANP, and blood pressure response, E611
- Osteoblastic cells, phospholipase C and calcium, endothelin-1 activation, E797
- Osteoblasts
- function, simulated weightlessness effects, R1103
 - modulation of function, prostaglandins, F755
- Osteocalcin, bone calcium and, simulated weightlessness effects, R1103

- Osteopenia**
 disuse, bone response to normal weight bearing after, E606
 sex hormones and, E903
- Osteoporosis**
 disuse, simulated weightlessness effects, R1103
 postmenopausal, sex hormone effects, E903
- Ouabain**
 brain sodium-potassium-ATPase differences, male-female, E284
 calcium transport and, inner medullary collecting duct, F738
 contractility, cardiomyopathic heart (hamster), H1836
 EDRF release and, arteries, H330
 energy expenditure and ion channels, brain (turtle, rat), R1354
 impulse propagation and electrical coupling, Purkinje fibers (sheep), H179
 neural thermosensitivity and, hypothalamic tissue slices, R21
 PAH fluxes and, airway, C1108
 potassium-dependent activation, hypertension, renal tubules, F818
 prostaglandin E₂ and sodium-potassium-ATPase, medullary collecting duct, F424
 sodium absorption, across labyrinthine epithelium, F182
 sodium ion electrochemical gradient, proximal tubule, F531
 volume-regulatory potassium ion fluxes and, liver, G357
- Ovariectomy, estradiol and, unity of female circadian rhythms, R1241**
- Ovary, development, fall mating effects (snake), R1548**
- Overhydration**
 interstitial exclusion of albumin during, dermis and subcutis, H1819
 platelet vasopressin receptors, homologous regulation of, R1400
- Ovulation**
 induction of, GnRH pulse frequency and, E930
 luteinizing hormone secretion, prolonged exercise effects, R1359
- Oxidant injury**
 cellular glutathione, L163
 sublethal, signal transduction and, type II pneumocytes, L217
- Oxidation**
 lactate, endurance training effects, E782
 leucine, carbohydrate overfeeding and, E413
 triolein absorption, suckling and adult, G823
- Oxidative metabolism, increased, spontaneous hypertension and, kidney tubules, F818**
- Oximeter**
 arteriovenous, oxygen and hemoglobin content, H1712
 hemoglobin concentration, oxygen content and, H1705
- Oxygen**
 arteriolar, reactivity, leukotriene antagonist effects (hamster), H1565
 consumption
 cerebral, ischemia effects, newborn (pig), H1917
 cerebral, postischemic recovery rates, H1860
 dopamine effects, healthy men, E541
 during exercise, diprydamole effects (swine), H1498
 exercise, dobutamine effects, H954
 exercise, hypothalamic influences on, H1247
 hepatocyte metabolism and, C182
 intestine and intestine-liver preparation, G249
 ischemic kidneys, F383
 myocardial, cardiac tamponade and, H726
 norepinephrine and glucose transport, brown fat, C714
 prostaglandin E₂ and, medullary collecting duct, F424
 renal proximal tubule cultures, C333
 senescence and, H1428
 content, oximeter measurement, H1705
 content difference, arteriovenous oximeter for, H1712
 cyanide toxicity in, hepatocytes, C435
 deprivation, arachidonic acid metabolism during, heart cells, H444
 diethyl maleate and, glutathione response to, erythrocytes and, L272
 endotoxin effects, lung, L61
 exposure, high, tolerance to, L226
 hyperbaric, glutathione protection from, selenium effects, L393
 metabolism, myocardial, calcium-channel blockade in hemorrhagic shock, R1012
 paradox, endothelial injury, heart (guinea pig), H488
 partial pressure, glycolysis and, hypoxic liver cell damage, G58
 pressure: *see also* Pressure
 epithelium-dependent relaxation and, bronchi, C1034
 reactive species, glomerular dysfunction and, F53
 reactivity, arteriolar, leukotriene antagonist effects (hamster), H1565
 requirements, dyskinetic myocardial segment, H1184
 saturation
 arteriovenous oximeter for, H1712
 erythropoiesis, hyperinsulinemia effects (sheep), R1199
 measurement, R439
 short-term perinatal, postnatal development of lung alveoli and, L221
 tolerance, neonates, L411
 toxicity, protection from, rest period and, L226
 transcutaneous tension, peripheral arterial occlusive disease (calf), H395
 transport, paralysis and, fetus (sheep), H734
 uptake
 calcium and gastric metabolism (toad), G969
 gastric, autoregulatory escape from sympathetic stimulation, G633
 hypertonic saline, hemorrhagic shock, H238
 postprandial jejunal, prostanoids in, G798
 ursodeoxycholate-induced changes, G371
 vasopressin reduction of, R1

 intervillous profiles, small intestine, G489
 intracellular
 afterpotentials and, myocardium (guinea pig), H996
 alveolar epithelial cells, L438
 intramitochondrial and, α -adrenergic agonist effects, proximal nephrons, F623
 parietal cells, C554, G350, G741
 phorbol myristate acetate inhibition (turtle), F1124
 regulation, IEC-6 cells, G732
 regulation of lung surfactant secretion, L354
 ursodeoxycholate-induced changes, G371
 membrane potential and potassium conductance, hepatocytes, G961
 partial hepatectomy, ureagenesis decrease and, F696
 regulation
 hepatoma cells, G317
 intracellular, proximal tubule, F790
 myocytes from adult heart, C207
 simulated ischemia and, ventricular muscle (guinea pig), C365
 stat studies, bicarbonate transport regulation, ileum, G607
 Phalloidin, thrombin-induced permeability increase and, albumin, C562
 Pharmacokinetics, selenite metabolism, model, R556
 Pharyngoesophageal sphincter, opening mechanism, G748
 Phase shift, circadian rhythms, simulated jet lag (monkey), R796
 Phenamil, early distal convoluted tubules, F288
 Phenidone, vasoconstriction, angiotensin II-mediated, H434
 Phenol, regional cardiac sympathectomy, H1523
 Phenoxybenzamine, neuropeptide Y effects and, pressor response to hypothalamic injection, H791
 Phentolamine
 insulin release and, pancreatic islets, E439
 pressor response to feeding and, newborn (lamb), R568
 Phenylalanine, whole body protein synthesis and, E639
 Phenylaminoadenosine, adenylate cyclase activity and, ventricular myocyte membrane, H1088
 Phenylarsine oxide, inhibition, endocytosis, hepatocytes, C182
 Phenylephrine
 α -adrenergic receptor function, species differences, R1110
 calcium and histamine dose, arterial smooth muscle (swine), C122
 infusion, vagal cardiopulmonary baroreflex activation, R1147
 norepinephrine release and, renal sympathetic nerve activity, R229
 pressor response, chronic portal venous hypertension, awake state, G773
 protein phosphorylation, hepatic, R1232
 vasopressin effects and, oxygen uptake, sinoaortic denervation, R1
 vasopressin release and, sex differences, R1040
 R-Phenylisopropyladenosine, glycolytic flux and, heart, H1952
 8-Phenyltheophylline, vasodepressor responses to hypoxia and, coronary, H1043
 Pheochromocytoma cells, PC-12, muscarinic suppression of potassium current, C1030
 Phloretin, inhibition of urea transport, inner medullary collecting duct, F358
 Phlorizin, sodium-glucose cotransporter and, kidney, C385
 Phorbol, amplification, arterial contractions, H1174
 Phorbol esters
 inhibition, histamine-induced IP₃ formation, airway smooth muscle, L209
 lung surfactant, alveolar phospholipid uptake and, L248
 protein phosphorylation, parietal cells, G99
 retrograde myoelectric activity and, ileum, G578
 serotonin uptake and, endothelial cells, L253
 sodium-potassium-chloride cotransport and, endothelial cells, C36
 somatostatin release and, carbachol effects, fundic D-cells, G308
 Phorbol myristate acetate
 acidification and, urinary bladder (turtle), F1124
 glomerular dysfunction and, F53
 Phosphatase, sodium-potassium-ATPase, compartmentalization, G539
 Phosphate
 high-energy, leukocytes in reperfused skeletal muscle, H1068
 high-energy bonds, model, R878
 inorganic
 reabsorption, GH-releasing factor inhibition of, F29
 sodium-dependent transport, IGF-I effects, kidney cells, F712
 low, OK cells (opossum), F967
 reabsorption
 experimental Fanconi's syndrome and, F959
 renal, during development (guinea pig), F268
 transport, pH gradient-stimulated, medullary brush-border membranes (pig), F638
 uptake, proximal renal cells, F631
 Phosphatidates, vasopressin-induced water transport and, protein kinase C activation, F524
 Phosphatidylcholine
 lung, L190
 metabolism, secretagogues for lung surfactant and, L248
 secretion, intracellular pH regulation of, lung, L354
 Phosphatidylinositol
 cardiolipin-sensitive, subcellular fractions of myocardium, C926
 lung, L190
 serotonin effects, renal mesangial cells, F431
 turnover, nasal gland cells (duckling), C1020
 Phosphocreatine
 ATP utilization, skeletal muscle during tetanic contraction, E595
 cerebral, postischemic recovery rate, H1860
 kinetics, linear dependence of, muscle, C1149
 oxidative metabolism-contraction coupling and, vascular muscle, H597
 Phosphodiesterase, adrenergic responses, hyperthyroid myocytes, C948
 Phosphodiesterase inhibitor, sodium transport and, lung, L86
 Phosphoenolpyruvate carboxykinase mRNA, induction, renal, F145
 Phosphofructokinase
 ATP utilization, skeletal muscle during tetanic contraction, E595

SUBJECT INDEX TO VOLUME 257

- Phosphofructokinase (*continued*)
 control of, model, R878
 regulation, anoxia survival strategy (turtle), R278
- Phosphoinositide, cAMP convergence pathways and, during parotid secretion, C651
- Phospholipase
 C5b-p complex activation of, glomerular epithelial cells, F826
 hypoxia, endothelial cell plasma membranes and, pulmonary artery (pig), C223
 intestinal, secretion from villous enterocytes, G14
- Phospholipase A₂, oxidant-mediated activation, pulmonary endothelium, L430
- Phospholipase C
 calcium effects, sodium-glucose cotransport, kidney, F126
 cardiolipin-sensitive, subcellular fractions of myocardium, C926
 endothelin-1 activation, osteoblastic cells, E797
 growth hormone effects, kidney, F503
 mitogenic signals for thrombin, mesangial cells, F366
 phorbol ester effects, airway smooth muscle, L209
- Phospholipids
 alveolar, uptake, secretagogues for surfactant and, L248
 loss, oxygen deprivation and, heart cells, H444
 lung development, immunotargeting, L311
 membrane degradation, reperfused heart, H252
- Phosphoproteins, chemical synaptic transmission, cellular and molecular mechanisms, L289
- 5-Phosphoribosyl, nucleotide synthesis, magnesium requirement, C113
- Phosphorus
 chronic metabolic alkalosis effects, E578
 mobilization of, embryo (alligator), R1541
- Phosphorylase
 ATP utilization, skeletal muscle during tetanic contraction, E595
 synthesis, diabetic hepatocytes and cardiomyocytes, E74
- Photoperiod
 short
 brown fat lipoprotein lipase and (hamster), R1123
 fat pad responses in (hamster), R1533
- Photoreceptors, rod, sodium-calcium exchange in, C153
- Phrenic nerve
 airway tone, benzodiazepines and, R810
 neural activity of, slow rhythms, R804
 phase resetting, respiratory rhythm, R271
- Pial arterioles
 amino acid neurotransmitters, dilator effects of (piglet), H1200
 hemodilution effects, H912
- Pial vessels, brain, endothelin and vasopressin effects, H799
- Picolinamide, cAMP increase and, proximal tubules, F1021
- Picrotoxin, fastigial nucleus pressor response and, R1436
- Pigment epithelium, eye, leucine transport, metabolic stress effects (bovine), C940
- Pinacidil, ATP-sensitive potassium channels, heart cells (guinea pig), H2092
- Pindolol, plasma ANP levels and, rest and exercise, R259
- Pineal gland
 circadian temperature rhythm, supra-chiasmatic nucleus influence on (hamster), R210
 soma of cells, passively propagated spikes from (guinea pig), C802
- Pinealocytes, passively propagated spikes from (guinea pig), C802
- Pituitary, response, cold acclimation and, E336
- Pituitary cells, membrane ionic conductance, arachidonic acid effects, E203
- Pituitary hormone, vascular mechanics and, H1228
- Placenta: *see also* Fetus; Lactation; Pregnancy
 amino acid arteriovenous differences, fetus (lamb), E909
 ascorbic acid in, C110
 epithelial cell apical membranes, receptors for IGF-I, E27
 fetal response to prostacyclin, after angiotensin II-induced vasoconstriction (sheep), E102
 maternofetal potential difference (pig), R37
 membrane, calcium pump in, C341
 microvillous membrane vesicles, amino acid uptake in, C1005
 oxygen transport, paralysis and, fetus (sheep), H734
 restricted growth, glucose metabolism in, pregnancy (sheep), R350
 uteroplacental perfusion pressure, renin-angiotensin system role in, R204
- Plasma
 clearance, norepinephrine kinetics and, E743
 constituents: *see* specific constituent level, during gestation, R847
 osmolality, vasopressin, sexual dimorphism, R738
- Plasma concentration profiles, growth hormone secretory rates, E809
- Platelet-activating factor
 cardiac function and blood flow with, awake state, H25
 cyclooxygenase product release and, tracheal epithelia, L361
 glycoconjugate secretion and, tracheal submucosal gland, L373
 ischemia-reperfusion, mesenteric, R872
 lung injury, fatty acid deficiency and, H1192
 tumor necrosis factor-induced lung injury and, L232
- Platelet-derived growth factor
 lung cell proliferation and, L23
 production, endotoxin effects, pulmonary endothelial cells, L65
- Platelets
 adherence, thrombin-treated endothelial cells, H423
 vasopressin, homologous regulation, R1400
- Plethysmography, atropine-induced cutaneous vasodilation, esophageal temperature during exercise and, R1089
- Pleural effusion, formation, left atrial hypertension and, awake state (sheep), H690
- Pneumocytes
 fibroblast-pneumocyte factor, L174
 growth and differentiation, physical forces and, L179
 proliferation, regulation by polypeptide growth factors, L23
- type II
 hypertrophic, after pneumonectomy, C528
 spermidine uptake, L346
 spermidine uptake, lung, C579
 sublethal oxidant injury inhibition of signal transduction, L217
- Pneumonectomy
 compensatory growth and, lung, L179
 partial, lung cAMP changes after, E261
 polyamine uptake and, E729
 type II pneumocytes after, C528
- Poison distribution, blood flow measurements, radiolabeled microspheres, H280
- Polarity, cell, sodium-potassium pumps, epithelial monolayers, C896
- Polyamines
 cyclic nucleotides and, prolactin stimulation of lactose biosynthesis, E318
 DNA synthesis and, intestinal epithelial cells, G145
 gastric and duodenal mucosal, induction during stress, G259
 transport system, properties of, C545
 uptake
 lung, C579
 lung, inflation-associated increases, E729
 type II pneumocytes, L346
- Polycythemia, acute, exercise in the heat, R311
- Polyethylene capsule, interstitial fluid pressure measurement, ileum, H62
- Polyethylene matrix, implantation, renal decapsulation effects on natriuresis, R44
- Polyol, response, salt loading, renal inner medulla, F1117
- Polypeptide growth factor, regulation, lung cell proliferation, L23
- Polypeptides: *see also* Peptides
 185-kDa band 3, oxyntic cells, C537
 pancreatic
 duodenectomy effects, G415
 neural mechanisms, awake state, G134
 stimulation of feeding (sheep), R383
 vasoactive intestinal
 acetylcholine and, esophageal circular smooth muscle, G380
 atrial and ventricular muscles, H1082
- Polyphosphoinositides, binding, glomerular mesangial cells, F280
- Polytetrafluoroethylene, vascular grafts, reduced thrombogenicity in, H1076
- Polyurethane, introducer sheath, high-fidelity manometers, H1312
- Polyuria, vasopressin clearance, DOCA hypertension (pig), R1467
- Pontine myelinolysis, central, mortality and brain lesions, F18
- Portal vein
 catecholamine effects, portal hypertension, G977
 L-type calcium channel, D 600 block of, C689

SUBJECT INDEX TO VOLUME 257

- obstruction, portosystemic shunting and, G52
- stenosis, pressor responses, awake state, G773
- Postprandial period, ileum, G766
- Posture, head-up tilt, sympathetic renal nerve activity and, awake state, R337
- Potassium
 - accumulation, propionate effects, rectal gland (shark), C377
 - conductance, pH effects, hepatocytes, G961
 - high and low, erythrocytes, sodium-lithium exchange in (sheep), C58
 - intracellular
 - myosin phosphorylation and, tracheal smooth muscle, C1062
 - volume regulation in, proximal tubules, C1093
 - ion microprobe analysis, bone, E815
 - ionic permeability and, nonpolarized cell, F985
 - loading, aldosterone and renin inhibition by ANF, R1423
 - sarcoplasmic reticulum, cardiac force and (trout), R599
 - secretion, renal adaptations, R989
 - transport
 - cortical collecting duct, F43
 - swelling-stimulated, erythrocytes, C114
 - voltage-activated, erythrocytes, C986
- Potassium channels
 - ATP-sensitive
 - activation by pinacidil, heart cells (guinea pig), H2092
 - activation effects, ventricular myocytes, H1551
 - oil-gate concentration jump method, H1624
 - atrial muscarinic, trypsin activation of, H334
 - calcium-activated, modulation by substance P, G887
 - calcium ion activated, thick ascending limb, F347
 - charybdotoxin and, lymphocytes, C197
 - ionomycin-induced, macrophages, C77
 - metabolite-regulated ATP_i-sensitive, sulfonamide effects, pancreatic B-cells, C1119
 - vascular smooth muscle cells, H760
- Potassium chloride, depolarization induced by, afferent and efferent arterioles, F561
- Potassium currents
 - acetylcholine-gated, activation kinetics, atrial cells, C646
 - acetylcholine-induced, G protein effects, atrial cells, H1516
 - calcium-activated
 - colonic myocytes, C470
 - G protein mediation of, smooth muscle cells, C596
 - calcium-dependent, muscarinic suppression, colonic smooth muscle, C481
 - delayed, external potassium and, cardiac Purkinje cells, C1086
 - delayed rectifier, autonomic regulation of, heart, H818
 - isoproterenol activation of, ventricular myocytes, C1177
 - muscarinic suppression of, PC-12 pheochromocytoma cells, C1030
 - outward, colonic myocytes, C461
 - transient outward
 - repolarization in atrium and, H1773
 - tedisamil effects, ventricular myocytes, H1746
 - voltage- and time-dependent, magnesium effects, atrial cells (frog), H1663
- Potassium ions
 - contents, regulation of, thymocytes, C12
 - continuous flow quantitation, chromogenic macrocyclic ionophores, F893
 - L-glutamate transport and, intestinal brush-border membrane vesicles (eel), R180
 - transport, sodium-calcium exchange in rod outer segments, C153
 - volume-regulatory fluxes, liver, G357
- Potassium ion channels, agonist-activated, aging effects, arteries, H494
- Potential difference, maternofetal (pig), R37
- Potentials
 - action
 - cardiac, ATP-sensitive potassium channel activation, H1551
 - hyperthyroid cardiomyocytes, C948
 - premature, Wenckebach period mechanism, H1263
 - ventricular muscle (guinea pig), C365
 - afterhyperpolarization, arachidonic acid and, pituitary cells, E203
 - cell, cytosolic calcium effects, inner medullary collecting duct, F210
 - diastolic, ischemic Purkinje fibers, H770
 - electrical, altered profile, sweat duct cells in cystic fibrosis, C722
 - evoked
 - anoxic brain (turtle), R854
 - postischemic recovery rate, H1860
 - excitatory polysynaptic, 5-HT-mediated, gastrointestinal function, G386
 - membrane
 - A10 vascular smooth muscle cells, C323
 - basolateral, macula densa cells, F463
 - bicarbonate transport and, intestinal cells (salamander), C252
 - calcium and, endothelial cells, H778
 - charybdotoxin-sensitive changes, lymphocytes, C197
 - cold effects, esophageal circular muscle (opossum), G637
 - cyanide toxicity, hepatocytes, C435
 - endothelin-induced vasoconstriction, coronary artery (pig), H1828
 - hyperpolarization, coronary artery, H1750
 - membrane and intracellular effects of adenosine, E473
 - pH effects, hepatocytes, G961
 - tetraethylammonium transport and, kidney, F243
 - receptor, hyperosmotic sodium chloride effects on lingual epithelium, G475
 - slow excitatory synaptic, sympathetic ganglia, urinary bladder, R1450
 - transmembrane
 - calcium role in, cardiac Purkinje fibers, H226
 - calcium-channel blockade in hemorrhagic shock, R1012
- Prazosin
 - ³H-labeled, adrenergic receptors in myocardium, H162
 - insulin release and, pancreatic islets, E439
 - sodium-chloride cotransport and, airway epithelium, L125
- Pregnancy: *see also* Fetus; Lactation; Placenta
 - blood pressure control during, central angiotensin II in, R1457
 - estrogen treatment and, vascular pressure-volume relations (guinea pig), R1205
 - ethanol consumption during, E561
 - glomerular function and, spontaneous hypertension, F1140
 - γ -glutamyl cycle, amino acid metabolism and, E916
 - metabolic production of cGMP, plasma level and urinary excretion, R847
 - mineral metabolism during, E118
 - myometrial cells from, ATP-sensitive conductance in, C297
 - osmoregulatory alterations of, hemodynamic factors in, R909
 - pressor responsiveness, role of maternal factors, R866
 - pulmonary circulation, partial compression of ductus arteriosus effects, fetus (sheep), H626
 - reduced uteroplacental perfusion pressure, prostaglandins in hypertension during, R1558
 - restricted placental growth, glucose metabolism in (sheep), R350
 - sodium and calcium channels, uterine muscle cells, C409
 - uteroplacental perfusion pressure, renin-angiotensin system role in, R204
 - vascular responses to angiotensin II, uterine and nonuterine (sheep), H17
 - vasopressin release in, osmoregulation of thirst and, F159
- Preoptic area, hypothalamus, neuronal thermosensitivity, ouabain effects, R21
- Pressor response
 - after anteroventral third ventricular lesions, R80
 - attenuated, AV3V-lesion and, R431
 - central effects of somatostatin, R588
 - chronic portal venous hypertension, awake state, G773
 - during pregnancy, central angiotensin II in, R1457
 - fastigial nucleus, axons of passage and, R1436
 - posterior hypothalamic injection, neuropeptide Y, H791
- Pressure: *see also* Blood pressure
 - aortic, systemic arterial system, H969
 - arterial
 - ANF and, H502
 - ANF infusion and, fetus (lamb), R580
 - angiotensin and, brain, structure-function analysis, R1551
 - angiotensin II effects, H314
 - baroreceptor control with atrioventricular block, awake state, H2048
 - central autonomic nervous system-regulating peptides, R681
 - maximal coronary flow and, cardiac hypertrophy, H1110
 - norepinephrine and, fetus (lamb), R574
 - regulation, vasopressin effects, H209

Pressure (continued)

rostral ventromedial medulla control of, R635
 RVLM neurons and, R265
 vasomotor control, respiration changes and, R626
 atrial, mean left or right, ANF release and, R896
 central venous
 aging effects, H961
 carotid baroreflex responses and, awake state, H1389
 colloid osmotic, analbuminemia and, F23
 constant, hemorrhage, response to (trout), R1307
 critical closing, coronary circulation, H717
 hydrostatic, thrombogenicity and, ePTFE vascular grafts, H1076
 increased, cardiac development and, embryo (chick), H55
 interstitial hydrostatic, renal decapsulation effects, R44
 intramyocardial
 myocardial fluid pressure and fiber stress interaction, H357
 variable elastance concept, H1471
 intrathoracic, cardiopulmonary interactions and, H120
 intravascular, head-out water immersion, awake state, R358
 left ventricular
 coronary systolic flow impediment, H1936
 reduction, right ventricular systolic performance and (pig), H1878
 long-term, cardiac hypertrophy induced by, H1766
 lower body negative, regional vascular response to, H219
 lymph driving, portal venous hypertension, G94
 mean arterial, neuropeptide Y effects, H791
 mean circulatory filling, estrogen treatment effects (guinea pig), R1205
 myocardial fluid, fiber stress interaction, intramyocardial pressure, H357
 perfusion
 intestine and intestine-liver preparation, G249
 renal, ANP and, R1169
 renal decapsulation effects, hypertension and, F785
 uteroplacental, prostaglandins in hypertension during, R1558
 phasic, small epicardial veins of unrestrained heart, H1056
 portal venous, experimental portal hypertension, G52
 pulmonary capillary, histamine effects, H618
 stop-flow, adenosine analogue effects, F231
 systemic arterial, head-up tilt and, awake state, R337
 tracheal, lung inflation reflex influences, R1004
 uteroplacental perfusion, renin-angiotensin system role in hypertension, R204
 venous
 ANP effects, forelimb, H272
 capillary permeability and, hindlimb, H2025

venous outflow, ileum, H62
 Pressure-flow relations
 collateral influence on, coronary circulation, H717
 coronary, variable elastance concept, H1471
 low flow perfusion, skeletal muscle, H1419
 Pressure-volume relations
 systolic chamber elastance and, hypertrophy and hypertension, H386
 systolic performance, model, H2070
 vascular, pregnancy and estrogen treatment (guinea pig), R1205
 Procoagulant, factor VIII, acute-phase behavior, R49
 Progesterone, brain sodium-potassium-ATPase differences, male-female, E284
 Prolactin
 calcitropic actions (eel), R74
 placental, ethanol effects, E561
 stimulation of lactose biosynthesis, cyclic nucleotides and polyamines in, E318
 Propidium iodide, lethal cell injury and, hepatocytes, C347
 Propionate, cell swelling and potassium, rectal gland (shark), C377
 Propranolol
 chloride uniport pathways, brown fat mitochondria, C1142
 lowering oxygen pressure, bronchial relaxation and, C1034
 lung liquid secretion during, β -adrenergic block effects, fetal asphyxia (sheep), R705
 plasma ANP levels and, rest and exercise, R259
 pressor response to feeding and, newborn (lamb), R568
 Propylthiouracil, thyroid hormone inhibition, lung, fetus, L94
 Prostacyclin
 carotid sinus, baroreflex and, R445
 Goldblatt hypertension and, F190
 placental response to, fetus (sheep), E102
 synthesis
 isoproterenol-induced, modulation by cAMP, heart, R771
 vasopressin and angiotensin II interaction in, vascular smooth muscle, E617
 vascular tone, neutrophils and, H1315
 Prostaglandins
 arteriolar dilation mediated by, endothelial impairment effects, H1966
 baroreflexes and, during coronary occlusion, R216
 carotid sinus, baroreflex and, R445
 desensitization of, myometrium, E20
 dexamethasone effects, microvascular endothelial cells, C512
 endothelin effects, renal tubular epithelial cells, C1101
 fevers, regulated body temperature and, R695
 gastric mucosal, fish oil effects, G9
 hyperemia and oxygen uptake, postprandial jejunal, G798
 hypertension and, reduced uteroplacental perfusion pressure, R1558
 hypoxic vasodilation, cerebral arteries, H824

insulin effects and, kidney, F580
 mediation, central interleukin 1-elicited hyperinsulinemia, R839
 microvascular reactivity, streptozotocin-induced diabetes, H1438
 modulation by renin, F554
 modulation of function, osteoblasts, F755
 pressor responsiveness, pseudopregnancy and pregnancy, R866
 production, systemic inhibition of, protein metabolism and, tumor-bearing rats, C261
 pulmonary hypertension and, fetus (sheep), H626
 pulmonary vasoconstriction, calcium role in, H2001
 release, tracheal epithelia, L361
 sodium reabsorption and, kidney tubules, F237
 stretch and adrenergic stimulation, cavernous carotid artery, R1335
 synthesis, isoproterenol-induced, modulation by cAMP, heart, R771
 VIP and, coronary hemodynamics, H1254
 Prostaglandin D₂, antigen challenge of, local mediator release, L366
 Prostaglandin E₂
 inhibition of sodium-potassium-ATPase activity, inner medullary collecting duct, F424
 production, ANP effects, renal medulla, F336
 Prostaglandin E
 β -endorphin and islet hormone release, E361
 thermal response to, preoptic anterior hypothalamus, R816
 Prostaglandin E₂, fevers, regulated body temperature and, R695
 Prostaglandin H₂, TxA₂, aortic contraction, diabetes and, H1327
 Prostanoids
 cerebral ischemia, newborn (pig), H266
 cerebral microcirculation and (piglet), H707
 endothelium-derived contracting factor, H33
 hyperemia and oxygen uptake, postprandial jejunal, G798
 Protease, capillary injury-related, lung lymph, L202
 Protease-antiprotease balance, emphysema and, L147
 Protein
 band 3, oxyntic cells, C537
 biliary, vesicular secretion, G1
 binding, albumin effects, lipid-water interface, G904
 breakdown and synthesis, amino acids and insulin suppression of, E839
 concentration
 lymph, ANP effects, forelimb, H272
 pleural, left atrial pressure and, awake state (sheep), H690
 contractile
 muscle, adenylosuccinate synthetase binding to, C29
 running and mRNAs, skeletal muscle, C936
 C-reactive, acute-phase behavior, R49
 cytoskeletal, thrombin-induced permeability increase, C562
 degradation, total and myofibrillar, so-

SUBJECT INDEX TO VOLUME 257

leus muscle after exercise, E1
 dietary, kallikrein and kinin responses, renal, F718
 endotoxin effects, hepatocytes, G524
 intake, insulin action and, E212
 lipid interactions, small intestinal brush-border membranes, G809
 metabolism
 during muscle atrophy, R300
 during nutrient deprivation and re-feeding, heart cells, neonate, C913
 glucocorticosteroid effects, E712
 prostaglandin production effects, tumor-bearing rats, C261
 reciprocal pool model, E385
 packaging, calcium interaction with, ad-renal, E247
 permeability: see Permeability

 placental membrane, C341
 plasma membrane, distal tubules, F842
 sarcolemmal, depression by oxygen free radicals, H804
 calcium ion, cardiac hypertrophy, H349
 mesenteric lymphatic, acute edemagenic stress and, H2059
 sodium
 altered smooth muscle contraction, G570
 electrogenic, chloride removal, gallbladder (mudpuppy), C568
 electrogenic, cerebral arterial response, H141
 sodium-potassium
 direct stimulation by potassium in cortical collecting tubules, F595
 inhibition in papillary muscles and, H942
 neuronal thermosensitivity, hypothalamus, R21
 regulation by ANF, endothelial cells, C36
 repolarization during establishment of epithelial monolayers, C896
 thymocytes, C12
 Purine, release, ischemic myocardium, H47
 Purine-nucleoside phosphorylase, endothelial injury, heart (guinea pig), H488
 Purkinje cells
 cardiac
 delayed potassium current and external potassium, C1086
 external lidocaine binding site, H79
 Purkinje fibers
 caffeine-norepinephrine interactions,

 calcium role in, H226
 impulse propagation, electrical coupling and (sheep), H179
 ischemic, diastolic potentials in, H770
 Purkinje system, relative refractory period in, α -adrenergic effects, left ventricle, H1156
 Puromycin nephrosis, essential fatty acid deficiency during, renal injury and, F798
 Putrescine
 DNA synthesis and, intestinal epithelial cells, G145
 spermidine uptake, type II pneumocytes, L346
 transport system, CHO cells, C545
 Pyrogen, endogenous, acute-phase response to, aging effects, R189
 Pyroglutamyl-histidine, low-affinity transport, renal brush-border membrane vesicles, C971
 γ -Pyrophosphate, nucleotide synthesis, magnesium requirement, C113
 Pyruvate, metabolism, experimental Fanconi's syndrome and, F959
 Pyruvate kinase
 depression, anoxia survival strategy (turtle), R278
 gluconeogenesis activation, central carbachol, E486

Q

Quin2
 mechanism of angiotensin II stimulation, sodium-potassium-chloride cotransport, muscle cells, C629
 suppressive action of cobalt, neutrophil functions, C859
 Quinacrine, calcium active transport and, intestinal epithelium, G818
 Quinine, volume-regulatory potassium ion fluxes and, liver, G357

R

Radioimmunoassay
 CCK role, pancreatic secretion, G782
 vasopressin and ANP, dependent effect of drinking volume on, R762
 Radioisotopes, glucocorticosteroid effects, E712
 Ranatensin, inhibition of feeding, R1219
 Ranitidine, gastric acid secretion, model, G157
 Receptors
 A₁-adenosine, inhibition of adipocyte adenylate cyclase and lipolysis, E871
 adenosine
 adenylate cyclase and, ventricular myocyte membranes, H1088
 glycolytic flux and, heart, H1952
 hyperpolarization mediated by, coronary artery, H1750
 regulation of sodium-chloride cotransport, airway, L125
 α -adrenergic
 diabetes, pancreatic islets, E439
 function, species differences, R1110
 α_1 -adrenergic
 distribution in myocardium, H162
 neuronal angiotensin II binding, C706
 α_2 -adrenergic
 neuronal immunoreactive angiotensin II release, C588
 stimulation, coronary vasodilation and, H132

Receptors (continued)

 β -adrenergic

ANP levels during rest and exercise, R259
 cardiac, plasma membrane-specific deficiency in diabetes, E127
 coronary collateral vessels, H1634
 downregulation of, during sodium restriction, E499
 fiber type and training effects, skeletal muscle, E736
 ischemia and myocardial membrane preparations, H1032
 lipolysis during fasting, E65
 maternofetal potential difference (pig), R37
 release of calcium, airway epithelium, L116

β_1 -adrenergic, catecholamine effects, portal hypertension, G977

β - and α -adrenergic, hyperthyroid adult cardiomyocytes, C948

aldosterone, A6 cells, C665

ANF subtypes, expression, renal glomeruli and papillae, F649

angiotensin, angiotensin I-converting enzyme and, intestine, G504

angiotensin II, inhibition of angiotensinogen production, hepatoma cell line, C888

ATP, calcium mobilization and, heart cells, C750

baroreceptor

arterial and cardiopulmonary, atrioventricular block and, awake state, H2048

denervation, angiotensin II and, R1175
 denervation effects on response to angiotensin II, H314

lower body negative pressure and, H219

peripheral control of blood flow, hemorrhage, H1507

rapid resetting effects, hypertension, H711

cardiopulmonary

central venous pressure effects, awake state, H1389

during coronary occlusion, prostaglandins and, R216

volume expansion effects (monkey), R595

CCK

antagonists, G169

CCK analogue differentiation of, pancreatic acini, G594

CCK antagonist L 364718, pancreatic growth and (rat, guinea pig, hamster), G511

chemoreceptors

arterial, sodium and water homeostasis control, R1282

central, ventral medullary surface and Mayer waves, R804

stimulation, sympathetic activity and, R1027

cholinergic, pepsinogen secretion from chief cells and, G226

corticosteroid, A6 cells, C665

digitalis, regulation of sodium-potassium-ATPase (ferret), H534

dopamine, adult and maturing kidney, F315

dopamine DA₁, kidney, autoradiographic localization, F414

E. coli enterotoxin, kidney, intestine, and testis (opossum), F874

epidermal growth factor, regulation, kidney, F1059

extracellular matrix components, L331

GABA, hypothalamic, stress-induced tachycardia and, R246

glucocorticoid, nephron, species differences, R87

high-affinity for VIP, carbachol-induced downregulation for, G402

5-HT, gastrointestinal function, G386

IGF-I, proximal colon epithelial cell apical membranes, E27

insulin

kidney epithelial cells (opossum), E895
 radioimmunoassay, E451

insulin and IGF I, sodium transport mediated by, urinary bladder (toad), C612

lactoferrin, brush-border receptor-mediated uptake, G930

motilin, agonist, G470

muscarinic

intracellular calcium, nasal gland cells (duckling), C1020

renal tissue, F746

nasal, carbon dioxide, ventilatory frequency and (lizard), R156

nicotinic acetylcholine, glucocorticoid effects, chromaffin cells (guinea pig), C906

occupation, pancreatic acini, G202

ryanodine, sarcoplasmic reticulum function, C781

small intestinal, alcohol absorption effects, G291

somatostatin, fundic D-cells, gastric, G235

tachykinin, substance P excitation, sympathetic ganglia, bladder, R1450

vasopressin, platelet, homologous regulation, R1400

vasotocin, fluorescein- and rhodamine-labeled probes for (toad), E804

VIP, cystic fibrosis, fetus, G561

volume, labyrinth (guinea pig), F341

Rectification, inward, potassium channel, macrophages, C77

Red blood cells: see Erythrocytes

Reflection coefficient, capillary permeability, elevated venous pressure effects, hindlimb, H2025

Reflexes

arterial, sodium and water homeostasis control, R1282

axon, postocclusive cerebral hyperemia, H1736

baroreflex

carotid, central venous pressure effects, awake state, H1389

central autonomic nervous system-regulating peptides, R681

effects of endothelin, H918

glutamate coinjection, response to ANF and, R405

inhibition, prostaglandins and, R216

prostaglandins in carotid sinus, R445

sensitivity, volume expansion effects, awake state (monkey), R595

sinoaortic, size of input signals and, H465

sinusoidal acceleration in cardiovascular regulation, H511

vagal, bradycardia, somatosensory in-

hibition of, R829

vagal cardiopulmonary, activation during phenylephrine infusion, R1147

cardiopulmonary, decrease with aging, H961

cardiovascular

atrioventricular block and, awake state, H2048

calcitonin gene-related peptide and, awake state, R726

lower body negative pressure and, H219

vasopressin and angiotensin II effects, H1480

gastrocolonic, response to meal, G830

lung inflation, vascular capacitance in systemic circulation and, R1004

micturition, electrophysiological study of, R410

neural, postprandial gastric blood flow, G111

peristaltic, tachykinins, G709

pressor, muscular contraction, ventrolateral medullary neurons and, R1154

stimulation of sympathetic outflow, rhythmic exercise, H2017

stimuli, adrenal blood flow and, H590

sympathetic during feeding, newborn (lamb), R568

gating of, R1027

thermoregulatory, skin, local iontophoresis of bretylium effects, H1599

vasopressin effects, cerebral blood flow during hemorrhage, H1360

Regeneration, renal tubular epithelium, F913

Rehydration, responses, heat exposure, aging and, R1050

Relaxation, β -adrenergic, contractile force and calcium ions during, tracheal smooth muscle, C355

Renal nerve

activity, during coronary occlusion, prostaglandins and, R216

function, sympathetic nerve stimulation effects (monkey), F204

renin release, ANF and, R194

response to volume expansion diabetes, R672

newborn, awake state (lamb), R1519

sensory, activation of, R29

sympathetic activity, norepinephrine release and, R229

during head-up tilt, awake state, R337

Renin

acidic, formation, stroke-prone hypertension, F275

hypersecretion, vasopressin replacement effects, R1117

inhibition by ANF, potassium loading and, R1423

modulation, thromboxane, F554

plasma, blood pressure and, hypertension and normotension, H611

plasma activity

after hemorrhage, newborn (lamb), R647

aging effects, H961

dependent effect of drinking volume on, R762

epinephrine concentration effects, awake state, E57

renal transplantation and hypertension, F197

vascular effect of angiotensin II, lipox-
ygenase and, H434
plasma inactive, stimulation by dexamethasone, E879
release
ANF and arterial pressure, H502
inhibitory effect of endothelin, E833
neural stimulation of, ANF effects, E332
response
hypotension, inhibition by ANF, R194
to ANF, experimental low-output heart failure, R917
secretion
neuronally released norepinephrine and (sheep), R765
sympathetic nerve stimulation effects (monkey), F204
Renin-angiotensin-aldosterone system, chronic heart failure, H739
Renin-angiotensin system
acute aortic coarctation hypertension and, H1480
hypertensive response and, after AV3V lesions, R80
inhibition by ANF, potassium loading and, R1423
interaction, ANP and pressure natriuresis, R1169
rapid atrial pacing and, cardiac-denervated dog, R162
role in hypertension, during uteroplacental perfusion pressure, R204
Repolarization, atrial, transient outward current effects, H1773
Resistance
anoxia-reoxygenation, endothelial cells, heart (guinea pig), H488
arterial, compliance, during transient conditions, H190
coronary
collateral influence, H717
endothelium importance in, H603
coronary vascular, adenosine and, heart (guinea pig), H1378
hormone, new form of pseudohypoparathyroidism, E277
insulin
obesity effects (sheep), E772
selective reversal, skeletal muscle, E418
sepsis effects, diabetes, E301
junctional, Purkinje fibers (sheep), H179
lymphatic, portal venous hypertension, G94
membrane, chloride removal, gallbladder epithelium (mudpuppy), C568
peripheral, baroreceptor control with atriocentricular block, awake state, H2048
pulmonary vascular
histamine effects, H618
lipoxigenase inhibitor effects, H1977
substratum, bioelectric properties, alveolar type II cells, C678
systolic chamber elastance and, hypertrophy and hypertension, H386
total peripheral, angiotensin II salt-dependent hypertension, H1402
vascular
aortic nerve stimulation effects, posterior hypothalamic influences on, H1994
forearm, aging effects, H961
hypoxic hypoxia, H1581

neuropeptide Y effects, H791
PAF and BN 52021 effects, awake state, H25
regional cardiac sympathectomy, H1523
Resistance arteries, force, intracellular calcium and, H1728
Respiration
carbon dioxide recovery, feeding effects, E426
cellular, ischemic kidneys, F383
changes in vasomotor control, rostral ventrolateral medulla, R626
impaired control, iron-deficient muscle mitochondria, C1080
normoxia and hypoxia, control of organ perfusion, fetus (sheep), H1132
periodic breathing, volume control and respiratory timing during, R653
vascular capacitance and, in systemic circulation, R1004
Respiratory arrest, arteriovenous disparity, circulatory failure, F1087
Respiratory bursts, suppressive action of cobalt on, neutrophils, C859
Respiratory distress syndrome
adult
lung surfactant, L1
TNF and interleukin 1 α effects, L399
capillary injury-related protease, lung lymph, L202
Respiratory regulation
carbon dioxide pattern effects, upper airway (lizard), R156
chemical control (iguana), R1258
iron-deficient muscle mitochondria, C1080
phase resetting, respiratory rhythm, R271
Respiratory timing, breath-by-breath, volume control and, during periodic breathing, R653
Reticuloendothelial system, fibronectin synthesis, hepatic, R1406
Retroendocytosis, insulin, kidney cells (opossum), C190
Rhabdosphincter, urethral responses, sacral stimulation, chronic spine, R284
Rhythms
circadian
female, ovariectomy and estradiol effects, R1241
glucocorticoid, cortisol secretory burst, E6
patterns of performance and, simulated jet lag (monkey), R796
circadian temperature, suprachiasmatic nucleus influence on (hamster), R210
contraction, renal calyceal and pelvic, R788
diurnal, prostaglandin fevers, R695
respiratory, phase resetting of, R271
sympathetic
hypotension, spinal injury, H1347
spinal cord transection and, R1506
temperature, bright light effects, R136
Ribonucleic acid
actin messenger, unweighted soleus muscle, R300
gastric and duodenal mucosal, induction during stress, G259
messenger
diabetes effects, heart, E573
inhibition of gastrin cells, antrum,

G328
renin, distribution in developing kidney, F850
running effects, skeletal muscle, C936
RINm5F cells, signal transmission, after GLP-1(7-36)amide, G397
RNA: see Ribonucleic acid
Rostral ventrolateral medulla
neurons in, chemical stimulation of caudal VLM effects, R265
vasomotor control exerted by, respiration-induced changes, R626
Rostral ventromedial medulla, subregions of, arterial pressure and regional hemodynamics, R635
R-R intervals, shortening, Wenckebach periods, H1263
Rubidium
efflux, agonist-activated, aging and, H494
transport, cortical collecting duct, F43
uptake
potassium adaptation and, cortical collecting tubules, F595
prostaglandin E₂ and, medullary collecting duct, F424
RVLM: see Rostral ventrolateral medulla
Ryanodine
receptors: see Receptors
sarcolemmal reticulum
cardiac force and (trout), R599
ventricular myocytes, H1369

S

Sacrum, stimulation, chronic spine, urethral responses to, R284
Saline
circulating blood volume, R127
diminished response to epinephrine, elderly, E866
hypertonic, oxygen uptake with, hemorrhagic shock, H238
infusion, blood-tissue albumin transport, H525
Salivary gland
secretion
ANP stimulation of, E675
cAMP and phosphoinositide convergence pathways, C651
Salt
depletion, ANH and aldosterone effects, E583
diet, 24-h blood pressure recordings in, R1225
loading
major brain osmolyte accumulation, F1108
methylamine and polyol responses, renal inner medulla, F1117
secretion, nasal gland cells (duckling), C1020
Saphenous vein, neuronal uptake in, DO-PEG and, H1945
Saralasin, acute aortic coarctation hypertension and, H1480
Sarcolemma
calcium pump mechanism, heart, H804
calcium transport activities, cardiac hypertrophy, H349
interval-force relations, ventricular myocardium, H2036
phospholipase C, cardiolipin-sensitive, C926

SUBJECT INDEX TO VOLUME 257

- Sarcomere, length, coronary artery stenosis, ventricular remodeling and, H1983
- Sarcoplasmic reticulum
calcium and histamine dose, arterial smooth muscle (swine), C122
calcium content, ventricular myocytes, H1369
calcium mobilization, ATP receptors and, C750
calcium release from, denervated skeletal muscle, C504
energy depletion-repletion, calcium transients and, C427
function
halothane-sensitive gene effects, C781
sepsis and endotoxin shock effects, R1265
inhibition of, BAY K 8644 and, H407
interval-force relations, ventricular myocardium, H2036
intracellular calcium ion oscillations, laser backscatter studies, H665
myocardial force and (trout), R599
rest potentiation, BAY K 8644 effects, H399
voltage and beat dependence, calcium ion transients, H746
- Sartorius muscle, microcirculatory responses, hemorrhagic hypotension, H1647
- Satiety
control, hypothalamic energy factor and, R224
feeding control, CCK-8 and somatostatin-14 interactions, R15
food intake
CCK-8 effects, R946
stimulation by L364718, R1512
gastric emptying and, endogenous CCK effects, fasting, R1462
level, hypophagic and hyperphagic body weight recovery, R1322
stimulation of feeding, neuropeptide Y and (sheep), R383
- Schistosoma mansoni*, egg production, HMG-CoA reductase in, R618
- Secretagogues
gastric mucosal response to, G46
lung surfactant, alveolar phospholipid uptake and, L248
metabolic effects of, calcium requirement for, gastric mucosa (toad), G969
response to, crypt and villus, small intestine, G334
- Secretin, chloride channels and, fetal pancreatic duct cells, C240
- Secretory cells, sweat gland, ion channels, C129
- Secretory proteins, adrenal, calcium interaction with, E247
- Seizures
reflex stimuli and, adrenal blood flow, H590
vascular response, dura mater, H157
- Selenite, metabolism, model, R556
- Selenium
deficiency, glutathione protection from hyperbaric oxygen, L393
metabolism, model, R556
- Senescence
cardiac myocyte characteristics, H259
dynamic exercise in, H1428
- Sensory physiology, olfaction, C1043
- Sepsis
brain, ³¹P-NMR spectroscopy, C1055
changes induced by, insulin action, diabetes, E301
hepatocytes of, protein phosphorylation in, R1232
ketone body flux regulation in, E665
mediating protein catabolism in, insulin and glucose role in, E323
myocardial function in, R1265
platelet-derived growth factor production and, pulmonary endothelial cells, L65
Septicemia, brain, ³¹P-NMR spectroscopy, C1055
Serotonin: *see also* 5-Hydroxytryptamine
arterial contraction induced by, phorbol amplification of, H1174
coronary artery function, H1681
enteric slow EPSP's mediated by, gastrointestinal function, G386
ketamine and fentanyl effects, lung metabolism, E379
MCPP effects and, penis and bladder function, R1441
mitogenic effects, renal mesangial cells, F431
thromboxane A₂, coronary blood flow reductions, H873
uptake, translocation of protein kinase C and, endothelial cells, L253
vascular response, dura mater, H157
vasoconstriction and, lung, H1977
- Serpin, emphysema and, L147
- Sex differences
energy balance, CRF and, R1417
neuropeptide, genital tract, female, E220
sodium-potassium-ATPase, brain synaptosomes, E284
vasopressin release, central adrenergic control of, R1040
- Sex hormones
CRF effects, energy balance, R1417
ovariectomy and, unity of female circadian rhythms, R1241
- Sexual dimorphism
thermoregulation and, R700
vasopressin, osmotic control of, R738
vasopressin release, central adrenergic control of, R1040
- Shock
endotoxic
myocardial function in, R1265
vascular endothelial permeability, L399
hemorrhagic
calcium-channel blockade in, R1012
chronic ethanol effects, H198
neutrophil transformation in, H846
oxygen uptake with hypertonic saline, H238
ischemia-reperfusion-induced, PAF in, R872
osmotic, renal papillary epithelial cells, F937
PAF-induced, awake state, H25
- Shunt: *see also* Bypass
portosystemic, experimental portal hypertension, G52
proximal tubular, pathway permselectivity, F1079
- Sickle cells, potassium transport in, volume-dependent, C114
- Sigmoidal curves, analysis and comparison, G982
- Signal transduction, type II pneumocytes, sublethal oxidant injury inhibition of, L217
- Sinusoidal acceleration, analysis of cardiovascular regulation, H511
- Skin
adrenergic vasoconstrictor responses, abolition by local iontophoresis of bretylium, H1599
epithelium, gap junctions in (frog), C658
- Sleep
interleukin 1-induced, corticotropin-releasing factor effects, R528
rapid-eye-movement, bright light effects on temperature rhythm, R136
suprachiasmatic nucleus activation, during hibernation cycle (squirrel), R605
- Small-solute gradients, transcappillary, renal inner medulla, F547
- Smell: *see* Olfaction
- Sodium
absorption
acetate effects, proximal tubules, F586
across labyrinthine epithelium, F182
electroneutral, low-dose glucocorticoid effects, colon, F1027
acid load independent of, cytoplasmic pH in pulmonary macrophages, C65
active transport, gap junction, skin (frog), C658
acute regulation of organic solutes, renal, F676
p-aminohippurate transport and, airway, C1108
appetite, thirst and (cow), R1212
cell growth and ion transport regulation, renal, F1
cotransport, integumental, marine bivalves, R473
dependency, amino acid transport, intestine (eel), R506
depletion, ANF and arterial pressure, H502
- excretion
ANF and, awake state, F565
ANP and pressure natriuresis, R1169
atriopectin II effects, papillary necrosis, F859
calcitonin and calcitonin gene-related peptide, E848
fractional, renal decapsulation and, F785
intrarenal dopamine and, F469
neural stimulation of, ANF effects, E332
sympathetic nerve stimulation effects (monkey), F204
urinary, ANH and aldosterone effects, E583
urinary, congestive heart failure, R641
homeostasis, arterial chemoreceptor and reflex control of, R1282
influx, kinetic analysis, hepatopancreas (prawn), R484
inorganic phosphate transport dependent on, IGF-I effects, kidney cells, F712
intake, changes, effect on glomerular B₂-kinin-binding sites, F353
intracellular, volume regulation in, proximal tubules, C1093
ion microprobe analysis, bone, E815
oxygen consumption and, hypertension, renal tubules, F818
pump: *see* Pump

- reabsorption
 - experimental renal cortical necrosis, F925
 - proximal, arachidonic acid infusion effects, F237
- relevance, inner ear volume receptors (guinea pig), F341
- restriction, downregulation of β -adrenergic receptor-mediated function during, E499
- retention
 - chronic caval constriction and, R1057
 - cirrhosis and, R1068
- sugar transport independent from, LLC-PK₁ cells, F11
- transport
 - amiloride and, oocytes (*Xenopus*), C825
 - bladder (toad), F700
 - colonic basolateral membrane vesicles, G624
 - endothelin and, renal tubular epithelial cells, C1101
 - epithelial, epitopes on amiloride, C1135
 - gallbladder (pig), C45
 - insulin and IGF I receptor-mediated, urinary bladder (toad), C612
 - prostaglandin E₂ effects, medullary collecting duct, F424
 - regulation by cAMP, L86
 - rubidium effects, F43
 - voltage-activated, erythrocytes, C986
- Sodium-bicarbonate cotransport
 - basolateral membrane, intestinal cells (salamander), C252
 - cryptlike intestinal cell line, G732
 - cytoplasmic pH, ciliary epithelium, C696
 - electrogenic, acid-base transport mechanisms, proximal tubule, F790
 - parietal cells, G350
 - pH regulation
- Sodium-bicarbonate exchange
 - hepatoma cells, G317
 - pH regulation and
- Sodium-bicarbonate secretion, neurally mediated, induction by luminal distension in ileum, G191
- Sodium-calcium exchange
 - cardiac hypertrophy, caused by pressure overload, H349
 - rod outer segments, potassium ion transport and, C153
 - sarcoplasmic reticulum, ventricular myocytes, H1369
 - sodium ion electrochemical gradient and, proximal tubule, F531
- Sodium-calcium exchanger, caffeine and, cardiac myocytes, C147
- Sodium channels
 - amiloride-blockable, oocytes (*Xenopus*), C825
 - early distal convoluted tubules, F288
 - fast, uterine muscle cells, pregnancy and, C408
- Sodium chloride
 - absorption
 - electroneutral, low dose glucocorticoid effects, colon, F1027
 - VIP and norepinephrine effects, gallbladder (pig), C52
 - ANF actions, kidney, model, F1146
 - angiotensin II salt-dependent hypertension, H1402
 - content, osmoregulation of, renal cells, C795
 - feedback-mediated control, chlorothiazide effects, F137
 - hyperosmotic, lingual epithelium, models, G475
 - transport, sweat duct cells, cystic fibrosis, C722
 - urea and, osmoregulatory fluxes, renal cells, C964
 - water transport and, thin descending limb of Henle (quail), F994
- Sodium-chloride cotransport
 - β -adrenergic regulation of, airway epithelium, L125
 - corneal epithelium, C290
- Sodium-chloride gradient, taurine transport and, jejunal brush-border membrane vesicles, G65
- Sodium-coupled transport, energetics of, invertebrate epithelia, R461
- Sodium currents
 - lidocaine binding site, cardiac cells, H79
 - slow, muscle cells, C759
- Sodium-D-glucose cotransport, calcium effects, renal brush-border membranes, F126
- Sodium-glucose cotransporter, changes, kidney, diabetes and, C385
- Sodium-hydrogen antiporter
 - basolateral membrane vesicles, colonic, G624
 - electrogenic, kinetic analysis, hepatopancreas (prawn), R484
 - PTH-induced translocation of, proximal tubules, C637
- Sodium-hydrogen/chloride-bicarbonate exchange, gallbladder (pig), C45
- Sodium-hydrogen exchange
 - acid-base transport mechanisms, proximal tubule, F790
 - activation, magnesium role in, erythrocytes, C1038
 - α -adrenergic agonist effects, proximal nephrons, F623
 - bicarbonate and hypercapnia, cerebral arterial response, H141
 - chronic hypocalcemia and, renal cortical, F615
 - hepatic, ursodeoxycholate-induced, G371
 - mutants deficient in, cell volume regulation in, C1158
 - myocytes, adult heart, C207
 - pH regulation
 - cryptlike intestinal cell line, G732
 - hepatoma cells, G317
 - propionate effects, rectal gland (shark), C377
- Sodium-hydrogen ion exchange, inner medullary collecting duct, renal cells, F487
- Sodium ions
 - amiloride-inhibitable conductance from mRNA, respiratory epithelium in oocytes, L284
 - contents, regulation of, thymocytes, C12
 - continuous flow quantitation, chromogenic macrocyclic ionophores, F893
 - dynamic changes in plasma membrane area and (turtle), R973
 - electrochemical gradient, proximal tubule, F531
 - intracellular activity, afterpotentials and, myocardium (guinea pig), H996
- Sodium-lithium exchange, kinetics, erythrocytes (sheep), C58
- Sodium-magnesium exchange, heart cells (chick), C141
- Sodium nitroprusside, force and calcium ions, resistance vessels, H1728
- Sodium-phosphate cotransport, OK cells (opossum), F967
- Sodium-potassium-ATPase
 - activity, inhibition by prostaglandin E₂, inner medullary collecting duct, F424
- brain
 - biochemistry, species differences (rat, turtle), R1083
 - sex differences, E284
 - cell growth and, sodium transport and, kidney, F1
 - cell swelling and, rectal gland (shark), C377
 - EDRF release and, arteries, H330
 - functional, expression, β -subunit role in, oocytes (frog), C851
 - isoenzymes, thyroid hormone regulation (ferret), H534
 - peptide inhibitor of, renal tubular epithelial cells, C1101
 - potassium and rubidium ion transport, cortical collecting duct, F43
 - proximal tubule suspensions, ischemic kidneys, F383
 - relaxation and intracellular calcium, tracheal smooth muscle, C355
 - repolarization, establishment of epithelial monolayers, C896
 - stimulation of sodium-potassium pump, cortical collecting tubules, F595
- Sodium-potassium chloride cotransport
 - angiotensin II stimulation of, vascular smooth muscle cells, C629
 - energy-dependent cell volume maintenance, C817
 - regulation, ANF and, endothelial cells, C36
 - thymocytes, C12
- Sodium-potassium pump: see Pump
- Sodium-proton exchange, electrogenic, membrane vesicles, gill (crab), R924
- Soleus muscle
 - atrophy, protein metabolism during, R300
 - fiber-type composition, E823, E828
 - protein degradation, after exercise, E1
- Solitary tract
 - nucleus
 - area postrema lesion, taste aversion and, R1075
 - ileal water absorption and, G266
- Solutes, organic, acute regulation, inner medulla, F676
- Solvent drag
 - water permeability, reflection coefficients and, proximal tubule, F658
 - water reabsorption, proximal tubule, F669
- Somatostatin, expression, renal hypertrophy, F252
- Somatostatin, receptors for IGF-I, colon membranes, E27
- Somatostatin C, sodium-dependent inorganic phosphate transport and, kidney cells, F712
- Somatostatin
 - acetylcholine release and, heart, H483
 - central effects, R588
 - differential action, peptide-induced acetylcholine release, G221

- Somatostatin (*continued*)
 excitatory and inhibitory effects, intestinal motility, G532
 glucose production during hyperinsulinemia, hepatic, E704
 receptors: *see* Receptors
 release
 carbachol effects, fundic D-cells, G308
 ganglia of myenteric plexus (guinea pig), G313
 Somatostatin-14, CCK interaction, feeding control, R15
 Somatotropin release-inhibiting factor, glucose production during hyperinsulinemia, hepatic, E704
 Sonomicrometer, nonuniform shortening, anterior wall, left ventricle, H1165
 Sorbitol
 acute regulation of organic solutes, renal, F676
 ADH effects, kidney, F732
 distribution, diuresis and natriuresis, kidney, F602
 response, salt loading, renal inner medulla, F1117
 transport mechanism, renal papillary epithelial cells, F937
 Spaceflight, normal weight bearing after weightlessness, bone response, E606
 Species differences
 α -adrenergic receptor function, regulation of, R1110
 aldosterone binding sites, nephron (*Xenopus*, rabbit), R87
 biochemical comparison, brain anoxia (rat, turtle), R1083
 glucose uptake, intestinal, G689
 increased myocardial infarct size, reduced coronary collateral blood flow and, H1798
 Spectral analysis, mean pressure effects, aortic impedance, systemic arterial system, H969
 Spectrometry, secondary ion mass, bone, E815
 Spectroscopy, mass, glycogenosis type I and II children, E346
 Spermidine
 localization, lung slices, C579
 transport system, CHO cells, C545
 uptake, type II pneumocytes, L346
 Spermine, transport system, CHO cells, C545
 Sphincter of Oddi, neural control, intramural (opossum), G925
 Spikes, passively propagated, soma of cells, pineal gland (guinea pig), C802
 Spinal cord
 blood flow: *see* Blood flow
 chronic injury, sacral stimulation, urethral responses to, R284
 transection, sympathetic discharge and, R1506
 Spinoreticular tract, bradykinin and capsaicin effects, H1543
 Spinothalamic cells, cardiac and abdominal vagal afferent inhibition of (monkey), R889
 Splanchnic nerve
 activity, central effects of somatostatin, R588
 intravenous arginine vasopressin and, H658
 Splanchnic tissues, glucose uptake, diurnal fluctuations, E459
 Spleen, sympathetic discharge pattern effects, norepinephrine and neuropeptide Y release, H866
 SR: *see* Sarcoplasmic reticulum
 Stagnant layer phenomena, albumin binding and, hepatocytes, G584
 Starvation: *see* Fasting
 Staurosporine, protein kinase C and amylase secretion with, pancreatic acini, G548
 Stenosis, coronary, myocardial stunning after exercise, H113
 Sternomastoid muscle, capillary density, postnatal changes in, H344
 Steroidogenesis, Leydig cells, nonesterified fatty acid modulation of, E937
 Steroids
 genetic hypertension and, H506
 integral feeding effects, control of ACTH, R427
 leucine oxidation and, E712
 metabolism
 carbenoxolone effects, bladder (toad), F700
 mineralocorticoid specificity and, bladder (toad), F690
 Stoichiometry, chloride uptake, corneal epithelium, C290
 Stomach
 IgE-mediated reactions, G704
 motility, gastrin peptide effects (sheep), R388
 neural isolation, G30
 oxygen uptake, autoregulatory escape from sympathetic stimulation, G633
 parietal cell, intracellular pH, G741
 prostaglandins, fish oil effects, G9
 reservoir function, bolus emptying and, model, G284
 vagal fibers, brain stem responses to electrical stimulation of, G24
 Streptozotocin
 diabetes
 ANF release and atrial granularity relations, R932
 experimental, distribution of cardiac output in, H571
 impaired production of nerve growth factor, E400
 microvascular reactivity in, H1438
 oral vanadyl sulfate treatment of, H904
 renal response to volume expansion and, R672
 white adipose tissue regression in, E547
 sodium-glucose cotransporter and, kidney, C385
 Stress
 active, tracheal smooth muscle, C1062
 cardiovascular and sympathoadrenal response to, μ -opioid peptide modulation of, R901
 edemagenic, mesenteric lymphatic pump response, H2059
 immobilization, adrenal hormone response to hemorrhage and, R661
 mechanical, lung cell growth and differentiation with, L179
 mental, renal effects of, F682
 ornithine decarboxylase induction, gastric and duodenal mucosa, G259
 osmotic, cell volume regulation, C159
 reductive, chemical hypoxia and, hepatocytes, C347
 Stress-length relations, active, coronary artery function, H1681
 Stroke, blood flow during, adenosine and, H1656
 Strontium, uptake, brush-border membrane vesicles, intestine, F446
 Structure-activity relations, CCK-8 effects, food intake, R946
 Structure-function analysis, pressor action, angiotensin control of, brain, R1551
 Subcutis, interstitial exclusion of albumin, over- and dehydration, H1819
 Submandibular gland
 diabetic, impaired production of nerve growth factor in, E400
 synthesis, ANP stimulation of, E675
 Submitochondrial particles, glutamine transport in, F1050
 Substance K, transmitters of ascending contractile component, peristaltic reflex, G709
 Substance P
 acetylcholine release mediated by, somatostatin effects, G221
 action and distribution, ileocecal sphincter region, G447
 aging and, coronary response, H988
 excitatory effect, parasympathetic ganglia, urinary bladder, R1450
 modulation of calcium-activated potassium channels, colon, G887
 release, ileum, G182
 transmitters of ascending contractile component, peristaltic reflex, G709
 trigeminal ganglionectomy, postocclusive cerebral hyperemia and, H1736
 vascular response, dura mater, H157
 Substrates
 competition, time dependence of, E49
 metabolism, pulmonary, transit time and, H853
 oxidation studies, isotopic dilution of carbon dioxide during, E296
 utilization
 heart, exercise training effects, H839
 perinatal lung, L318
 Substratum, modulation of bioelectric properties, alveolar type II cells, C678
 Suckling, pressor responses, feeding (lamb), R568
 Sucrase
 new insights into activities, lactase-phlorizin hydrolase, G616
 perinatal expression, colon, G496
 Sugar
 transport
 renal brush-border membranes, F1100
 sodium-independent, LLC-PK₁ cells, F11
 Sulfate, inorganic, renal excretion (teleost), R511
 Sulfhydryl, oxidation, oxidant-injured cardiac muscle, H1321
 Sulfobromophthalein
 CCK processing and, hepatocytes, G242
 infusion, hepatobiliary function, R456
 Sulfonamides, metabolite-regulated ATP₁-sensitive potassium channels, pancreatic B-cells, C1119
 8-(Sulphonyl)-theophylline, glycolytic flux and, heart, H1952
 Superoxide anion, blood-induced generation, cerebral cortex, newborn (pig), H1560

SUBJECT INDEX TO VOLUME 257

Superoxide dismutase
 endothelium-derived contracting factor, H33
 endotoxin effects, lung, L61
 hyperoxide tolerance, rest period induction of, L226
 lethal cell injury and, hepatocytes, C347
 leukocyte adherence, reperfusion-induced, G683
 leukocyte-endothelial cell interactions and, reperfusion-induced, H1740
 relaxation and reperfusion, coronary ring, H1240
 relaxing factor dependent on, release, endothelial cells, H1340
 reperfusion injury, leukocyte role in, skeletal muscle, H1068
 smooth muscle responsiveness, basilar artery, H1235
 subcellular generation, neonate, L411
 thyroid hormone inhibition, lung, fetus, L94
 Suprachiasmatic nucleus
 daily torpor and (hamster), R210
 phase-dependent activation, during hibernation cycle (squirrel), R605
 Supraptoc nucleus
 atrial natriuretic peptide binding sites, lack of vasopressin effects, R168
 excitation, A1 cell group mediation of, vasopressin cells, R1020
 Surfactants
 apoproteins, review, L1
 biosynthesis, fetal lung, L195
 fibroblast-pneumocyte factor, L174
 historical perspective, L1
 hydrophobic, processing in type II cells, L100
 lung cell proliferation and growth factors, L23
 phospholipid transfer proteins and, L190
 protein A, stimulation of synthesis, dexamethasone and, L137
 protein SP-A, lung, L421
 protein synthesis
 glucocorticoid regulation of, pulmonary adenocarcinoma cell line, L385
 secretagogues for, alveolar phospholipid uptake and, L248
 uptake, intracellular pH regulation of, lung, L354
 Sweat duct cells, cystic fibrosis, altered electrical potential profile in, C722
 Sweat duct epithelium, cystic fibrosis, chloride conductance in, C727
 Sweat gland, cystic fibrosis cells in, ion channels, C129
 Sweating
 heat exposure, dehydration and rehydration during, aging effects, R1050
 thermoregulatory, control during exercise, heat and, R311
 Swelling, potassium channels, calcium ion-activated, F347
 Sympathectomy
 cardiac, phenol, H1523
 stomach, effects on motility, G30
 Sympathetic activity
 chemoreceptor stimulation on, dependence on respiratory phase, R1027
 muscle, norepinephrine release and, during mental challenge, E654
 Sympathetic discharge
 pattern, norepinephrine and neuropeptide Y release and, H866

rhythms, spinal cord transection and, R1506
 Sympathetic nerve
 activity
 brown adipose tissue, tube feeding effects, E374
 2-deoxy-D-glucose effects, lateral hypothalamic injection, R1386
 2-deoxy-D-glucose effects, brown fat, R1377
 cardiac, chemoreceptor effects, R1027
 carotid sinus, baroreflex and, R445
 central interleukin 1-elicited hyperinsulinemia, prostaglandin mediation of, R839
 hepatic, hemorrhagic hypotension, catecholamines and glucose in, R317
 reflex stimuli, adrenal blood flow and, H590
 regular and irregular activity, norepinephrine and neuropeptide Y release, H866
 renal
 activity, mental stress and epinephrine effects, F682
 during head-up tilt, awake state, R337
 endothelin effects, H918
 plasma catecholamines and, during eating, R1034
 traffic, microprocessor-based analysis, R958
 Sympathetic nervous system
 activation, hemodynamic effects, R29
 activity, pressure response, neuropeptide Y effects, H791
 brown fat response to cold, thyroxine effects, E81
 control, rostral ventromedial medulla, R635
 exercise, dobutamine effects, H954
 pressure regulation, circulating vasopressin effects, H209
 renal nerve activity, norepinephrine release and, R229
 response to coronary occlusion, animals susceptible to ventricular fibrillation, H1886
 rostral ventrolateral medulla, vasomotor control, respiration changes and, R626
 stress-induced tachycardia, hypothalamic GABA receptors and, R246
 Sympathetic outflow
 reflex stimulation of, rhythmic exercise, H2017
 response to stress, μ -opioid peptide modulation of, R901
 Sympathoinhibition, central effects of somatostatin, R588
 Synaptic transmission, chemical, cellular and molecular mechanisms of, L289
 Systemic arterial system, aortic impedance in, mean pressure effects, H969
 Systemic veins, EDRF in, H1910
 Systole, dynamic twist-shortening relations, left ventricular, H1119
 Systolic performance, effectiveness, model, H2070
 T
 Tachycardia, stress-induced, hypothalamic GABA receptors and, R246
 Tachygastria, neural isolation effects, gastric motility, G30
 Tachykinins, transmitters of ascending

contractile component, peristaltic reflex, G709
 Taste: see Gustatory response
 Taurine
 pial arterioles and (piglet), H1200
 transport, jejunal brush-border membrane vesicles, G65
 Taurocholate
 CCK processing and, hepatocytes, G242
 transport, liver, compartmental model, G210
 T84 cells, mediating action of carbachol, role of calcium in, C976
 Tedisamil, transient outward potassium current and, ventricular myocytes, H1746
 Temperature
 acetylcholine response, atrial cells, C646
 ambient, food costs and, R1328
 membrane potentials and, esophageal circular muscle (opossum), G637
 regulation
 adaptation to fasting and, chick (penguin), R744
 diencephalon, R57
 diencephalon, synaptic blockade effects, R65
 ouabain effects, R21
 rhythm, bright light effects, R136
 simulated jet lag, circadian rhythms and patterns of performance (monkey), R796
 thermoregulatory sweating, exercise in the heat, R311
 ventilation and, chemical control (iguana), R1258
 Temperature, body
 brain, corticotropin-releasing factor effects, R528
 circadian rhythm, suprachiasmatic nucleus influence on (hamster), R210
 esophagus, during exercise, cutaneous vasodilation and, R1089
 increased, laboratory and free-ranging animals (chuckwallas), R150
 norepinephrine effects, preoptic anterior hypothalamus, R816
 regulated, change in, prostaglandin fevers, R695
 skin, rostral ventrolateral medulla activity and, R1496
 suprachiasmatic nucleus activation, during hibernation cycle (squirrel), R605
 Tensor fasciae latae, fiber-type composition, E823
 Teratogenesis, fuel-mediated, hypoglycemia-induced malformations, embryo, E269
 Terbutaline, lung surfactant, alveolar phospholipid uptake and, L248
 Testis, *E. coli* enterotoxin receptor localization in (opossum), F874
 Testosterone
 brain sodium-potassium-ATPase differences, male-female, E284
 energy balance and, exercise training effects, R550
 nonesterified fatty acid modulation of, Leydig cells, E937
 seasonal responses, timing of (hamster), R142
 12-O-Tetradecanoylphorbol-13 acetate, staurosporine effects, pancreatic acini, G548

SUBJECT INDEX TO VOLUME 257

- Tetraethylammonium
potassium channels and, vascular
smooth muscle cells, H760
transport
across renal basolateral membrane,
F243
urinary bladder (crab), R501
- Tetrodotoxin
acetylcholine release, *Trichinella* infection and, myenteric plexus, G898
energy expenditure and ion channels,
brain (turtle, rat), R1354
lowering oxygen pressure, bronchial relaxation and, C1034
peptide YY release and, left colon, G715
- Theophylline
 β -endorphin and islet hormone release,
E361
intervillous pH profiles, small intestine,
G489
metabolic effects of, calcium requirement
for, gastric mucosa (toad), G969
transcellular calcium transport, intestine, G935
- Thermodilution
hemodynamics of ANP and, renal hypertension, R365
renal, activity, mental stress and epinephrine effects, F682
- Thermogenesis
aging and gender effects, R700
brown fat
GDP binding and, hibernation and arousal (squirrel), R536
norepinephrine and denervation effects (hamster), R396
carbohydrate-induced, epinephrine effects, muscle, E340
corticosterone and, genetic obesity, E133
diet-induced, insulin-induced hyperphagia and, R717
epinephrine, plasma insulin or glucagon changes and, E185
nonshivering
adaptation to fasting and, chick (penguin), R744
brown fat lipoprotein lipase and (hamster), R1123
surgical removal of brown fat, compensation by other depots, R253
whole-body, insulin and, R717
- Thermoregulation
aging and gender effects, R700
dehydration and rehydration, aging effects, R1050
expired air temperature, diving (seal), R306
food costs and, behavior patterns, R1328
heat exposure and, dehydrated (pigeon), R377
norepinephrine effects, preoptic anterior hypothalamus, R816
obesity, adrenalectomy prevention of, E139
rostral ventrolateral medulla neuron activity, EEG/EMG pattern changes, R1496
sweating, control during exercise, heat and, R311
Thermosensitivity, neural, hypothalamic, ouabain effects, R21
Thiourea, urea transport and, inner medullary collecting duct, F358
Thirst: see Drinking
Threonine, whole body protein synthesis and, E639
- Thrombin
endothelial cells treated with, platelets adhere to, H423
endothelium effects, coronary resistance arteries, H603
mitogenic signals for, mesangial cells, F366
pulmonary endothelial permeability induced by, isoproterenol effects, H1613
- Thrombogenicity, hydrostatic pressure reduction of, ePTFE vascular grafts, H1076
- Thromboxane
Goldblatt hypertension and, F190
hypoxic alterations of anaphylaxis and, heart (guinea pig), H1378
modulation by renin, F554
pulmonary vasoconstriction, calcium role in, H2001
- Thromboxane A₂
endothelial cell, diabetic aorta, H1327
serotonin and, coronary blood flow reductions, H873
vascular tone, neutrophils and, H1315
- Thromboxane B₂
essential fatty acids, aminonucleoside nephrosis and, F798
urinary excretion, renal metabolism and, F77
- Thromboxane synthetase, inhibition, coronary ring, H1240
- Thymidine, cAMP increase and, proximal tubules, F1021
- Thymocytes
membrane potential changes, charybdotoxin-sensitive, calcium ions and, C197
sodium and potassium ion contents of, regulation, C12
- Thyroid hormone
gentamicin accumulation and, proximal tubule lysosomes, F86
inhibition, antioxidant enzyme development and, lung, fetus, L94
tissue-specific isoform regulation, sodium-potassium-ATPase (ferret), H534
- Thyrotropin-releasing hormone
gastric motility and, G454
vagal stimulation induced by, duodenal bicarbonate, G677
- Thyroxine
creatine depletion and, muscle, C810
effect on thermogenic and trophic responses, brown adipose tissue, cold, E81
gentamicin accumulation and, proximal tubule lysosomes, F86
perinatal expression, colon, G496
transport, liver, model, E764
- L-Thyroxine, tissue-specific isoform regulation, sodium-potassium-ATPase (ferret), H534
- Tissue: see also specific type
peripheral, TNF effects on glucose uptake, R1182
- TNF: see Tumor necrosis factor
- Tolbutamide, ATP₁-sensitive potassium channels, pancreatic B-cells, C1119
- Torpor
control, seasonal timer (hamster), R142
suprachiasmatic nucleus influence (hamster), R210
- Trabeculae muscle, neuropeptide inotropic effects, H1082
- Trace elements, metabolism, model, R556
- Tracer dilution technique, glucose output, liver, E531
- Trachea
p-aminohippurate transport, sodium and bicarbonate effects, C1108
smooth muscle, aequorin luminescence, myosin phosphorylation, and active stress in, C1062
- Tracheal epithelia, cyclooxygenase product release from, L361
- Tracheal submucosal gland, glycoconjugate secretion, platelet-activating factor effects, L373
- Transferrin, endotoxin effects, hepatocytes, G524
- Transient conditions, arterial resistance and compliance during, H190
- Transport-coupling hypothesis, tubuloglomerular feedback, F882
- TRH: see Thyrotropin-releasing hormone
- Triacylglycerol pool, hydrolysis in, intestinal mucosa, G871
- Trichinella* infection, acetylcholine release and, myenteric plexus, G898
- Trifluoperazine, U 46619 and prostaglandin vasoconstriction, lung, H2001
- Triglycerides
absorption, suckling and adult, G823
metabolism, vitamin D₃-induced changes, monocyte-macrophages, E290
serum, triglyceride-rich lipid particle effects, E860
- Triiodothyronine, effect on thermogenic and trophic responses, brown adipose tissue, cold, E81
- Triolen, absorption, suckling and adult, G823
- Trypsin
activation, atrial muscarinic potassium channels, H334
CCK processing and, hepatocytes, G242
feedback regulation, G175
interdigestive exocrine pancreatic, duodenectomy effects, G415
- Trypsinlike enzyme, vasopressin metabolized by, amniotic fluid (guinea pig), E354
- Tryptase, mast cell, airway function and, L39
- Tubuloglomerular feedback: see Feedback
- Tumor necrosis factor
after exercise, skeletal muscle, R451
glucose uptake and, peripheral tissues, R1182
interleukin 1 α and, vascular endothelial permeability, L399
lung cell proliferation and, L23
lung injury induced by, platelet-activating factor and, L232
priming of neutrophils, hypochlorous acid production, L338
- Tumors, protein metabolism in, prostaglandin production effects, C261
- Tunicamycin, erythropoietin secretion, hypoxia effects, hepatoblastoma cells, C743
- Twitch potentiation, myosin light chain phosphorylation and, skeletal muscle, C1012
- TxA₂: see Thromboxane A₂
- Tyramine, regional cardiac sympathetic

tomy, H1523

Tyrosine
 release, after exercise, soleus muscle, E1
 whole body protein synthesis and, E639

Tyrosine kinase, gastric mucosal response, aging and, G554

U

U 46619, pulmonary vasoconstriction, calcium role in, H2001

U 63557A, relaxation and reperfusion, coronary ring, H1240

Ulcer
 duodenal, model of gastric acid secretion, G157
 index, ornithine decarboxylase induction during stress, G259
 peptic, buffer capacity and anion exchange, parietal cell, G741

Ultrafiltration, albumin clearance, saline infusion and, H525

Uranyl nitrate, hydrogen peroxide generation and, glycerol-induced renal failure, F440

Urea
 acute regulation of organic solutes, renal, F676
 ANF actions, kidney, model, F1146
 glycerophosphorylcholine content, osmoregulation and, renal cells, C795
 insulin and glucose oxidation effects, burns and sepsis, E323
 partial hepatectomy-induced decrease, acid-base balance and, F696
 production, liver, growth hormone effects, E959

transport
 inhibition by phloretin, inner medullary collecting duct, F358
 two-nephron central core model, renal medulla, F399

Ureagenesis, partial hepatectomy-induced decrease, acid-base balance and, F696

Uremia, insulin-resistant, alterations in glucose transporter systems in, E193

Urethan, anesthesia, EEG/EMG pattern changes, R1496

Urethra, responses, sacral stimulation, chronic spine, R284

Urinary bladder
 acidification, phorbol myristate acetate inhibition (turtle), F1124
 anion and cation transport (crab), R501
 apical membrane response, ADH (toad), R998
 fluorescent vasotocin analogues (toad), E804
 function, *m*-chlorophenylpiperazine effects, R1441
 contractions, micturition and, fetus (sheep), R1526
 ion transport, dynamic changes in plasma membrane area and (turtle), R973
 longitudinal and transverse strips, spontaneous contractions, R781
 micturition reflexes, electrophysiology, R410
 NBD-taurine uptake, α -type carbonic anhydrase effects (turtle), F1015
 neurogenic, sacral stimulation and, chronic spine, R284
 parasympathetic ganglia, excitatory ef-

fects of substance P, R1450

sodium transport
 glucocorticoid metabolism and, carbinoxolone effects (toad), F700
 insulin and IGF I receptor-mediated (toad), C612
 steroid metabolism, mineralocorticoid specificity and, F690

Urinary concentrating mechanism
 small-solute gradient effects, transcapillary fluid movement, E547
 two-nephron central core model, renal medulla, F399

Urinary excretion
 cGMP production and, during gestation, R847
 steroids, genetic hypertension and, H506
 thromboxane B₂, renal metabolism and, F77

Urine
 bladder contractions and micturition, fetus (sheep), R1526
 concentration, sodium chloride and water transport, Henle's loop (quail), F994

flow
 ANF and, awake state, F565
 ANP effects, forelimb, H272
 strong-ion excretion, exercise effects, R102
 transport, pyeloureteral pacemaker, R788

Ursodeoxycholate, changes induced by, sodium-bicarbonate exchange and bicarbonate excretion, G371

Uterus
 fluid composition, changes during shell formation (chicken), R732
 motility, prostaglandins and oxytocin, E20
 pregnant, sodium and calcium channels in, C409
 uteroplacental perfusion pressure, renin-angiotensin system role in, R204
 vascular responses, angiotensin II, pregnancy (sheep), H17

V

Vagal afferents
 cardiac and abdominal, inhibition of spinalthalamic cells (monkey), R889
 lung inflation reflexes, vascular capacitance and, R1004

Vagal fibers, gastric, brain stem responses to electrical stimulation of, G24

Vagal nuclei, TRH specific effects, gastric motility, G454

Vagina, opening, prolonged exercise effects, R1359

Vagotomy
 brain and plasma ANP, during hemorrhage, R1393
 hepatic, hormonal response to exercise and, E855
 stomach, effects on motility, G30

Vagus nerve
 activity, during coronary occlusion, prostaglandins and, R216
 bursts, Wenckebach arrhythmia and, H935
 dorsal motor nucleus of, ileal water absorption and, G266
 electrical stimulation, endogenous CCK effects, G944

hepatic, pancreatic hormone secretion and, during exercise, E855
 response to CCK, hindbrain, R1162
 stimulation, bicarbonate, duodenum, G677
 stimuli, AV conduction and, H812
 tone, endothelin effects, H918

Valinomycin, sodium-potassium-ATPase, compartmentalization, G539

Vanadyl sulfate, oral, diabetes mellitus, H904

N-Vanillylnonanamide, vasopressin-mediated recovery and, blood pressure, R1429

Vasa recta, transcapillary fluid movement in, small-solute gradient effects, F547

Vascular bed, skin, ANP effects, forelimb, H272

Vascular conductance, leg, norepinephrine spillover from muscle during exercise, H1812

Vascular mechanics
 pulmonary and systemic, vasopressin effects, H1228
 transient conditions, resistance and compliance during, H190

Vascular tone, modulation, neutrophils, H1315

Vasculature, myocardial, distribution of adrenergic receptors, H162

Vasoactive substances
 aging and, coronary response, H988
 peripheral arterial occlusive disease (calf), H395

Vasoactivity, microvascular responses, copper deficiency, H1607

Vasoconstriction
 adrenergic responses, skin, abolition by local iontophoresis of bretylium, H1599
 angiotensin-II-induced, placental response to prostacyclin and, fetus (sheep), E102
 angiotensin II-mediated, inhibition by lipoxigenase blockade, H434
 angiotensin-induced, ANP effects, H1062
 arteriolar oxygen reactivity, leukotriene antagonist effects (hamster), H1565
 coronary, intracoronary endothelin, H339
 endothelin-induced
 coronary artery (pig), H1828
 hemodynamic and baroreflex effects of, H918
 FMLP-induced, pulmonary arteries, H107
 hypoxic pulmonary, vasopressin and, H415
 pulmonary
 lipoxigenase inhibitor effects, H1977
 pentobarbital sodium and (sheep), H898
 U 46619 and prostaglandin, calcium role in, H2001

renal
 α_2 -adrenoceptor-mediated, awake state, F1132
 reactive oxygen species and, F53
 sympathetic, hypoxic hypoxia, H1581
 visceral and muscle, hypotension, spinal injury, H1347

Vasoconstrictor, potent long-lasting, men, H2033

- Vasodepressor response, hypoxia, 8-phenyltheophylline effects, coronary, E1043
- Vasodilation
adrenal, during hypoxia, anesthesia and, H1458
adrenergic responses, skin, abolition by local iontophoresis of bretylium, H1599
bicarbonate and hypercapnia, cerebral arterial response, H141
cerebral arterioles, anesthesia effects, H85
cerebral artery occlusion, adenosine and, H1656
coronary, adenosine and α_2 -stimulation, H132
cutaneous, atropine-induced, esophageal temperature during exercise and, R1089
endothelium-mediated, H1966
facial nerve, cerebral blood flow and glucose use with, R517
femoral, stabilized EDRF effects, H1895
FMLP-induced, pulmonary arteries, H107
hypoxic, cerebral arteries, H824
pulmonary, vasopressin-induced, H415
trigeminal ganglionectomy, postocclusive cerebral hyperemia and, H1736
- Vasodilators, nitric oxide-generating, inhibition of mesangial cell mitogenesis, F60
- Vasopressin: *see also* Antidiuretic hormone
acute aortic coarctation hypertension and, H1480
ANF infusion effects, fetus (lamb), R580
angiotensin II interaction and, prostacyclin synthesis, vascular smooth muscle cells, E617
arginine, membrane voltage recordings and, A10 vascular smooth muscle cells, C323
attenuated pressor response, third cerebral ventricle lesions, R431
blood pressure recovery mediated by, synthetic capsaicin effects, R1429
blood volume distribution after hemorrhage, newborn (lamb), R647
bradykinin activation of protein kinase C, cortical collecting tubular cells, F808
catecholamine activity after hemorrhage, paraventricular hypothalamus, R370
central, cardiovascular response to, baroreceptor denervation effects, H314
circulating, arterial pressure regulation and, H209
circulatory regulation and, H658
dependent effect of drinking volume on, R762
eicosanoid release and, diabetes, F762
endothelin and, cerebral blood vessels, H799
endothelium effects, coronary resistance arteries, H603
hormonal response and, repeated small hemorrhages, R118
hypertensive response and, after AV3V lesions, R80
inhibition, renal response to hypotension, R194
lack of, ANP binding sites and, brain, R168
lysine, urinary clearance, DOCA hypertension and (pig), R1467
metabolism, trypsinlike enzyme and, amniotic fluid, E354
neurohypophyseal blood flow during hemorrhage, baroreceptor control, H1507
osmoregulatory alterations of pregnancy, hemodynamic factors in, R909
osmotic control, gender-related differences, R738
oxygen uptake and, sinoaortic denervation, R1
plasma, blood flow during hemorrhage and, brain, H1360
protein phosphorylation, hepatic, R1232
pulmonary vasodilation induced by, H415
rapid atrial pacing and, cardiac-denervated dog, R162
receptors: *see* Receptors
release
central adrenergic control of, sex differences, R1040
central effects of somatostatin, R588
osmoregulation of thirst and, pregnancy, F159
replacement, renin hypersecretion and, R1117
responses
acidemia stimulation of, fetus (sheep), R344
baroreceptor denervation, angiotensin II infusion effects, R1175
central osmotic stimulation, E611
hypertonic saline, cortisol effects, fetus (sheep), R861
total translation, neurohypophysis, R109
vascular mechanics and, H1228
water and chloride permeability, papillary surface epithelium, F218
water permeability and, renal epithelia, C837
water transport induced by, phosphatides and, F524
- Vasopressin-secreting cells, supraoptic, A1
cell group mediation of, R1020
- Vasoregulation, pulmonary, pentobarbital effects, H1140
- Vasospasm
arterial contractions, phorbol amplification of, H1174
coronary, endothelium regeneration, H1681
- Vasotocin, receptors: *see* Receptors
- Vasovagal syncope, response to stress, μ -opioid peptide modulation of, R901
- Vena cava, chronic constriction, renal responses to ANF, R1057
- Venoconstriction, central mobilization of blood and, H348
- Ventilation
intrathoracic pressure, effects on mitral and aortic flow, H120
temperature and, chemical control (iguana), R1258
- Ventral medulla
airway dilation, benzodiazepines and, R810
role, generation of Mayer waves, R804
- Ventricular cells: *see also* Cardiac cells;
Cardiomyocytes; Heart cells; Myocytes, ATP-sensitive potassium channels, activation by pinacidil (guinea pig), H2092
- Ventrolateral medulla, neurons, muscular contraction and, R1154
- Verapamil
calcium increase and, mesangial cells, F1094
calcium ion oscillations, heart, laser backscatter studies, H665
calcium transients and, vascular smooth muscles, H563
calcium transport and, inner medullary collecting duct, F738
intravascular volume and, total and regional, H1049
oral, vitamin D metabolism and, E632
- Veratridine
brain sodium-potassium-ATPase differences, male-female, E284
brain tissue, high-affinity uptake of copper into, C315
renin secretion and, fetus, newborn, and adult (sheep), R765
- Villus, contraction, repair after intestinal epithelial injury, G274
- VIP: *see* Peptides or Polypeptides, vasoactive intestinal
- Viscosity, contractile function and, cardiocytes, H1717
- Vision, sodium-calcium exchange, rod photoreceptors, C153
- Vitamin C, placental handling of, C110
- Vitamin D
calcium uptake and, duodenal enterocytes, F574
transcellular calcium transport, intestine, G935
- Vitamin D₃
1,25-dihydroxy-bone surface elements, E815
lipid metabolism and, monocyte-macrophages, E290
metabolic alkalosis effects, E578
renal proximal tubules, F390
epithelial cells, duodenal, G760
metabolism, oral verapamil and calcium effects, E632
mineral metabolism and, pregnancy, E118
- VLM: *see* Ventrolateral medulla
- VMH: *see* Hypothalamus, ventrolateral
- Voiding, bladder contractions and, fetus (sheep), R1526
- Voltage, transepithelial, calcium absorption in cortical proximal tubules, F262
- Voltage-clamp technique
transient outward potassium current, ventricular myocytes, H1746
whole cell, potassium current, cardiac Purkinje cells, C1086
- Voltage recordings, membrane, A10 vascular smooth muscle cells, C323
- Volume
body fluid, arterial chemoreceptor and reflex control of, R1282
blood
ANF and, awake state, F565
ANF infusion effects, fetus (lamb), R580
angiotensin II salt-dependent hypertension, H1402
circulating, ANP effects, R127
expansion, ANF release and, R896
limb, verapamil effects, H1049
measurement, R439
redistribution, after hemorrhage, newborn (lamb), R647

response to norepinephrine, fetus (lamb), R574
 tissue, after direct current shock, H1180
 cell
 energy-dependent maintenance, astrocytomas, C817
 impaired regulation, sodium-hydrogen exchange-deficient mutants, C1158
 membrane dynamics (snake), R982
 regulation, antiosmotic, C159
 change, pressure responses to, tetanized heart (ferret), H38
 constant, hemorrhage, response to (trout), R1307
 control, during periodic breathing, R653
 density, alveolar dimension and number, L240
 expansion
 acute, renal decapsulation effects, R44
 baroreflex sensitivity and, awake state (monkey), R595
 experimental renal cortical necrosis, F925
 interstitial, albumin fluxes during saline infusion, H525
 reduced renal response to, diabetes, R672
 renal action of ANP, dopamine permissive role in, F300
 renal nerve response to, newborn, awake state (lamb), R1519
 extravascular fluid, dehydrated heat-exposure, R377
 gastric, model, G157
 interventions, transient diastolic changes in ventricular filling, H305
 intravascular, verapamil effects, H1049
 myocyte, fetal, neonatal, and adult (sheep), H1
 overload, cardiac, DOCA and plasma ANF in, H739
 plasma
 atriopeptin, calcium blockade and, R174
 expanders, hemorrhagic shock, H238
 pressure/midwall, relations, model,

H2070
 regulation
 calcium ion-activated potassium channels, F347
 hyperosmotic media, kidney tubules, C1093
 interstitial, microvascular exchange and, model, H2081
 lymphocytes, aldosterone and, E170
 magnesium and sodium-proton exchange, erythrocytes, C1038
 pregnancy, hemodynamic factors in, R909
 stroke, dynamic exercise in senescence, H1428
 tidal, vasomotor control, respiration changes and, R626
 unstressed, head-out water immersion, R358

W

Water
 absorption, ileal, brain stem neuron regulation of, G266
 ANF actions, kidney, model, F1146
 heavy, methane production and (sheep), R1488
 homeostasis, arterial chemoreceptor and reflex control of, R1282
 intake
 changes, effect on glomerular B₂-kinin-binding sites, F353
 glucose concentration and, R1474
 neuropeptide Y effects (sheep), R383
 metabolism
 inner ear volume receptors (guinea pig), F341
 mortality and brain lesions, F18
 permeability: *see* Permeability
 reabsorption, osmotic forces driving, proximal tubules, F669
 transport
 osmotic, inner medullary collecting duct, F358
 sodium chloride and, thin descending limb of Henle (quail), F994

two-nephron central core model, renal medulla, F399
 vasopressin-induced, phosphatidates and, F524
 Weight
 body
 control by seasonal timer (hamster), R142
 eating and hoarding as a function of, R952
 regulation, energy metabolism in brain and, R1322
 responses to short days, regional differences (hamster), R1533
 Weightlessness
 normal weight bearing after, bone response, E606
 simulated, osteocalcin and bone calcium with, R1103
 Wenckebach block
 arrhythmia, brief vagal bursts and, H935
 mechanism, computer modeling experiments, H1263
 Work, muscular, exercise-induced rise in glucagon, E108

X

Xanthine oxidase
 endothelial injury, intracellular iron and hydroxyl radical role in, H1640
 inhibition, ischemic acute renal failure and, F953
 leukocyte adherence, reperfusion-induced, G683
 postischemic microvascular injury and, skeletal muscle, H1782
 production, intestinal ischemia, G409
 Xanthine oxidoreductase, metabolism, ischemic myocardium, H47

Z

Zonula occludens (ZO-1), protein localization, C621
 Zymosan, production, neutrophils, TNF priming for, L338
